Pioneer Settlement in Northeast Argentina Robert C. Eidt, *Pioneer Settlement in Northeast Argentina* Robert C. Eidt, 1971 The physical surroundings Colonial land opening in misiones the beginning of european settlement Corrientes province and the development of latifundismo in misiones Public lands and government colonization Foreign colonization companies in misiones A summing Up settlement and population growth in misiones **Pioneer Settlement in South Brazil: The Case of Toledo, Paraná** K.D. Muller, 2012-12-06 In the period since the end of world War II numerous develop ing countries have employed colonization or planned pioneer settlement as one method of building a more reliable and bal anced economy It is felt that the traditional single sided sys tems of farm ownership and production with their latifundium and minifundium holdings will gradually and peacefully become less prominent as better settlement systems are introduced and extended Marked increases in population pressure large tracts of unused or underused land and modern improvements in set tlement planning are among other compelling reasons for star ting colonization programs Of all the areas in the world the continent of South America probably has the widest variety of planned pioneer settlements as well as the most sizeable programs Brazil the largest country on the continent is actively engaged in populating the vast emp ty spaces of its interior and provides excellent opportunities for the scholarly investigation of new frontier settlement types In addition to the academic discussion of the origin and develop ment of these expressions of man s expansion into marginal ar eas the critical examination of relatively new attempts at land settlement is a useful thing because what is to be learned from such studies may be directly applicable to other pioneer zones and moreover may be of vital significance to overall economic improvement on the continent In this monograph my student K Muller analyzes the South Brazilian frontier colony of Toledo Parana founded in 1946 **Borderlines and Borderlands** Alexander C. Diener, 2010-01-16 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by their own immutable borders What we often don t realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital to our understanding of the world The unique and compelling histories of some of the world s oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author s regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people and states they bound To view more maps from the David Rumsey Map Collection visit [www](http://www.davidrumsey.com)

Foweraker, 2002-08-15 A regional political economy which makes its own contribution to the theory of the state Geographic Perspectives on Soviet Central Asia Robert Lewis, 2003-10-04 In a unique survey based on new census data this book highlights the region's geographic economic and ecological problems since 1945 *Tradition, Location and Community* Adenrele Awotona, Necdet Teymur, 2024-11-07 Originally published in 1997 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction Tradition Location and Community Place making and Development brings together the selected papers of seventeen architects social scientists and planners It offers a range of original perspectives on the relationship between the design and habituation of the built environment on the one hand and social and cultural development on the other As an archival volume it attempts to present a mixture of cross disciplinary and cross cultural perspectives It explores the view that planning and design the organization of the physical built environment which follow from the rapid transformations wrought by development must respond to and be based on the wants and needs of the people affected that is it must be in accord with their notions of environmental quality Divided into two sections The first section has five chapters which explore the theoretical and conceptual aspects of place making and development Section two consists of twelve chapters each of which presents a case study **German Buenos Aires, 1900-1933** Ronald C. Newton, 2014-08-27 This study of the German community of early twentieth century Buenos Aires is a major contribution to the literature on Argentine history and on the New World immigrant experience Beginning with the first wave of immigration in the late nineteenth century and continuing to the outbreak of World War II Ronald C Newton reconstructs the growth development and influence of a powerful foreign population in what was then the largest city in South America In the three decades before World War I Argentina became a major food producing and exporting country Through the port of Buenos Aires was funneled the bulk of the Pampas foodstuff and fiber in one direction and Europe's capital technology and surplus labor in the other The German speakers made up one of the smaller Western European communities within the Argentine metropolis but their cultural and economic influence was far out of proportion to their numbers Based in a large and occupationally diverse middle class the German community was represented at all social levels Newton analyzes the experience of this well demarcated group during a period of rapid demographic growth and increasing pressure to assimilate He constructs working hypotheses that may be applied and refined in further investigations The book draws substantially on materials from within the Buenos Aires German community newspapers memoirs the records of associations and welfare agencies to reconstruct its intense daily life The author highlights for instance the sharp economic reversals German speaking residents suffered during World War I and shows how their fortunes declined further after continued Germanic immigration in the 1920s Especially significant is his finding that the German community which until 1914 had seemed impervious to the currents of Argentine nationalism became susceptible to assimilation into Argentine society In concluding chapters Newton demonstrates the way

the German economic elite came to terms with the Nazis for opportunistic reasons thus the volume also serves as an introduction to the question of Nazism's diffusion in Argentina Guide to the Hispanic American Historical Review, 1956-1975 Wilber A. Chaffee, Beecher C. Ellison, 1980 *The Meaning of the Built Environment* Amos Rapoport, 1990 The Meaning of the Built Environment is a lively illustrated study of the meanings of everyday buildings for their users Professor Rapoport uses examples and vignettes drawn from many cultures and historical eras as well as contemporary America to explicate a new framework for understanding how the built environment comes to have meaning both for individual people and whole societies *Environment and Culture* Irwin Altman, Joachim F. Wohlwill, 2013-06-29 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation Irwin Altman Joachim F Wohlwill ix Contents Introduction 1 CHAPTER 1 CROSS CULTURAL ASPECTS OF ENVIRONMENTAL DESIGN AMOS RAPOPORT Introduction 7 Culture 9 Environmental Design 10 The Relationship of Culture and Environmental Design 15 The Variability of Culture Environment Relations 19 Culture Specific Environments 26 Designing for Culture 30 Implications for the Future 39 References 42 CHAPTER 2 CROSS CULTURAL RESEARCH METHODS STRATEGIES PROBLEMS APPLICATIONS RICHARD W **The Journal of Agricultural Economics Research** ,1987 The City in Cultural Context John Agnew, John Mercer, David Sopher, 2013-02-01 Routledge Library Editions The City reprints some of the most important works in urban studies published in the last century For further information on this collection please email info.research@routledge.co.uk *Agricultural Economics Research* ,1971 **Routledge Library Editions: Social & Cultural Geography** Various Authors, 2022-07-30 Re-issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also

examine the cross over of geography with other disciplines such as literature and history **The Power of Place (RLE Social & Cultural Geography)** John Agnew, James Duncan, 2014-01-10 Reflecting the revival of interest in a social theory that takes place and space seriously this book focuses on geographical place in the practice of social science and history There is significant interest among scholars from a range of disciplines in bringing together the geographical and sociological imaginations The geographical imagination is a concrete and descriptive one concerned with determining the nature of places and classifying them and the links between them The sociological imagination aspires to explanation of human activities in terms of abstract social processes The chapters in this book focus on both the intellectual histories of the concept of place and on its empirical uses They show that place is as important for understanding contemporary America as it is for 18th century Sri Lanka They also show how the concept can provide insight into old problems such as the nature of social life in Renaissance Florence and Venice The editors are leading exponents of the view of place as a concept that can mediate the geographical and sociological imaginations Journal of Agricultural Economics Research ,1949 **The Geography of South America** Thomas A.
