REDSHIFT RENDEZVOUS

One fabulously wealthy colony. One hyperspace craft.
One team of ruthless hijackers. One loner in their way.
Do the math.

"This is absolutely one of the most terrific ideas
for an SF novel I've seen in years. My first thought was,
'Why couldn't I have come up with this?' My second thought, too."

Speculative Epistemologies John Rieder,2021-09-15 *Speculative Epistemologies* is about truth effects in sf which stands for both science fiction and speculative fiction It examines six narratives one from each decade from the 1960s to the 2010s that challenge dominant assumptions about the normal the possible and the real It asks what the patterns of overlap and interference generated by texts located in border territories that make their identification as sf problematic and sometimes controversial can reveal about the dynamics of sf s multiple subcultures e g professionals academics and fans the complexity of the genre s communities of practice and their routes of production distribution and reception and the genre s shifting position within a broadly conceived field of literary and cultural production The speculative epistemologies in these stories are counter hegemonic ways of knowing ways of imagining knowing differently and the focus of this study is their effect on the formation of identities and communities Combining the methods of genre theory reception theory and the sociology of cultural production the readings of these six narratives trace a history of sf s increasingly feminist racially and ethnically diverse philosophically ambitious and politically engaged character from the 1960s to the present **Slow Light** Sidney Perkowitz,2011 *Slow Light* is a popular treatment of today s astonishing breakthroughs in the science of light Even though we don t understand light s quantum mysteries we can slow it to a stop and speed it up beyond its Einsteinian speed limit 186 000 miles sec use it for quantum telecommunications teleport it manipulate it to create invisibility and perhaps generate hydrogen fusion power with it All this is lucidly presented for non scientists who wonder about teleportation Harry Potter invisibility cloaks and other fantastic outcomes *Slow Light* shows how the real science and the fantasy inspire each other and projects light s incredible future Emory physicist Sidney Perkowitz discusses how we are harnessing the mysteries of light into technologies like lasers and fiber optics that are transforming our daily lives Science fiction fantasies like Harry Potter s

the Locus Award winning *What Makes This Book So Great* The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to *Among Others* It's very good It's great New York Times bestselling author Cory Doctorow *Boing Boing* on *What Makes This Book So Great*

The Hugo, Nebula and World Fantasy Awards Howard DeVore, 1998 Science fiction fans have voted for the Hugo Awards for best science fiction almost every year since 1953 Science fiction professionals have presented the Nebula Awards to their peers since 1965 In all this time lists of winners have been widely available but the losers have usually been ignored In 1970 long time fan Howard DeVore started publishing a complete listing of Hugo and Nebula awards including the stories that were nominated but did not win The fact that stories were nominated implied that they had considerable merit Mr DeVore felt that a complete listing would let fans compare them The International Fantasy Awards may have inspired the Hugos so he added them DeVore brought out new editions year by year publishing and distributing them himself with the aid of a number of devoted science fiction fans By 1998 the task had grown to the point where Mr DeVore happily relinquished the job to Advent This edition includes introductory and historical essays explaining how each award got started and how nominees and winners are chosen plus commentary in the yearly listings
