scholars to reflect on contemporary efforts to take a different approach to photography and its histories What are the benefits and challenges of writing a consolidated global history of photography How do they compare with those of producing more circumscribed regional or thematic histories In what ways does the recent emphasis on geographic and national specificity encourage or exclude attention to other forms of difference such as race class gender and sexuality Do studies of other photographies ultimately necessitate the adoption of nontraditional methodologies or are there contexts in which such differentiation can be intellectually unproductive and politically suspect The contributors to the volume explore these and other questions through historical case studies interpretive surveys of recent historiography criticism and museum practices and creative proposals to rethink the connections between photography history and difference A thought provoking collection of essays that represents new ways of thinking about photography and its histories It will appeal to a broad readership among those interested in art history visual culture media studies and social history

The Pioneering Photographic Work of Hercule Florence Boris Kossoy, 2017-12-14 This book delivers an in depth analysis of Hercule Florence who is virtually unknown despite being among the world's photographic pioneers Based on the texts of various manuscripts letters diaries notes and advertisements this book answers numerous questions surrounding Florence's work including the materials methods and techniques he employed and why it took more than a century for his discovery to come to light Kossoy's groundbreaking research establishes Florence's use of photographie to describe the product of his experiments half a decade before Sir John Herschel recommended photography to Henry Fox Talbot This book aims to change the fact that despite its cultural and historical

importance Florence's photographic breakthrough remains largely unknown in the English speaking world *Pionieri Della Fotografia, 1840-1900* Carlo Bertelli, 1988 Public History in Ireland Leonie Hannan, Olwen Purdue, 2024-06-28 Through a collection of essays that reflect the complexity of the island's historical past as it operates today Public History in Ireland delivers a scholarly yet accessible introduction to contemporary topics and debates in Irish public history Despite the reputation that Ireland both north and south has gained as a place of contestation this is the first book length study to tackle its diverse and often difficult public histories Public History in Ireland offers examples drawn not only from museums heritage and collections prime mediators of public historical interpretation but also from the work of artists and academics It considers the silences in Ireland's history telling including those of the recent conflict in Northern Ireland and of the traumatic public discoveries and re evaluations of the island's institutions of social control The book's key message is that history is active making itself felt in ongoing debates about heritage identity nationhood post conflict society and reparative justice It shows that Irish public history is freighted and often fraught with jeopardy but as such it is rich with insight that has relevance far beyond this island's shores This book is useful for students scholars and practitioners working in the fields of public history and the history of Ireland **Craig's Daguerreian Registry: Pioneers and progress, MacDonald to Zuky** John S. Craig, 1994 Contains a cross indexed reference to the practitioners of the art of daguerrotype in the U S from 1839 1860 The Gender of Photography Nicole Hudgins, 2020-09-02 It would be unthinkable now to omit early female pioneers from any survey of photography's history in the Western world Yet for many years the gendered language of American British and French photographic literature made it appear that women's interactions with early photography did not count as significant contributions Using French and English photo journals cartoons art criticism novels and early career guides aimed at women this volume will show why and how early photographic clubs journals exhibitions and studios insisted on masculine values and authority and how Victorian women engaged with photography despite that dominant trend Focusing on the period before 1890 when women were yet to develop the self assurance that would lead to broader recognition of the value of their work this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway both as amateurs and professionals Challenging the marginalization of women's work in the early history of photography this is essential reading for students and scholars of photography history and gender studies **The World of Francis Cooper: Nineteenth-Century Pennsylvania Photographer**, 1999 **Flashes of Brilliance** Anika Burgess, 2025-07-08 The story of the wildest experiments in early photography and the wild people who undertook them Today it's routine to take photos from an airplane window use a camera underwater watch a movie or view an X ray But the photographic innovations more than a century ago that made such things possible were experimental revelatory and sometimes dangerous and many of the innovators entrepreneurs and inventors behind them were memorable eccentrics In Flashes of Brilliance writer and photo editor Anika Burgess engagingly blends art science and social history to

reveal the most dramatic developments in photography from its birth in the 1830s to the early twentieth century Writing with verve and an eye for compelling details Burgess explores how photographers uncovered new vistas including catacombs cities at night the depths of the ocean and the surface of the moon She describes how photographers captured the world as never seen before showing for the first time the bones of humans the motion of animals the cells of plants and the structure of snowflakes She takes us on a tour of astonishing innovations including botanist Anna Atkins and her extraordinary blue hued cyanotypes and the world's first photobook Eadweard Muybridge and his famous experiments in capturing motion and their long legacy large format photography and photographs so small as to be invisible to the naked eye and aerial photography using balloons kites pigeons and rockets Burgess also delves into the early connections between photography and society that are still with us today how photo manipulation the art of fake images was an issue right from the start how the police used the telephoto lens to surveil suffragists and how leading Black figures like Sojourner Truth and Frederick Douglass adapted self portraits to assert their identity and autonomy Richly illustrated and filled with fascinating tales *Flashes of Brilliance* shows how the rise of a new art form transformed culture and our view of the world *Die Pioniere der Photographie, 1840-1900* Städtische Galerie Erlangen, 1989 The collection proposes a history of photography as both a testimony to the work of photography's great masters and as a history which allows for the exploration of the medium's possibilities In other words we are witnessing the birth of photography's rhetoric the vocabulary of which is little by little breaking away from that of painting **Bibliographic Guide to Art and Architecture** New York Public Library. Art and Architecture Division, 1975
