This volume provides fresh insights and management understanding of the changing role of policing against the backdrop of massive cuts in public expenditure experienced and the changing landscape of policing The challenges of funding training online crimes and cultural transformation are now felt globally The need to learn and adapt from suitable models of police service delivery have never been greater The book offers critical insights into the theory and practice of strategic and operational management of police services and the related professional and policy aspects One of the highlight of this volume is to bring together scholarship using experts academics practitioners and professionals in the field to each of the chosen topics The chapters are based in the practical experiences of the authors and are written in a way that is accessible and suitable for a range of audiences We are confident that this book will cater to a wider audience to inform policy and practice both in the UK and internationally Sir Peter Fahy QPM Chief Constable Greater Manchester Police Policing across the world is facing an increasing complexity of demand and public expectation creating new challenges for leadership and management The contributors to this work are among the leading thinkers in policing and present important new insights into both the past and the way forward It will be welcomed by all those convinced that radical new approaches are required across the public services Bill Skelly Deputy Chief Constable Devon and Cornwall Police UK At times it feels that the focus on leadership in the police service is all about what went wrong the negative influences of a tightly knit culture and the almost inevitable rise of the technocrat It is refreshing to read a book that seeks new insights into the positive influences of police leadership and offers the prospect of a more emotionally aware and spiritually rich approach as to how those insights may be practically employed for the benefit of all in the police family and the communities we serve Police Theory in America Robert C. Wadman,2009 measurement of effective policing is based on a quick response to crime that has already been committed the value of crime prevention has become an afterthought in America s police departments The middle chapters outline these issues and identify the strategies to improve police community relationships and adjust the measurements for effective policing The concluding chapters identify strategies designed to facilitate police department organizational change Using terms from the discipline of economics a micro strategy and a macro strategy are outlined A new theory of policing concludes the book The book is intended primarily as a textbook for criminal justice students but it will also prove useful to police departments police academies city managers and elected officials responsible for police administration and community safety

Mawby, 2013-04-15 This wide ranging text provides an overview of policing across different societies and considers the issues facing the US and British police in a wider international context The book is designed as a coherent introduction to the police
