Plague Upon Humanity The Hidden History Of Japans Biological Warfare Program:

A Plague upon Humanity Daniel Barenblatt, 2005-01-04 From 1932 to 1945 in a headlong quest to develop germ warfare capability for the military of Imperial Japan hundreds of Japanese doctors nurses and research scientists willingly participated in what was referred to at the time as the secret of secrets horrifying experiments conducted on live human beings in this case innocent Chinese men women and children This was the work of an elite group known as Unit 731 led by Japan's answer to Joseph Mengele Dr Shiro Ishii Under their initiative thousands of individuals were held captive and infected with virulent strains of anthrax plague cholera and other epidemic and viral diseases Soon entire Chinese villages were being hit with biological bombs Even American POWs were targeted All told more than 250 000 people were infected and the vast majority died Yet after the war US occupation forces under General Douglas MacArthur struck a deal with these doctors that shielded them from accountability Provocative alarming and utterly compelling **A Plague Upon Humanity** draws on important original research to expose one of the most shameful chapters in human history

A Plague upon Humanity Daniel Barenblatt, 2004-01-06 In wartime Japan's bid for conquest humanity suffered through one of its darkest hours as a hidden genocide took the lives of hundreds of thousands of innocent people Cloaked in secrecy and protected under the banner of scientific study the best and brightest of Japan's medical establishment volunteered for a major initiative in support of the military that involved the systematic murder of Chinese civilians With the help of the United States government they were allowed to get away with it Based on important original research this book reveals as never before the full extent of this crime in a story that is as compelling as it is terrifying Beginning in 1931 the military of Imperial Japan came up with a new strategy to further the nation's drive for expansion germ warfare But they needed help to figure out how to do it So they recruited thousands of doctors and research scientists all of whom accepted willingly in order to develop a massive program of biological warfare that was referred to as the secret of secrets This covert operation consisted of horrifying human experiments and germ weapon attacks against people whose lives were seen as expendable including Chinese men women and children living in Manchuria and other areas of Japanese occupation Even American POWs were targeted At the forefront of this disturbing enterprise was an elite organization known as Unit 731 led by Japan's answer to Joseph Mengele Dr Shiro Ishii Under Ishii's orders captives were subjected to deeds that strain the boundaries of imagination Men and women were frozen alive to study the effects of frostbite Others were dissected without anesthesia Tied to posts victims were infected with virulent strains of anthrax and other diseases Entire cities were aerially sprayed with fleas carrying bubonic plague All told more than five hundred thousand people died Yet after the war U S occupation forces under General Douglas MacArthur struck a deal with the doctors of Unit 731 that shielded them from accountability for their atrocities In this meticulously documented work Daniel Barenblatt has drawn upon startling new evidence of Japan's germ warfare program including firsthand accounts from both perpetrators and survivors Authoritative alarming and gripping from start to finish **A Plague**

upon Humanity is a powerful investigation that exposes one of the most shameful chapters in human history **Japanese War Crimes during World War II** Frank Jacob,2018-06-08 A challenging examination of Japanese war crimes during World War II offers a fresh perspective on the Pacific War and a better understanding of reasons for the wartime use of extreme mass violence The 1937 Rape of Nanjing has become a symbol of Japanese violence during the Second World War but it was not the only event during which the Japanese used extreme force This thought provoking book analyzes Japan s actions during the war without blaming Japan helping readers understand what led to those eruptions In fact the author specifically disputes the idea that the forms of extreme violence used in the Pacific War were particularly Japanese The volume starts by examining the Rape of Nanjing then goes on to address Japan s acts of individual and collective violence throughout the conflict Unlike other works on the subject it combines historical sociological and psychological perspectives on violence with a specific study of the Japanese army seeking to define the reasons for the use of extreme violence in each particular case Both a historical survey and an explanation of Japanese warfare the book scrutinizes incidents of violence perpetrated by the Japanese vis vis theories that explore the use of violence as part of human nature In doing so it provides far reaching insights into the use of collective violence and torture in war overall as well as motivations for committing atrocities Finally the author discusses current political implications stemming from Japan s continued refusal to acknowledge its war time actions as war crimes The Emergence of a Scientific Culture Stephen Gaukroger,2008-10-23 Why did science emerge in the West and how did scientific values come to be regarded as the yardstick for all other forms of knowledge Stephen Gaukroger shows just how bitterly the cognitive and cultural standing of science was contested in its early development Rejecting the traditional picture of secularization he argues that science in the seventeenth century emerged not in opposition to religion but rather was in many respects driven by it Moreover science did not present a unified picture of nature but was an unstable field of different often locally successful but just as often incompatible programmes To complicate matters much depended on attempts to reshape the persona of the natural philosopher and distinctive new notions of objectivity and impartiality were imported into natural philosophy changing its character radically by redefining the qualities of its practitioners The West s sense of itself its relation to its past and its sense of its future have been profoundly altered since the seventeenth century as cognitive values generally have gradually come to be shaped around scientific ones Science has not merely brought a new set of such values to the task of understanding the world and our place in it but rather has completely transformed the task redefining the goals of enquiry This distinctive feature of the development of a scientific culture in the West marks it out from other scientifically productive cultures In The Emergence of a Scientific Culture Stephen Gaukroger offers a detailed and comprehensive account of the formative stages of this development and one which challenges the received wisdom that science was seen to be self evidently the correct path to knowledge and that the benefits of science were immediately obvious to the disinterested observer **Bioterrorism & Biological Warfare** Paul Chrystal,2023-09-30 A timely

examination of the use of disease and germs as a weapon of mass destruction WMD and the threat bioterrorism poses in an increasingly unpredictable and volatile future This important disturbing and timely book focuses on on the use of disease and germs as a weapon of mass destruction WMD and the threat bioterrorism poses in an increasingly unpredictable and volatile future for the world For context it traces developments from the earliest primitive but effective days of infectious rams poison tipped arrows and plague infected corpses used as toxic disease spreading projectiles to the twenty first century industrial scale weaponization of biomedicine Paul Chrystal shows how biological weapons and acts of bioterrorism are especially effective at instilling terror panic death famine and economic ruin on a large scale shredding public confidence in governments and civilization itself For the disaffected lethal biological agents are comparatively easy to manufacture and obtain and they have the benefit of being almost invisible and easy and quick to administer in lethal quantities through a variety of discreet delivery systems Just what the terrorist wants We explore the sinister connection between the industrial scale proliferation of biological weaponry by state actors and the greater opportunities these growing bio arsenals give to the increasingly scientific minded and determined terrorist to manufacture his or her weapon of choice taking advantage also of the state of the art sophisticated delivery systems The epilogue analyzes the concerted but groundless 2022 2023 disinformation campaign conducted by Russia with support from China relating to the claim that public health facilities in Ukraine are secret U S funded biolabs purportedly developing biological weapons *The Facade: Special Edition , Evil Men* James Dawes,2013-05-06 A searching meditation on our all too human capacity for inhumanity Evil Men confronts atrocity head on how it looks and feels what motivates it how it can be stopped James Dawes s unflinchingly honest account drawing on firsthand interviews is not just about the things Japanese war criminals did but about what it means to befriend them *Getting Under Our Skin* Lisa T. Sarasohn,2021-09-21 Vermin are not only pestering they shape the way people look at each other and are a way that some people get to feel superior to others **Nightmare Japan** Jay McRoy,2008-01-01 Over the last two decades Japanese filmmakers have produced some of the most important and innovative works of cinematic horror At once visually arresting philosophically complex and politically charged films by directors like Tsukamoto Shinya Tetsuo The Iron Man 1988 and Tetsuo II Body Hammer 1992 Sato Hisayasu Muscle 1988 and Naked Blood 1995 Kurosawa Kiyoshi Cure 1997 S ance 2000 and Ka ro 2001 Nakata Hideo Ringu 1998 Ringu II 1999 and Dark Water 2002 and Miike Takashi Audition 1999 and Ichi the Killer 2001 continually revisit and redefine the horror genre in both its Japanese and global contexts In the process these and other directors of contemporary Japanese horror film consistently contribute exciting and important new visions from postmodern reworkings of traditional avenging spirit narratives to groundbreaking works of cinematic terror that position depictions of radical or monstrous alterity hybridity as metaphors for larger socio political concerns including shifting gender roles reconsiderations of the importance of the extended family as a social institution and reconceptualisations of the very notion of cultural and national boundaries **Technology, Crime and**

Justice Michael McGuire, 2012-06-14 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole Technology Crime and Justice analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does technology itself serve as a regulatory force both in crime control and social control more widely Technology Crime and Justice considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies

Usamriid's Medical Management of Biological Casualties Handbook Army Medical Research Institute for Infectious Diseases (U S), Zygmunt F. Dembek, 2016-06-09 Supplies basic summary and treatment information quickly for the health care provider on the front lines Provides concise supplemental reading material to assist in education of biological casualty management Edge indexed

Genocide Perspectives IV Colin Tatz, 2012-01-01 Genocide isn't past tense and the Nazi and Bosnian eras are not yet closed The demonising of people as unworthy and expendable is ever present and the consequences are all too evident in the daily news These fourteen essays by Australian scholars confront the issues the need for a measuring scale that encompasses differences and similarities between seemingly divergent cases of the crime the complicity of bureaucracies the healing professions and the churches in this crime of crimes the quest for historical justice for genocide victims generally following the Nuremberg Trials the fate of children in the Nazi and postwar eras the worthiness of Armenians Jews and Romani people in twentieth century Europe and the imperative to tackle early warning signs of an incipient genocide Colin Tatz is a founding director of the Australian Institute for Holocaust and Genocide Studies visiting fellow in Politics and International Relations at the Australian National University and honorary visiting fellow at the Australian Institute of Aboriginal and Torres Strait Islander Studies He teaches and publishes in comparative race politics youth suicide migration studies and sports history

Museums for Peace Joyce Apsel, Clive Barrett, Roy

Tamashiro,2023-12-22 *Museums for Peace In Search of History Memory and Change* highlights the inspiring as well as conflicting representations and purposes of diverse museums for peace around the world Coming from various cultural and professional backgrounds the authors explore what are museums for peace and what do they mean Some chapters introduce alternative histories of peace conflict and memorialization This innovative collection examines grassroots museums military sexual slavery historical memory in East Asia and cultural heritage in the Africanized peace museum movement The chapters discuss differing representations of Gandhi technology of war and opposition to it and structural violence such as racial terror and imperialism Investigating how institutions interact with political and cultural forces the volume demonstrates that some museums reinforce hegemonic narratives while others resist authoritative tropes to reveal silenced histories including peace histories *Museums for Peace* will appeal to academics and students in museum studies heritage studies peace studies memory studies social justice and human rights Those working in cultural studies and trauma studies will also find this volume valuable The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Understanding Biological Emergencies Paula Stamps Duston,2024-11-05 This book investigates the links between the main sources of biological emergencies and presents a comprehensive policy framework that seeks to achieve the ultimate goal of biological security The work offers a new interdisciplinary approach to analyse the linkages between the three main sources of biological emergencies intentional attacks natural zoonotic transmission and lab accidents In doing so the text describes the history of using nature to create a weapon focusing on dispersal methods The most important Select Agents for monitoring are described with a special focus on anthrax and smallpox The case studies presented include the use of the Biological Weapons Convention BWC in Iraq and the 2001 anthrax attack in the US The policies that created the emergency preparedness system are analysed and the current system is described in terms of their effectiveness in responding to the COVID 19 pandemic The book concludes with some ideas and specific suggestions for moving from response to risk reduction and prevention This book will be of much interest to students of biosecurity studies public health public policy political science and international relations and to professionals working in the fields of public health public safety medicine nursing and first responders as well as military personnel

Poisoner in Chief Stephen Kinzer,2019-09-10 The bestselling author of *All the Shah's Men* and *The Brothers* tells the astonishing story of the man who oversaw the CIA's secret drug and mind control experiments of the 1950s and 60s The visionary chemist Sidney Gottlieb was the CIA's master magician and gentlehearted torturer the agency's poisoner in chief As head of the MK ULTRA mind control project he directed brutal experiments at secret prisons on three continents He made pills powders and potions that could kill or maim without a trace including some intended for Fidel Castro and other foreign leaders He paid prostitutes to lure clients to CIA run bordellos where they were secretly dosed with mind altering drugs His experiments spread LSD across the United States making him a

hidden godfather of the 1960s counterculture For years he was the chief supplier of spy tools used by CIA officers around the world Stephen Kinzer author of groundbreaking books about U S clandestine operations draws on new documentary research and original interviews to bring to life one of the most powerful unknown Americans of the twentieth century Gottlieb s reckless experiments on expendable human subjects destroyed many lives yet he considered himself deeply spiritual He lived in a remote cabin without running water meditated and rose before dawn to milk his goats During his twenty two years at the CIA Gottlieb worked in the deepest secrecy Only since his death has it become possible to piece together his astonishing career at the intersection of extreme science and covert action Poisoner in Chief reveals him as a clandestine conjurer on an epic scale

Apocalypse Then Mike Bogue,2017-09-14 The United States the only country to have dropped the bomb and Japan the only one to have suffered its devastation understandably portray the nuclear threat differently on film American science fiction movies of the 1950s and 1960s generally proclaim that it is possible to put the nuclear genie back in the bottle Japanese films of the same period assert that once freed the nuclear genie can never again be imprisoned This book examines genre films from the two countries released between 1951 and 1967 including Godzilla 1954 The Mysterians 1957 The Incredible Shrinking Man 1957 On the Beach 1959 The Last War 1961 and Dr Strangelove 1964 to show the view from both sides of the Pacific

The Routledge History of the Second World War Paul R. Bartrop,2021-11-08 The Routledge History of the Second World War sums up the latest trends in the scholarship of that conflict covering a range of major themes and issues The book delivers a thematic analysis of the many ways in which study of the Second World War can take place considering international transnational and global approaches and serves as a major jumping off point for further research into the specific fields covered by each of the expert authors It demonstrates the global and total nature of the Second World War giving due coverage to the conflict in all major theatres and through the lens of the key combatants and neutrals examines issues of race gender ideology and society during the war and functions as a textbook to educate students as to the trends that have taken place in how the conflict has been and can be interpreted in the modern world Divided into twelve parts that cover central themes of the conflict including theatres of war leadership societies occupation secrecy and legacies it enables those with no memory of war to approach it with a view to comprehending what it was all about and places the history of this conflict into a context that is international transnational and institutional This is a comprehensive and accessible reference volume for anyone interested in the most up to date scholarship on this major conflict Chapter 18 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

Military Trials of War Criminals in the Netherlands East Indies 1946-1949 Frederic L. Borch,2017 This book provides the first English language examination and analysis of the records of the Dutch war crimes tribunals from 1946-1949 which prosecuted more than 1000 Japanese soldiers and civilians for war crimes committed during the occupation of the Netherlands East Indies during World War II

War Crimes in

Japan-Occupied Indonesia J. Kevin Baird, Sangkot Marzuki, 2015-05-15 An examination of the execution of a prominent Indonesian scientist during the Japanese occupation of Indonesia in the Pacific War

Disease and Security Christian Enemark, 2007-06-11 Focusing on East Asia this book sets out a framework for analyzing infectious disease threats in security terms It covers the security significance of naturally occurring disease outbreak events such as SARS and avian influenza the development and use of biological weapons by state and non state actors and the security risks associated with laboratory research on pathogenic micro organisms Christian Enemark devises a conceptual framework for securitization that is useful for policy makers by using the overlaps and synergies between different infectious disease threats The book draws heavily on material from public health and scientific literature to illustrate the cross disciplinary requirements for addressing infectious diseases challenges in security terms Fast moving naturally occurring disease threats are of increasing concern to governments and individuals and it is therefore important to recognize their close relationship to the security challenges posed by Biological Weapons and pathogen research Disease and Security will be of much interest to students of international security public health and Asian politics
