Obshchestvo I Prirodnaia Sreda:

A Little Corner of Freedom Douglas R. Weiner, 1999-02-26 While researching Russia's historical efforts to protect nature Douglas Weiner unearthed unexpected findings a trail of documents that raised fundamental questions about the Soviet political system These surprising documents attested to the unlikely survival of a critical minded scientist led movement through the Stalin years and beyond It appeared that within scientific societies alternative visions of land use resource exploitation habitat protection and development were sustained and even publicly advocated In sharp contrast to known Soviet practices these scientific societies prided themselves on their traditions of free elections foreign contacts and a pre revolutionary heritage Weiner portrays nature protection activists not as do or die resisters to the system nor as inoffensive do gooders Rather they took advantage of an unpoliced realm of speech and activity and of the patronage by middle level Soviet officials to struggle for a softer path to development In the process they defended independent social and professional identities in the face of a system that sought to impose official models of behavior ethics and identity for all Written in a lively style this absorbing story tells for the first time how organized participation in nature protection provided an arena for affirming and perpetuating self generated social identities in the USSR and preserving a counterculture whose legacy survives today *Theoretical and Ideological Discussion of Environmental Problems in the Soviet Union and East Germany* 1965-77 Joan Thompson DeBardeleben, 1979 **Soviet Studies in Philosophy**, 1973 **Human Ecology** Mary A. Vance, 1987 **Public Administration Series--Bibliography**, 1987 The 1926/27 Soviet Polar Census Expeditions David G. Anderson, 2011-05-01 In 1926-27 the Soviet Central Statistical Administration initiated several yearlong expeditions to gather primary data on the whereabouts economy and living conditions of all rural peoples living in the Arctic and sub Arctic at the end of the Russian civil war Due partly to the enthusiasm of local geographers and ethnographers the Polar Census grew into a massive ethnological exercise gathering not only basic demographic and economic data on every household but also a rich archive of photographs maps kinship charts narrative transcripts and museum artifacts To this day it remains one of the most comprehensive surveys of a rural population anywhere The contributors to this volume all noted scholars in their region have conducted long term fieldwork with the descendants of the people surveyed in 1926-27 This volume is the culmination of eight years work with the primary record cards and was supported by a number of national scholarly funding agencies in the UK Canada and Norway It is a unique historical ethnographical analysis and of immense value to scholars familiar with these communities contemporary cultural dynamics and legacy **The Ecology of Pastoralism** P. Nick Kardulias, 2015-04-15 In *The Ecology of Pastoralism* diverse contributions from archaeologists and ethnographers address pastoralism's significant impact on humanity's basic subsistence and survival focusing on the network of social political and religious institutions existing within various societies dependent on animal husbandry Pastoral peoples both past and present have organized their relationships with certain animals to maximize their ability to survive and adapt

to a wide range of conditions over time Contributors show that despite differences in landscape environment and administrative and political structures these societies share a major characteristic high flexibility Based partially on the adaptability of various domestic animals to difficult environments and partially on the ability of people to establish networks allowing them to accommodate political social and economic needs this flexibility is key to the survival of complex pastoral systems and serves as the connection among the varied cultures in the volume In *The Ecology of Pastoralism* a variety of case studies from a broad geographic sampling uses archaeological and contemporary data and offers a new perspective on the study of pastoralism making this volume a valuable contribution to current research in the area Bowker's Law Books and Serials in Print ,1984

Arctic Adaptations Igor Krupnik,2014-05-20 The common view of indigenous Arctic cultures even among scholarly observers has long been one of communities continually in ecological harmony with their natural environment In *Arctic Adaptations* Igor Krupnik dismisses the textbook notion of traditional societies as static Using information from years of field research interviews with native Siberians and archaeological site visits Krupnik demonstrates that these societies are characterized not by stability but by dynamism and significant evolutionary breaks Their apparent state of ecological harmony is in fact a conscious survival strategy resulting from a prolonged and therefore successful process of human adaptation in one of the most extreme inhabited environments in the world As their physical and cultural environment has changed fluctuating reindeer and caribou herds unpredictable weather patterns introduction of firearms and better seacraft Arctic communities have adapted by developing distinctive subsistence practices social structures and ethics regarding utilization of natural resources Krupnik s pioneering work represents a dynamic marriage of ethnography and ecology and makes accessible to Western scholars crucial findings and archival data previously unavailable because of political and language barriers Yupik Transitions Igor Krupnik,Michael Chlenov,2013-11-15

The Siberian Yupik people have endured centuries of change and repression starting with the Russian Cossacks in 1648 and extending into recent years The twentieth century brought especially formidable challenges including forced relocation by Russian authorities and a Cold War ice curtain that cut off the Yupik people on the mainland region of Chukotka from those on St Lawrence Island Yet throughout all this the Yupik have managed to maintain their culture and identity Igor Krupnik and Michael Chlenov spent more than thirty years studying this resilience through original fieldwork In *Yupik Transitions* they present a compelling portrait of a tenacious people and place in transition an essential portrait as the fast pace of the newest century threatens to erase their way of life forever

Dolukhanov,2006-11-15 Stimulated by Noah s Flood Hypothesis proposed by W Ryan and W Pitman in which a catastrophic inundation of the Pontic basin was linked to the biblical story leading experts in Black Sea research including oceanography marine geology paleoclimate paleoenvironment archaeology and linguistic spread provide overviews of their data and interpretations obtained through empirical scientific

approaches Among the contributors are many East European scientists whose work has rarely been published outside of Cyrillic Each of the 35 papers marshals its own evidence for or against the flood hypothesis No summary or overall resolution to the flood question is presented but instead access is provided to a broad range of interdisciplinary information that crosses previously impenetrable language barriers so that new work in the region can proceed with the benefit of a wider frame of reference The three fundamental scenarios describing the late glacial to Holocene rise in the level of the Black Sea catastrophic gradual and oscillating are presented in the early pages with the succeeding papers organized by geographic sector northern Ukraine western Moldova Romania and Bulgaria southern Turkey and eastern Georgia and Russia as well as three papers on the Mediterranean The volume thus brings together eastern and western scholarship to share research findings and perspectives on a controversial subject In addition appendices are included containing some 600 radiocarbon dates from the Pontic region obtained by USSR and western laboratories *Mer: Aspects Économiques Et Techniques; Bibliographie Sélective* ,1974 *Mer: Aspects Économiques Et Techniques, Bibliographie Selective* Dag Hammarskjöld Library,1974 **The Environment And Marxism-leninism** Joan Debardeleben,1985-05-20 **Environmental Management in the Soviet Union and Yugoslavia** Barbara Jancar-Webster,1987 **Monthly Index of Russian Accessions** ,1961 **Monthly Index of Russian Accessions** Library of Congress.
