Reshaping Economic Geography in East Asia Yukon Huang, Alessandro Magnoli Bocchi, 2008-10-15 This companion volume to the World Development Report 2009 comprises twenty papers authored by noted Asian scholars These studies highlight how throughout East Asia spatial considerations have influenced Government policies at the national regional and local levels Key themes include how countries have dealt with 1 agglomeration economies urbanization and regional disparities 2 improving connectivity with infrastructure investments and 3 eliminating barriers across and within countries to

favor the movement of labor goods and services Achievements vary widely across countries while some succeeded in enhancing competitiveness and improving social outcomes others are experiencing increasing inequalities and failures to spur growth in disadvantaged areas The book highlights many examples of how the new economic geography is reshaping development objectives from initiatives to foster growth via enhanced agglomeration and improved local connectivity to the world economy to special decentralization programs that channel resources to lagging regions This volume will be of great interest to readers working in the areas of economic policy poverty reduction and urban rural development strategies and transport led infrastructure policy

The Neoliberal Revolution in Eastern Europe Paul Dragos Aligica, Anthony John Evans, 2009-01-01 Very few studies have ventured to explore the shift in economic ideas that were such a critical factor in shaping and understanding the East European transition process Paul Dragos Aligica and Anthony J Evans have seized upon the potential that this crucial case has to illuminate the larger phenomenon of diffusion and adoption of economic ideas Two different but related research agendas are developed the study of the spread of neoliberalism as seen from the perspective of Eastern European post communist evolutions and the study of Eastern European transition as seen from an ideas centered perspective Combining a distinctive synthesis of the existing data about the spread of neoliberal economic ideas in Central and Eastern Europe with an analysis of the processes at work the authors challenge a series of misunderstandings and myths about the spread of neoliberal economic ideas The disputed topics include the myth of an Eastern European rush to embrace the theories and ideas that may be considered the mark of market fundamentalism the notion that a harsh neoliberal dogmatism was somehow imposed on the region from outside the idea that the standardization and regimentation of economic thinking was a result of the spread of the Western way of doing economics and the belief that the Eastern Europeans passively embraced this uniformity and standardization due to pressure from the Westerners This unusual synthesis will appeal to scholars in economics political science communist post communist studies and new institutionalism as well as policymakers

Economic Transformations in East and Central Europe David F. Good, 1994-09-22 This book provides an invaluable guide to understanding the current problems of this volatile region demonstrating that the area's economic history over the last century has vital legacies for its economic future

Eastern Europe in the Postwar World NA, 2016-04-30

Nation, State and the Economy in History Alice Teichova, Herbert Matis, 2003-05-08 Originally published in 2003 this book addresses the rarely explored subject of the reciprocal relationships between nationalism nation and state building and economic change Analysis of the economic element in the building of nations and states cannot be confined to Europe and therefore these diverse yet interlinked case studies cover all continents Authors come to contrasting conclusions some regarding the economic factor as central while others show that nation states came into being before the constitution of a national market The essays leave no doubt that the nation state is an historical phenomenon and as such is liable to expiry both through the process of globalisation and through the development of a cyber society which evades state control

By contrast developments in southeastern Europe the former USSR and parts of Africa and the Far East show that building the nation state has not run its course

The Czech And Slovak Republics Carol Leff, 2018-02-15 This clear objective introduction to the politics of Czechoslovakia and the successor Czech and Slovak Republics provides a comprehensive analysis of Czechoslovakia in the postcommunist period Carol Leff builds a framework for understanding the dynamics of the triple transition democratization marketization and a national transformation that has reconfigured the dynamic between state and nation She shows how the interaction of these three transformational agendas has shaped Czechoslovakia's development ultimately culminating in the paradoxical disintegration of a state that most of its citizens wished to preserve The book offers a valuable case study of a country coming back to Europe but it also provides an opportunity for analyzing the influence of communism on what had been a significant interwar European state The book's strong comparative element will make it invaluable as well for those seeking to understand contemporary Central and Eastern Europe

Reshaping Poland's Community after Communism Helena Chmielewska-Szlajfer, 2018-06-14 Harnessing a cultural sociological approach to explore transformations in key social spheres in post 1989 Poland Chmielewska Szlajfer illuminates shifts in religiosity sympathy towards others and civic activity in post Communist Poland in the light of Western influence over elements of Polish life Reshaping Poland's Community after Communism focuses on three major cases largely ignored in Polish scholarship 1 a hugely popular faux baroque Catholic shrine which illustrates new strategies adopted by the Polish Catholic Church to attract believers 2 Woodstock Station a widely known free charity music festival demonstrating new practices of sympathy towards strangers and 3 the emergence of national internet pro voting campaigns and small town watchdog websites which uncover changes in practical uses of civic engagement In exploring grass roots everyday negotiations of religiosity charity and civic engagement in contemporary Poland Chmielewska Szlajfer demonstrates how a country's cultural changes can suggest wider dramatic democratic transformation

The Political Economy of Asian Transition from Communism Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work

The Reshaping of the National Labor Relations Board James A. Gross, 1982-06-30 In this volume covering the years 1937

1947 James A Gross describes and analyzes the NLRB's vigorous and uncompromising enforcement of the Wagner Act and the intense political pressure to which the Board was subjected as a consequence. He identifies and examines the forces that succeeded in pressuring the NLRB out of its essential role in the making of U.S. labor policy. This is the story of the transformation of the NLRB from an expert administrative agency that played a major role in the making of labor policy into an insecure politically sensitive agency preoccupied with its own survival and reduced to deciding marginal issues.

Strategic Triangles Reshaping International Relations in East Asia Gilbert Rozman, 2022-06-09. Rozman shows how East Asia's international relations over three decades can be best understood through the lens of triangles analyzing relations between the key nations through a series of trilateral relationships. He argues that triangles present a convincing answer to the question of whether we had entered a new era of bipolarity like the Cold War or an age of multipolarity. Triangulation emerged as a dynamic in East Asia in the aftermath of the Cold War and was accelerated in the course of the Xi and Trump administrations. Even as Sino-US competition and confrontation deepened, triangles had a substantial presence. East Asian triangles share an unusual mixture of three distinct elements: deep-seated security distrust, extraordinary economic interdependence, and a combustible composition of historical resentments and civilizational confidence. The combination of the three makes the case for triangularity more compelling. Rozman argues. The legacy of communism, the pursuit of reunification on the Korean Peninsula, and moves to expand beyond the US-Japan alliance have all driven the way triangles have evolved. Only as bipolarity intensified in the 2020s was triangularity losing ground. The degree of turnabout is analyzed for all of the cases considered. Rozman evaluates each key triangle of states in turn and assesses how the relationship impacts the region more widely. This book provides an essential framework for understanding the current state and trajectory of East Asian international relations for students and policymakers.
