Place For Us How To Make Society Civil:

A Place for Us Benjamin R. Barber, 2004-02 In our crowded noisy world too many people too much crime too many wars not enough time it seems almost impossible to locate and preserve the common ground where a civil society might flourish Whatever happened to the civic virtue and community life that nourished true democracy In this provocative hard hitting book political scientist Benjamin Barber tackles these questions head on and in answering them retrieves the ideals of civil society from the nostalgists who want to re create old fashioned and discriminatory small communities and from the free marketeers who associate it with unfettered commercial activity Commentators have been making a fashion of civil society but they tend to mean many different things by the phrase this bracingly clear book shows how diverse the various notions are and how best to think about them Barber proposes practical strategies for making civil society real for civilizing public discourse and promoting civic debate and for affirming values beyond those of work and leisure commerce and bureaucracy

Shapiro, 2013-09-13 The Politics of Moralizing issues a stern warning about the risks of speaking writing and thinking in a manner too confident about one s own judgments and asks Can a clear line be drawn between dogmatism and simple certainty and indignation Bennett and Shapiro enter the debate by questioning what has become a popular even pervasive cultural narrative told by both the left and the right the story of the West s moral decline degeneration or confusion Contributors explore the dynamics and dilemmas of moralizing by advocates of patriotism environmental protection and women s rights while arguing that the current discourse gives free license to self aggrandizement cruelty vengeance and punitiveness and a generalized resistance to or abjection of diversity **Varieties of Progressivism in America** Peter Berkowitz, 2013-09-01 Varieties of Progressivism in America

Strong Democracy in Crisis Trevor Norris, 2016-05-12 This is a robust and relevant collection from a truly distinguished group of political theorists actively rethinking the promise and perils of democracy The book is coherent in its focus on a common theme and aim to advance and refine the political project of promoting democratic theory and practice While the contributors are admirers of the promotion of various models of democracy they also express distinct approaches and concerns Each builds on and expands the central theme of democracy and ultimately contends with potential limits of current configurations of democratic life While to some extent they share common concerns they express considerable dissent and fruitful opposition that deepens and advances the debate Contributors explore democracy from different perspectives law and constitutionalism globalization and development public life and the arts pluralism democracy and education and democratic listening and democratic participation The contributions point towards new ways of living and thinking politically new directions for contending with some of the more significant and seemingly intractable political problems challenging conventional presuppositions about democracy by expanding the boundaries of what kinds of democracy may be possible The book critiques liberal notions of democracy that forefront rational autonomy and a citizenship characterized by narrow self interest and critique na ve claims that any infringement on the rights of the autonomous individual must invariably lead to authoritarianism and totalitarianism Instead contributors suggest that the abandonment of the res publica in pursuit of private interests may well lead to arid politics or authoritarianism Citizens are called upon to be more than just voters but rather define themselves by participation in a community beyond their self interest in fact arguing like Aristotle Rousseau Jefferson and Arendt that we are only human when we participate in something beyond ourselves that we forge and preserve our political community by our commitment to and participation in robust debate and meaningful political action Contributors are not only revolutionary scholars that challenge problematic streams of democratic theory and traditions but are deeply involved in shaping the character and

constitution of the American body politic and promoting debates about community and citizenship and justice around the world

The Politics and Civics of National Service Melissa Bass, 2013-01-03 In 1933 President Franklin D Roosevelt created America's first domestic national service program the Civilian Conservation Corps CCC As part of this program the largest and most highly esteemed of its kind nearly three million unemployed men worked to rehabilitate protect and build the nation's natural resources It demonstrated what citizens and government could accomplish together Yet despite its success the CCC was short lived While more controversial programs such as President Johnson's Volunteers in Service to America VISTA and President Clinton's AmeriCorps survived why did CCC die And why given the hard won continuation and expansion of AmeriCorps is national service an option for fewer Americans today than at its start nearly eighty years ago In The Politics and Civics of National Service Melissa Bass focuses on the history current relevance and impact of domestic civilian national service She explains why such service has yet to be deeply institutionalized in the United States while military and higher education have solidified their roles as American institutions civilian national service is still not recognized as a long term policy option Bass argues that only by examining these programs over time can we understand national service's successes and limitations both in terms of its political support and its civics lessons The Politics and Civics of National Service furthers our understanding of American political development by comparing programs founded during three distinct political eras the New Deal the Great Society and the early Clinton years and tracing them over time To a remarkable extent the CCC VISTA and AmeriCorps reflect the policymaking ethos and political controversies of their times illuminating principles that hold well beyond the field of national service By emphasizing these programs effects on citizenship and civic engagement The Politics and Civics of National Service
