*Journal of the American Geographical Society of New York* American Geographical Society of New York, 1888. **Alfredo Boulton** Idurre Alonso, 2023-07-18. This lavishly illustrated volume examines the work of the Venezuelan photographer and art historian Alfredo Boulton, one of the main intellectuals of Latin American modernity. Alfredo Boulton (1908-1995) is considered one of the most important champions of modern art in Venezuela and a key intellectual of twentieth-century modernism. He was a pioneer of modern photography, an art critic, a researcher and historian of Venezuelan art, a friend to many of the great artists and architects of the twentieth century and an expert on the imagery of the heroes of his country's independence. Yet Boulton is shockingly underrecognized outside of his native land. The few exhibitions related to his work have focused exclusively on his photographic production; never has there been a project that looks at the full range of Boulton's efforts, foregrounding his influence on the shaping of Venezuelan art. This volume addresses these lacunae by analyzing Boulton's groundbreaking photographic practice, his central role in the construction of a modern national artistic canon, and his influence in formalizing

and developing art history and criticism in Venezuela Based on the extensive materials held in Boulton's archive at the Getty Research Institute Alfredo Boulton brings together essays by leading scholars in the field to offer a commanding original perspective on his contributions to the formation of a distinctive modernity at home and beyond
