It highlights the core characteristics of the integration of individual virtues and public morals such as benevolence, righteousness, propriety, wisdom, courtesy, leniency, faith, sensitivity, earnestness, kindness, goodness, virtue, and conduct and discusses the ethical requirements of loyalty, harmony, filial piety, fraternity, and bravery which are constantly gaining and losing with the changes of the times. This book focuses on the vitality of Chinese ethical innovation in the context of globalization and modernization, showing how it demonstrates its value in the complex process of dialogue with other civilizations in the world and interaction between China and foreign countries and how it contributes to the construction of a community with a shared future for mankind and the promotion of world peace and prosperity.

Since the reform and opening up of China in 1978, Western literary criticism has begun to flourish and gain in popularity within the country's academic literature community. These two volumes meticulously select and examine nine of the most influential keywords from Western literary theory while identifying the intricate historical sources of these terms and analyzing their relevance to other disciplines and ideas. The result shows how these words function as heterogeneous cultural contexts in the complexity of experience but also how they function within the context of Chinese culture as well as Chinese literature and criticism. In this volume, the editors focus on metaphor, the other ideology, and the body from the perspectives of etymology, documentation, meanings, and other core factors. Students of literature and languages, and especially Chinese literature, will benefit from this two-volume set. The Open Access version of this book is available at <http://www.taylorfrancis.com>.
