Fuguitt, David L. Brown, Calvin L. Beale, 1989-11-21 Important differences persist between rural and urban America despite profound economic changes and the notorious homogenizing influence of the media As Glenn V Fuguitt David L Brown and Calvin L Beale show in *Rural and Small Town America* the

much heralded disappearance of small town life has not come to pass and the nonmetropolitan population still constitutes a significant dimension of our nation's social structure. Based on census and other recent survey data, this impressive study provides a detailed and comparative picture of rural America. The authors find that size of place is a critical demographic factor affecting population composition: rural populations are older and more predominantly male than urban populations; the distribution of poverty: urban poverty tends to be concentrated in neighborhoods, rural poverty may extend over large blocks of counties; and employment opportunities: job quality and income are lower in rural areas, though rural occupational patterns are converging with those of urban areas. In general, rural and small town America still lags behind urban America on many indicators of social well-being. Pointing out that rural life is no longer synonymous with farming, the authors explore variations among nonmetropolitan populations. They also trace the impact of major national trends: the nonmetropolitan growth spurt of the 1970s and its current reversal; for example, or changing fertility rates on rural life and on the relationship between metropolitan and nonmetropolitan communities. By describing the special characteristics and needs of rural populations as well as the features they share with urban America, this book clearly demonstrates that a more accurate picture of nonmetropolitan life is essential to understanding the larger dynamics of our society.

Planning Urban Places Mary Ganis, 2015-06-19 Urban change is often difficult because we are dealing with people's elusive notions of place and perception time and change Urban design and planning in a changing urban context so that it remains relevant for people is elusive because the idea of place is embedded in memory and identity but whose memory and whose identity This book seeks to understand the urban change dynamic so that the planning of urban places aligns with the dynamic of people's perception of place *Planning Urban Places* examines the premise that building cities is a concrete business surrounded by a shifting context It discusses the notion of urban design and placemaking from the perspective of place perception and cognitive psychology place philosophy and human geography It also considers network theory to help illustrate the self organising paradigm of small world network theory for planning urban places

The Philosophy of the Christian Religion Andrew Martin Fairbairn, 1909

The Philosophy of the Christian Religion A. M. Fairbairn, 2017-03-09 This book may be described as an attempt to do two things first to explain religion through nature and man and secondly to construe Christianity through religion The author conceives religion to be a joint product of the mind within man and the nature around him the mind being the source of the ideas which constitute its soul the nature around determining the usages and customs which build up its body He does not think therefore that any one of its special forms can be explained without the local nature which begot and shaped it or that its general being can be resolved and construed without the reason or thought which is common to the race He sees in religion the greatest of all man's unconscious creations and the most potent of the means which the past while it was still a living present formed for the making of the man and the times that were yet to be
