the incident management process is also extensively reviewed Tactical operations that may be necessary to arrest individuals or prevent a WMD incident are also discussed The second part of the book is designed for the hazardous material trained investigator The required training equipment and investigative procedures are clearly defined in this section and detailed step by step instructions are provided for the collection of chemical biological and radiological evidence In addition investigative techniques are provided that will assist the criminal investigator in identifying and entering a facility suspected of manufacturing a weapon of mass destruction Remote sampling techniques are provided to assist in gathering the probable cause for a search warrant Also helpful to readers are the many illustrations and a glossary It will be clear to the reader that this unique book represents the epitome of authoritativeness and comprehensiveness in the field of WMD response and investigation
