Rediscoveries And Reformulations:

International Relations, Political Theory and the Problem of Order N. J. Rengger, 1999-11-04 At the turn of the millennium and now after the fall of the Berlin wall the best way to map the trajectories of contemporary international relations is hotly contested Is the world more or less ordered than during the cold war Are we on the way to a neo liberal era of free markets and global governance or in danger of collapsing into a new Middle Ages Are we on the verge of a new world order or are we slipping back into an old one These issues are amongst those that have dominated International Relations Theory in the late 1980s and 1990s but they have their roots in older questions both about the appropriate ways to study international relations and about the general frameworks and normative assumptions generated by various different methodological approaches This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory and in particular to argue that International Relations theory has separated itself from the concerns of political theory more generally at considerable cost to each Focussing initially on the problem of order in international politics the book suggests that International Relations theory in the twentieth century had adopted two broad families of approaches the first of which seeks to find ways of managing order in international relations and the second of which seeks to end the problem of order It traces three specific sets of responses to the problem of order within the first approach which emphasize balance society and institutions and outlines two responses within the second grouping an emphasis on emancipation and an emphasis on limits Finally the book assesses the state of International Relations theory today and suggests an alternative way of reading the problem of order which generates a different trajectory for theory in the twenty first century

The War Puzzle Revisited John A. Vasquez, 2009-07-23 A scientific explanation of the onset and expansion of war and the conditions of peace

National Security Through a Cockeyed Lens Steve A. Yetiv, 2013-12 What are key mental errors that can undermine good decision making Drawing on four decades of psychological historical and political science research on cognitive biases this book illuminates key pitfalls in how we and our leaders make decisions It shows in five case studies of American foreign and energy policy that such errors a dozen different cognitive biases have been more important in shaping and impacting U S national interests than we currently understand In so doing it also sheds light on U S foreign policy toward and interests in the Middle East That story prominently features non psychological explanations but cognitive biases exercised by American and foreign actors also represent a slice of the story that is worth revealing As examples the book shows how the distorted cognitive lens of Al Qaeda leaders contributed to the September 11 attacks and the ongoing conflict with America and the West how overconfidence impacted America s decision to invade Iraq in 2003 and how short term thinking a prominent cognitive bias hurts America s ability to develop a comprehensive energy policy making the Middle East more important to the United States and enhancing its proclivity to be involved in the region The book is aimed chiefly at students and the lay public though academics may benefit from it

Alker and IR Renée

Marlin-Bennett,2012-03-12 International Relations have rarely been considered a synthesis of humanistic and social sciences approaches to understand the complex connections of a global and globalizing world One of the few scholars to have accomplished this creative blend was Hayward R Alker Alker and IR presents a set of visionary and original essays from scholars who have been profoundly influenced by Alker s approach to global studies They build on the foundation he laid demonstrating the practicality and usefulness of ethically grounded theoretically informed and interdisciplinary research for producing knowledge They show how substantive boundaries can be crossed and methodological rules rewritten in the search for a deeper more contextualized approach to global politics This book will be of interest to researchers and students of international relations and global politics

The Social Construction of the Korean War Jennifer Milliken,2001 In light of the recent declassification of state papers from Western Soviet and Chinese archives this intriguing book presents a re examination of the Korean War The authors present a revealing analysis of North Korea s decision to invade South Korea in June of 1950 Soviet and American foreign policy during the war and Chinese intervention The book also shows how the standard explanations of the war in international relations theory inherited from foundational approaches are misleading or incomplete

Methodology and Emotion in International Relations Eric Van Rythoven,Mira Sucharov,2019-06-20 This volume offers a state of the art study of the diverse methodological approaches and issues in the study of emotions in international relations research While interest in emotion and affect in IR has grown in recent years there remains an absence of sustained engagement with questions of methodology and method Although much of the field holds the emotions turn as laudable it is commonly seen as facing serious even prohibitive methodological challenges Using a common framework for making discussions of methodology and emotion mutually intelligible this work seeks to address this lacuna and will be of interest to students and scholars of international relations research methods and IR theory

Peace Figuration after International Intervention Gözüm Visoka,2016-07-01 This book examines the adverse impacts of liberal peacebuilding in conflict affected societies It introduces peace figuration as a new analytical framework for studying the intentionality performativity and consequences of liberal peacebuilding The work challenges current theories and views and searches for alternative non conflicted research avenues that are suitable for understanding how peacebuilding intentions are made how different events shape peace outcomes and what are the consequences of peacebuilding interventions Drawing on detailed case studies of peacebuilding in Bosnia and Herzegovina Kosovo and Timor Leste the book argues that attempts to build peace often fail to achieve the intended outcomes A figurational view of peacebuilding interventions shows that post conflict societies experience multiple episodes of success and failure in an unpredictable trajectory This book develops a relational sociology of peacebuilding impact which is crucial for overcoming static measurement of peacebuilding successes or failures It shows that international interventions can shape peace but importantly not always in the shape they intended This book will be of much interest to students of statebuilding peacebuilding war and conflict studies security studies and IR

The Closure of the International System Lora Anne Viola, 2020-07-09 Explains how actors control access to international resources creating a stratified international system of political equals and unequals

Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation Ephraim Nissan, 2012-06-15 This book provides an overview of computer techniques and tools especially from artificial intelligence AI for handling legal evidence police intelligence crime analysis or detection and forensic testing with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the evidence methods for the modelling of argumentation and computational approaches to dealing with legal or any narratives By the 2000s the modelling of reasoning on legal evidence has emerged as a significant area within the well established field of AI Law An overview such as this one has never been attempted before It offers a panoramic view of topics techniques and tools It is more than a survey as topic after topic the reader can get a closer view of approaches and techniques One aim is to introduce practitioners of AI to the modelling legal evidence Another aim is to introduce legal professionals as well as the more technically oriented among law enforcement professionals or researchers in police science to information technology resources from which their own respective field stands to benefit Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals so it is important to be aware of ongoing controversies A survey is provided of argumentation tools or methods for reasoning about the evidence Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence Moreover tools appropriate for crime detection intelligence and investigation include tools based on link analysis and data mining Concepts and techniques are introduced along with case studies So are areas in the forensic sciences Special chapters are devoted to VIRTopsy a procedure for legal medicine and FLINTS a tool for the police This is both an introductory book possibly a textbook and a reference for specialists from various quarters

The Social in the Global Jonathan Joseph, 2012-07-12 Applies sociological concepts to international relations by examining how influential social ideas contribute to global governance

A New Handbook of Political Science Robert E. Goodin, Hans-Dieter Klingemann, 1996-09-19 The New Handbook of Political Science is an authoritative survey of developments in the discipline compiled by 42 of the most famous political scientists worldwide analysing progress over the past twenty years and assessing this in the context of historical trends in the field Discussion of each of the main subdisciplines political institutions political behaviour comparative politics international relations political theory public policy and administration political economy political methodology breaks down into four sections an overview of the field analysis from two key perspectives in the field Old and new an eminent scholar in the field assesses the new developments in the light of older traditions in the discipline International in its scope systematic in its coverage A New Handbook of Political Science will become the reference book for political scientists and those tracking their work into the next century The New Handbook of Political Science is an authoritative survey of developments in the discipline compiled by 42 of the most famous political scientists worldwide

analysing progress over the past twenty years and assessing this in the context of historical trends in the field The New Handbook of Political Science is the most comprehensive and well done effort to describe the state of political science extant It contains much which will be required reading I strongly recommend it Seymour Martin Lipset The Handbook is a masterly and authoritative survey comprehensive yet compact by a stellar international cast of contributors a most worthy successor to the old Greenstein Polsby Handbook published two decades ago Arend Lijphart This is an extraordinarily useful mapping of what has happened in the discipline in the last twenty years since the classic 1975 Handbook was published Scholars are well advised to read this new single volume Handbook in its entirety For this volume is not only a collection of brilliant contributions but also a much needed cross fertilizing endeavour Giovanni Sartori **Restraint in International Politics** Brent J. Steele,2019-10-17 Comprehensive examination of restraint in international politics considered across a range of contexts as a political process device and strategy *Hybrid Sovereignty in World Politics* Swati Srivastava,2022-09-08 The idea of hybrid sovereignty describes overlapping relations between public and private actors in important areas of global power such as contractors fighting international wars corporations regulating global markets or governments collaborating with nongovernmental entities to influence foreign elections This innovative study shows that these connections sometimes hidden and often poorly understood underpin the global order in which power flows without regard to public and private boundaries Drawing on extensive original archival research Swati Srivastava reveals the little known stories of how this hybrid power operated at some of the most important turning points in world history spreading the British empire founding the United States establishing free trade realizing transnational human rights and conducting twenty first century wars In order to sustain meaningful dialogues about the future of global power and political authority it is crucial that we begin to understand how hybrid sovereignty emerged and continues to shape international relations **Perestroika!** Kristen Renwick Monroe,2005-09-30 An examination of the movement that has turned the discipline of political science upside down This superb volume describes the events and ramifications of a revolt within the political science discipline that began in 2000 with a disgruntled e mail message signed by one Mr Perestroika The message went to seventeen recipients who quickly forwarded it to others and soon the Perestroika revolt became a major movement calling for change in the American political science community What is the Perestroika movement Why did it occur What has it accomplished What remains to be done Most important what does it tell us about the nature of political science about methodological pluralism and diversity about the process of publishing scholarly work and about graduate education in the field The contributors to the book thoughtful political scientists who offer a variety of perspectives set the Perestroika movement in historical and comparative contexts They address many topics related to heart of the debate a desire for tolerance of methodological diversity and assess the changes that have come in the wake of Perestroika For political scientists and their graduate students and for those interested in the history or sociology of Social Sciences this volume is essential reading **World Literature Reader** Theo

D'haen, César Domínguez, Mads Rosendahl Thomsen, 2012-06 World Literature is an increasingly influential subject in literary studies which has led to the re framing of contemporary ideas of national literatures language and translation World Literature A Reader brings together thirty essential readings which display the theoretical foundations of the subject as well as showing its conceptual development over a two hundred year period The book features an illuminating introduction to the subject with suggested reading paths to help readers navigate through the materials texts exploring key themes such as globalization cosmopolitanism post trans nationalism and translation and nationalism writings by major figures including J W Goethe Karl Marx Friedrich Engels Longxi Zhao David Damrosch Gayatri Chakravorty Spivak Pascale Casanova and Milan Kundera The early explorations of the meaning of Weltliteratur are introduced while twenty first century interpretations by leading scholars today show the latest critical developments in the field The editors offer readers the ideal introduction to the theories and debates surrounding the impact of this crucial area on the modern literary landscape Complexity in World Politics Neil E. Harrison, 2007-06-01 Demonstrates that world politics is more complex than conventional models can account for Geopolitics John A. Agnew, 2003 Despite challenges to its domination the way modern world politics is conducted is structured by a set of understandings dating back to the rise of the European powers Here John Agnew systematically explores how Europeans in a position of global power imposed their ways and views on others through visualizing the world as a whole defining world regions as modern or backward seeing the nation statehood as the highest and best form of political organization and viewing world politics as the outcome of the pursuit of primacy by competing states Exploring the elements of geographical imagination and how they have come together in different historical and modern epochs this updated new edition examines the implications of recent world events such as September 11th continued expansion of the EU and NATO the near bankruptcy and failure of various states the re ignition of the Israeli Palestine conflict Providing a lucid analysis of how world politics has come to be practised in its present form Agnew identifies and argues for an alternative given the costs visited on the world in twentieth century by the practice of the modern geographical imagination

Richard Ned Lebow: A Pioneer in International Relations Theory, History, Political Philosophy and Psychology

Richard Ned Lebow, Nathan Funk, 2016-09-13 This is the first of four volumes to be published as part of this book series on the life and work of Richard Ned Lebow In a career spanning six decades Richard Ned Lebow has made important contributions to the study of international relations political and intellectual history motivational and social psychology philosophy of science and classics He has authored coauthored or edited 30 books and almost 250 peer reviewed articles These four volumes are excerpts from this corpus The first volume includes an intellectual autobiography bibliography and assessments of Lebow s contributions to diverse fields by respected authorities It shows how a scholar s agenda evolves in response to world events and his efforts to grapple with them theoretically and substantively It elaborates pathways for addressing these events and their consequences in an interdisciplinary manner and offers new concepts and methods for

doing so Richard Lebow's research bridges international relations psychology history classics political theory and philosophy of science He is author coauthor or editor of 34 books and almost 250 peer reviewed articles Contributors to the book are Simon Reich Mervyn Frost Janice Gross Stein Stefano Guzzini Markus Kornprobst Harald Müller Christian Wendt Robert English

The Art of World-Making Harry Gould, 2017-06-26 On its face *The Art of World Making* focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations of equal importance however while using Onuf's work as their touchstone the contributions to this volume range widely across IR theory making important interventions in some of the most important topics in the field today The volume considers the place of Constructivism and Republicanism in the field of international relations and the contestation that accompanies the question of their place in the field asking What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms What can rule oriented Constructivism the focus here provide our field that other forms of Constructivism have been unable to Into what new and productive directions can Constructivism be taken What are its gaps and what are the resources to remedy those gaps What can Republicanism tell us about ongoing issues in international law global governance liberalism and crisis Drawing together essays from some of the leading scholars in the field space is given after each chapter for a detailed and highly personal response piece to each contribution written by Onuf This unique volume will be essential reading for students and scholars of international relations

Interpretation and Method Dvora Yanow, Peregrine Schwartz-Shea, 2015-03-04 Exceptionally clear and well written chapters provide engaging discussions of the methods of accessing generating and analyzing social science data using methods ranging from reflexive historical analysis to critical ethnography Reflecting on their own research experiences the contributors offer an inside applied perspective on how research topics evidence and methods intertwine to produce knowledge in the social sciences
