Dueck,2016-03-25 The Oxford Handbook of Music and World Christianities investigates music s role in everyday practice and social history across the diversity of Christian religions and practices around the globe The volume explores Christian communities in the Americas Europe Africa Asia and Australia as sites of transmission transformation and creation of deeply diverse musical traditions The book s contributors while mostly rooted in ethnomusicology examine Christianities and their musics in methodologically diverse ways engaging with musical sound and structure musical and social history and ethnography of music and musical performance These broad materials explore five themes music and missions music and religious utopias and other oppositional religious communities music and conflict music and transnational flows and music and everyday life The volume as a whole then approaches Christian groups and their musics as diverse and powerful windows into the way in which music religious ideas capital and power circulate and change between places now and historically It also tries to take account of the religious self understandings of these groups presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values Given that the centerpiece of the volume is Christian religious musical practice the volume reveals the active role music plays in maintaining and changing religious moral and cultural values in a long history of intercultural and transnational encounters Remembrance of Pacific Pasts Robert Borofsky,2000-04-01 How does one describe the Pacific s pasts The easy confidence historians once had in writing about the region has disappeared in the turmoil surrounding today s politics of representation Earlier narratives that focused on what happened when are now accused of encouraging myths of progress Remembrance of Pacific Pasts takes a different course It acknowledges history s multiplicity and selectivity its inability to represent the past in its entirety as it really was and instead offers points of reference for

thinking with and about the region's pasts. It encourages readers to participate in the historical process by constructing alternative histories that draw on the volume's chapters. The book's thirty-four contributions, written by a range of authors spanning a variety of styles and disciplines, are organized into four sections. The first presents frames of reference for analyzing the problems, poetics, and politics involved in addressing the region's pasts today. The second considers early Islander-Western contact, focusing on how each side sought to physically and symbolically control the other. The third deals with the colonial dynamics of the region, the tensions of empire that permeated imperial rule in the Pacific. The fourth explores the region's postcolonial politics through a discussion of the varied ways independence and dependence overlap today. *Remembrance of Pacific Pasts* includes many of the region's most distinguished authors, such as Albert Wendt, Greg Denning, Epeli Hau'ofa, Marshall Sahlins, Patricia Grace, and Nicholas Thomas. In addition, it features chapters by well-known writers from outside Pacific Studies: Edward Said, James Clifford, Richard White, and Gyan Prakash, which help place the region's dynamics in comparative perspective. By moving Pacific history beyond traditional empirical narratives to new ways for conversing about history, by drawing on current debates surrounding the politics of representation to offer different ways for thinking about the region's pasts, this work has relevance for students and scholars of history, anthropology, and cultural studies both within and beyond the region.

*Between Indigenous and Settler Governance* Lisa Ford, Tim Rowse, 2013. This book addresses the history, current development, and future of indigenous self-governance in five settler-colonial nations: Australia, Canada, New Zealand, South Africa, and the United States.

*Myth and Memory* John Sutton Lutz, 2011-11-01. The moment of contact between two peoples, two alien societies, marks the opening of an epoch and the joining of histories. What if it had happened differently? The stories that indigenous peoples and Europeans tell about their first encounters with one another are enormously valuable historical records, but their relevance extends beyond the past. Settler populations and indigenous peoples the world over are engaged in negotiations over legitimacy, power, and rights. These struggles cannot be dissociated from written and oral accounts of contact moments, which not only shape our collective sense of history but also guide our understanding of current events. For all their importance, contact stories have not been systematically or critically evaluated as a genre. *Myth and Memory* explores the narratives of indigenous and newcomer populations from New Zealand and across North America, from the Lost Colony of Roanoke on the Atlantic seaboard of the United States to the Pacific Northwest and as far as Sitka, Alaska. It illustrates how indigenous and explorer accounts of the same meetings reflect fundamentally different systems of thought and focuses on the cultural misunderstandings embedded in these stories. The contributors discuss the contemporary relevance, production, and performance of Aboriginal and European contact narratives and introduce new tools for interpreting the genre. They argue that we are still in the contact zone, striving to understand the meaning of contact and the relationship between indigenous and settler populations.

**Indigenous Rights and the Legacies of the Bible** Mark G. Brett,2024-06-25 A Christian imagination of colonial discovery permeated the early modern world but legal histories developed in very different ways depending on imperial jurisdictions Indigenous Rights and the Legacies of the Bible From Moses to Mabo explores the contradictions and ironies that emerged in the interactions between biblical warrants and colonial theories of Indigenous natural rights The early debates in the Americas mutated in the British colonies with a range of different outcomes after the American Revolution and tracking the history of biblical interpretation provides an illuminating pathway through these historical complexities A ground breaking legal judgement in the High Court of Australia Mabo v Queensland 1992 demonstrates the enduring legacies of debates over the previous five centuries The case reveals that the Australian colonies are the only jurisdiction of the English common law tradition within which no treaties were made with the First Nations Instead there is a peculiar development of terra nullius ideology which can be traced back to the historic influences of the book of Genesis in Puritan thought in the seventeenth century Having identified both similarities and differences between various colonial arguments and their overt dependence on early modern theological reasoning Mark G Brett examines the paradoxical permutations of imperial and anti imperial motifs in the biblical texts themselves Concepts

of rights shifted over the centuries from theological to secular frameworks and more recently from anthropocentric assumptions to ecologically embedded concepts of Indigenous rights and responsibilities Bearing in mind the differences between ancient and modern notions of indigeneity a fresh understanding of this history proves timely as settler colonial states reflect on the implications of the United Nations Declaration on the Rights of Indigenous Peoples 2007 Brett s illuminating insights in this detailed study are particularly relevant for the four states that initially voted against the Declaration the USA Canada New Zealand and Australia

David Lindenfeld, 2021-05-20. In this book David Lindenfeld proposes a new dimension to the study of world history. Here he explores the global expansion of Christianity since 1500 from the perspectives of the indigenous people who were affected by it and helped change it, giving them active agency. Integrating the study of religion into world history, his volume surveys indigenous experience in colonial Latin America, Native North America, Africa, and the African diaspora, the Middle East, India, East Asia, and the Pacific. Lindenfeld demonstrates how religion is closely interwoven with political, economic, and social history. Wide ranging in scope and offering a synoptic perspective of our interconnected world, Lindenfeld combines in-depth analysis of individual regions with comprehensive global coverage. He also provides a new vocabulary with a spectrum ranging from resistance to acceptance and commitment to Christianity that articulates the range and complexity of the indigenous conversion experience. Lindenfeld's cross-cultural reflections provide a compelling alternative to the Western narrative of progressive development. Encyclopedia of Post-Colonial Literatures in English Eugene Benson, L.W.

Conolly, 2004-11-30. Post-Colonial Literatures in English, together with English Literature and American Literature, form one of the three major groupings of literature in English and as such are widely studied around the world. Their significance derives from the richness and variety of experience which they reflect. In three volumes this Encyclopedia documents the history and development of this body of work and includes original research relating to the literatures of some 50 countries and territories. In more than 1,600 entries written by more than 600 internationally recognized scholars, it explores the effect of the colonial and post-colonial experience on literatures in English worldwide. Religion and Power Jione Havea, 2020-07-07

Religion has power structures that require and justify its existence, spread its influence, and mask its collaboration with other power structures. Power like religion is in collaboration. Along this line, this book affirms that one could see and study the power structures and power relations of a religion in and through the missions of empires. Empires rise and roam with the blessings and protections of religious power structures, e.g. scriptures, theologies, interpretations, traditions that in return carry, propagate, and justify imperial agendas. Thus, to understand the relation between religion and power requires one to also study the relation between religion and empires. Christianity is the religion that receives the most deliberation in this book, with some attention to power structures and power relations in Hinduism and Buddhism. The cross-cultural and international contributors share the conviction that something within each religion resists and subverts its power structures and collaborations. The authors discern and interrogate the involvements of religion with empires past and present, political and ideological, economic and customary, systemic and local. The upshot is that the book troubles religious teachings and practices.

that sustain as well as profit from empires
