*Railway Age*, 1949 **The Tragedy at the Loomis Street Crossing** Chuck Spinner, 2012-05-02 The Tragedy at the Loomis Street Crossing After five years of intense research Author Chuck Spinner has written the definitive story of the Naperville Train Wreck of April 25 1946 He has uncovered the histories of the 45 victims of the tragedy interviewed two surviving eye witnesses of the event and talked with survivors and helpers at the scene His family lived just a block from the crossing where the accident occurred Spinner was born at St Charles Hospital in Aurora Illinois on October 22 1946 Thomas Chaney severely injured in the train wreck was released from this same hospital on December 18th 1946 Perhaps during his recovery Thomas may have viewed John and Louise Spinner's infant son in the nursery If so Chaney would have never imagined that he was viewing the person who 66 years later would write the story that he had just lived It came fast I watched it horrified The train came on bigger and bigger I saw a man climbing down from the engine cab and start down the ladder That's all I saw I turned and ran yelling warnings toward the front of my coach The next second it hit Raymond Jake Jaeger When the crash came I was thrown to the top of the car turned a somersault and came down A pile of people fell on me I kicked out a window and climbed out I think a woman behind me was killed Sol Greenbaum I didn't think I'd make it through the war I went through all that in the Pacific only to come home and have this happen We were in the rear car and

our seats faced forward I got up to put my coat in the overhead rack and looked back to see the other train coming Henry Faber It was worse than anything I ever saw in war George Whitney That was some wreck I wonder how many people who live in Naperville now even know the wreck happened Rosie Hodel Image Caption Chuck Spinner and his wife Patrice are pictured with their son Scott Scotts wife Ellen and their two grandchildren Caleb left and Joshua **The Pioneer Zephyr** R. **Burlington Northern Santa Fe Railway** Brian Solomon,2003     **Railroads Across North America** Claude Wiatrowski,2007-09-15 From the first steam powered locomotives of the early nineteenth century to the high speed commuter trains of today the American railroad has been a great engine powering the nation's growth and industry This book celebrates the glory and grandeur of that legacy with a lavish tour of the history of the American railroad and the culture surrounding it Generously illustrated with vintage photographs modern images maps timetables tickets brochures and all

manner of memorabilia this volume offers a fascinating look at the rail industry's beginnings and development as well as its place in American history. From the might of the major rail companies and their empires to the romance of rail travel, this is the full and fabulously colorful story of the industry that moved a nation and stirs our imaginations to this day. **American Steam Locomotives** William L. Withuhn, 2019-03-01. For nearly half of the nation's history, the steam locomotive was the outstanding symbol for progress and power. It was the literal engine of the Industrial Revolution and it played an instrumental role in putting the United States on the world stage. While the steam locomotive's basic principle of operation is simple, designers and engineers honed these concepts into 100 mph passenger trains and 600-ton behemoths capable of hauling mile-long freight at incredible speeds. *American Steam Locomotives* is a thorough and engaging history of the invention that captured public imagination like no other and the people who brought it to life. *Gresley's Silver Link* Tim Hillier-Graves, Ronald Hillier, 2023-03-23. Gresley's A4 Pacifics are arguably the most famous locomotives ever built, a status cemented by Mallard's record-breaking run on the 3rd July 38. And yet only a year later, the glamorous streaks seemed likely to be cast into obscurity by the coming of another world war. So for only four exhilarating years they were allowed to flourish as their creator had intended and in that time captured the imagination of railwaymen and public alike. With the help of previously unpublished material, the author analyses the complex evolution of the A4s, a project that began in 1911 when Gresley was appointed as Locomotive Superintendent of the Great Northern Railway. It is a story with many strands to consider: war, peace, and war again; engineering and art; politics and business; recession and social change; the growth of the media and consumerism; the struggle for professional reputations; and a growing, deeply damaging international rivalry. All these elements are captured in the story of the A4s in the heady days before conflict ended their brief golden age, and Gresley's life came to an end.
