Piranesi As Architect And Designer:

Piranesi as Architect and Designer John Wilton-Ely, 1993-01-01 **Piranesi as Designer** John

Wilton-Ely, Cooper-Hewitt Museum, 2007 Renowned as one of the finest printmakers of the eighteenth century Giovanni Battista Piranesi is best known for his etched views of Rome and its antiquities as well as for his highly influential suite of drawings entitled *Carceri* or *Imaginary Prisons* Trained as an architect Piranesi revolutionized architecture and design through his combination of decorative elements and ornamental motifs from the Egyptian Etruscan Greek and Roman styles yet his work as the designer of interiors and furnishings has been largely uncelebrated Published in conjunction with a major exhibition at the Smithsonian's Cooper Hewitt National Design Museum *Piranesi as Designer* explores the far reaching impact of Piranesi's modernist style on three centuries of architecture and design 144 pages nearly 200 integrated color photographs **John Wilton-Ely. Piranesi as Architect and Designer. New York: Pierpont Morgan Library, 1993.**

[Review]. James Yorke, 1994 *Piranesi as Designer*, 2007 *The Built Surface: v. 1: Architecture and the Visual Arts from Antiquity to the Enlightenment* Christy Anderson, Karen Koehler, 2017-11-22 This title was first published in 2002 Since antiquity through to the present architecture and the pictorial arts paintings photography graphic arts have not been rigidly separated but interrelated the one informing the other and establishing patterns of creation and reception In the Classical tradition the education of the architect and artist has always stressed this relationship between the arts although modern scholarship has too often treated them as separate disciplines These volumes explore the history of this exchange between the arts as it emerged from classical theory into artistic and architectural practice Issues of visual representation perspective allegory site specificity ornamentation popular culture memorials urban and utopian planning and the role of treatises manifestos and other theoretical writings are addressed as well as the critical reaction to these products and practices This title represents a variety of methods approaches and dialectical interpretations cases where architecture informs the themes and physical space of pictures or pictorial concerns inform the design and construction of the built environment The exchanges between architecture and pictures explored by these authors are found to be in all cases ideologically potent and therefore significantly expressive of their respective social political and intellectual histories **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Shu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of *The Oxford Dictionary of Architecture* has been extensively revised and expanded with over 900 new entries including hundreds of definitions of

garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader

The Architecture of Modern Italy Terry Kirk, 2005-06-02 The history of design in Italy is explored in this authoritative and comprehensive work Design periods include the era of Piranesi the eclecticism of the 19th century the futurism of the early 20th century the dogmatic fascism of the interwar period the designs of Pier Luigi Nervi and on to the present day

The Arts of Piranesi, 2012

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

[Architecture and ekphrasis](#) Dana Arnold, 2020-10-20 Architecture and ekphrasis examines how eighteenth century prints and drawings of

antique architecture operated as representations of thought Using original archival material it considers the idea of the past in the period specifically how it was discovered and described and investigates how space and time inform visual ekphrasis or descriptions of architecture The idea of embodiment is used to explore the various methods of describing architecture including graphic techniques measurement and perspective all of which demonstrate choices about different modes of ekphrasis This well illustrated accessibly written study will be of interest to academics and students working in a broad range of subject areas It will also be an essential teaching tool for increasingly popular cross disciplinary courses

Historical Dictionary of Neoclassical Art and Architecture Allison Lee Palmer,2020-05-15 Neoclassicism refers to the revival of classical art and architecture beginning in Europe in the 1750s until around 1830 with late neoclassicism lingering through the 1870s It is a highly complex movement that brought together seemingly disparate issues into a new and culturally rich era one that was unified under a broad interest in classical antiquity The movement was born in Italy and France and spread across Europe to Russia and the United States It was motivated by a desire to use ideas from antiquity to help address modern social economic and political issues in Europe and neoclassicism came to be viewed as a style and philosophy that offered a sense of purpose and dignity to art following the new enlightened thinking This second edition of Historical Dictionary of Neoclassical Art and Architecture contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries cover late Baroque and Rococo tendencies found in the early 18th century and span the century to include artists who moved from neoclassicism to early romanticism This book is an excellent resource for students researchers and anyone wanting to know more about neoclassical art and architecture

Architecture Post Mortem Donald Kunze,David Bertolini,Simone Brott,2016-04-15 Architecture Post Mortem surveys architecture s encounter with death decline and ruination following late capitalism As the world moves closer to an economic abyss that many perceive to be the death of capital contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself Post mortem is that historical moment wherein architecture s symbolic contract with capital is put on stage naked to all Architecture is not

irrelevant to fiscal and political contagion as is commonly believed it is the victim and penetrating analytical agent of the current crisis As the very apparatus for modernity s guilt and unfulfilled drives modernity s debt architecture is that ideological element that functions as a master signifier of its own destruction ordering all other signifiers and modes of signification beneath it It is under these conditions that architecture theory has retreated to an Alamo of history a final desert outpost where history has been asked to transcend itself For architecture s hoped for utopia always involves an apocalypse This timely collection of essays reformulates architecture s relation to modernity via the operational death drive architecture is but a passage between life and death This collection includes essays by Kazi K Ashraf David Bertolini Simone Brott Peggy Deamer Didem Ekici Paul Emmons Donald Kunze Todd McGowan Gevork Hartoonian Nadir Lahiji Erika Naginski and Dennis Maher

Architecture and Fire Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London s Grenfell Tower in 2017 Zografos concludes with thoughts on Freud s drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines

Interpreting Urban Spaces in Italian Cultures Andrea Scapolo, Angela Porcarelli, 2025-10-01 Made up of both material and symbolic elements the urban space is always dynamic and transitional it brings together or separates the past and the present the public and the private the center and the periphery The present volume focuses on the interaction between the social processes and spatial forms that shape the identity of Italian cities Using both canonical and less well known texts along with cultural artifacts the essays in the volume deprovincialize the Italian city interpreting the material and symbolic practices that have made it into a unique entity whose enduring influence extends far outside Italy

The Built Surface: Architecture and the pictorial arts from antiquity to the enlightenment Christy Anderson, Karen Koehler, 2002 The festivals of the four months caturm sa stand apart

from other festive occasions in Kathmandu Nepal in their overriding concern with death These festivals are sacrificial feasts dealing with the riddle of life and death in the Hindu Buddhist context of South Asia Caturmasa festivals are collective supralocal affairs crossing the border between the upper and the lower part of the town they involve the whole town of Kathmandu and the king of Nepal who is both sacrificer and victim The two main themes of the celebrations of death are sacrifice and kingship
