The New Cosmos. A. Unsöld,2013-11-09 This book may serve to present the modern view of the universe to a large number of readers whose over full professional commitments leave them no time for the study of larger monographs Such a book should not be too compendious Accordingly the author has been at pains to allow the leading ideas of the various domains of astronomical investigation to stand out plainly in their scientific and historical settings the introductory chapters of the three parts of the book in the framework of historical surveys should assist the general review With that in mind the title was chosen following Alexander von Humboldt's well known book Kosmos Entwurf einer physischen Weltbeschreibung 1827 1859 On the other hand particular results which admittedly first lend colour to the picture are often simply stated without attempting any thorough justification The reader seeking further information will find guidance in the Bibliography This makes no pretensions to completeness or historical balance References in the text or in captions for the figures by quoting authors and years make it possible for the reader to trace the relevant publications through the standard abstracting journals I wish to thank my colleagues V WEIDEMANN E RICHTER and B BASCHEK for their critical reading of the book and for much helpful counsel and H HOLWEGGER for his tireless collaboration with the proofs Similarly my thanks are due to Miss ANTJE WAGNER for the careful preparation of the typescript

ancient science on the cutting edge Although it s been around for more than 5 500 years astronomers say that we ve learned more than 90 percent of what we know about the universe in just the last 50 years Of this body of knowledge a disproportionate amount has been acquired in the past decade with each new year yielding more information than the last The Complete Idiot s Guide to Astronomy Third Edition covers these new advances and discoveries and is repositioned to focus more on exciting cutting edge cosmology topics and less on backyard astronomy Transactions of the International Astronomical Union ...
