## **Places Of The Soul Architecture And Environmental Design As Healing Art:**

**Places of the Soul** Christopher Day, 2007-07-11 Revised to incorporate the changes in opinions and attitudes since its first publication the second edition of *Places of the Soul* has brought Christopher Day's classic text into the 21st century This new edition of the seminal text reminds us that true sustainable design does not simply mean energy efficient building Sustainable buildings must provide for the soul For Christopher Day architecture is not just about a building's appearance but how the building is experienced *Places of the Soul* presents buildings as environment intrinsic to their surroundings and offers design principles that will open the eyes of the architecture student and professional alike presenting ideas quite different to the orthodoxy of modern architectural education Christopher Day's experience as an architect self builder professor and sculptor have all added to the development of his ideas that encompass issues of economic and social sustainability commercial pressures and consensus design This book presents these ideas and outlines universal principles that will be of interest and value to architects builders planners and developers alike

**Places of the Soul** Christopher Day, 2017-09-19 For Christopher Day architecture isn't just about the appearance of buildings but how they're experienced as places to be in Occupants experience can differ radically from designers intentions as their concerns and thinking differ Additionally multi sensory ambience spatial sequential experience and embodied spirit resonate in the human soul Sustainable design means much more than energy efficiency if sustainable buildings don't also nourish the soul occupant building interaction will lack care and eco technologies won't be used efficiently This major revision of his classic text builds on more than forty years of experience ecological design across a range of climates cultures and budgets and 25 years hands on building Treating buildings as environments intrinsic to their surroundings the book explores consensus design economic and social sustainability and how a listening approach can grow architectural ideas organically from the interacting sometimes conflicting requirements of place people and situation This third edition comprehensively revised to incorporate new knowledge and address new issues continues Day's departure from orthodox contemporary architecture offering eye opening insights and practical design applications These principles and guidelines will be of interest and value to architects builders planners developers and homeowners alike Reviews of the first edition one of the seminal architecture books of recent times Professor Tom Wooley Architects Journal The bible of many architects and those interested in architecture Centre for Alternative Technology an inspiration to all those who care about the influence of the environment on Man's health and well being Barrie May The Scientific and Medical Network At last an architect has written a sensitive and caring book on the effects of buildings on all our lives Here's Health This gentle book offers a route out of the nightmare of so much callous modern construction I was inspired Colin Amery The Financial Times

**Thinking Architecturally** Paul Righini, 2000 Through a critical study of issues such as order form space style place making aesthetics and architectural theory students are encouraged to think about their own creative ideas

The use of analytical reasoning lateral thinking drawing and modelling is emphasised Ecohouse: A Design Guide Christopher Day, Susan Roaf, 2007-08-15 Ecohouse is an exciting and timely text that tells you how to design low energy environmentally friendly buildings today It also provides the foundations for building design in a warming world and stepping stones towards the zero carbon emission buildings of tomorrow Sue Roaf is famed for her approach to design and her awareness of energy efficiency Here she reveals the concepts structures and techniques that lie behind the realization of her ideals By using her own house as a case study Roaf guides the reader through the ideas for energy efficient design or eco design This guide to the ecohouse also explores 21 case studies from around the world from Norway and Sweden to India and Japan Argentina and Mexico Chapters by Christopher Day Katherine Bohn and Andre Viljoen on ecological building materials and methods and a contribution by Robert and Brenda Vale all experts in this field Ecohouse has a regularly updated companion web site providing further information on all issues relating to Ecohouse and eco design Log on to [www.bh.com companions ecohouse](http://www.bh.com/companions/ecohouse) for a direct link Building for Life Stephen R. Kellert, 2012-09-26 Sustainable design has made great strides in recent years unfortunately it still falls short of fully integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design award winning author Stephen R Kellert proposes a new architectural model of sustainability In Building For Life Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built environment Ecohouse Sue Roaf, 2014-09-19 Sue Roaf is famed for her approach to design and her awareness of energy efficiency Here she reveals the concepts structures and techniques that lie behind the realization of her ideals By using her own house as a case study Roaf guides the reader through the ideas for energy efficient design or eco design Now in its fourth edition the bestselling Ecohouse continues to be both a technical guide and an inspiration for thousands of architects designers and eco builders all over the world Ecohouse provides design information about the latest low impact materials and technologies showcasing the newest and best green solutions Revised and updated this edition also includes new case studies inspiring readers with more real life examples of how to make an ecohouse work

**Regenerative Urban Development, Climate Change and the Common Good** Beth Caniglia, Beatrice Frank, John L.

Knott, Jr., Kenneth S. Sagendorf, Eugene A. Wilkerson, 2019-08-06 This volume focuses on the theory and practice of the regenerative development paradigm that is rapidly displacing sustainability as the most fertile ground for climate change adaptation research This book brings together key thinkers in this field to develop a meaningful synthesis between the existing practice of regenerative development and the input of scholars in the social sciences It begins by providing an expert introduction to the history principles and practices of regenerative development before going on to present a thorough theoretical examination by known theorists from disciplines including sociology geography and ethics A section on regenerative development practices illustrates the need to significantly advance our understanding of how urbanization climate change and inequality interact at every scale of development work Finally the book ends with a serious consideration of the ways in which integrated systems thinking in higher education could result in a curriculum for the next generation of regenerative development professionals Regenerative Urban Development Climate Change and the Common Good will be of great interest to students scholars and practitioners of regenerative development climate change urban planning and public policy
