Reducing Poverty An Institutional Perspective:

Reducing Poverty Lawrence F. Salmen, 1992 **Business, Entrepreneurship and Innovation Toward Poverty Reduction** Steven Si, David Ahlstrom, Wei Jiang, John Cullen, 2021-07-26

Ways in which poverty can be reduced in both countries and regions through business entrepreneurship and government has been a hot issue for researchers and policymakers in recent years. Governments can play an important role in helping the poor people by non profit organizations and others that help to seed business among the poor. Businesses increasingly also see the large number of people in severe poverty not only as an issue for social concern but also as a potentially large untapped market of consumers for goods and services. Some scholars have called for poverty reduction through entrepreneurship owing to the fact that it can be an efficient path to also change the poor's attitudes and behaviours from a passive mode to a more active mode towards poverty reduction economically and socially. In addition the sharing economy brings opportunities where everyone is a micro entrepreneur. There is a recognition that these types of entrepreneurship above could offer the greatest single potential means to move individuals out of poverty in the nations and regions in the next 5-10 years. This book provides new and valuable analyses of poverty and business entrepreneurship and innovation in current nations and regions including developing and developed countries. As business entrepreneurship and innovation can help to generate greater business activity in settings of severe poverty they will help to solve poverty as individuals in severe poverty are able to both generate greater incomes and accumulate greater assets as they participate with large firms in those activities. The chapters in this book were originally published as a special issue of the *Entrepreneurship Regional Development Institutional Development*. Ronald McGill, 2016-07-27

Seeing Like an International Organization André Broome, Leonard Seabrooke, 2017-12-22

This book contributes to the study of International Organizations IOs by providing a sharp focus on how IOs analytic institutions interact with states over key policy issues. Analytic institutions include the areas departments committees adjudicatory bodies and others housed by or linked to IOs that develop the cognitive framework for identifying understanding and solving policy problems. Analytic institutions make the state legible to IOs and are the key means for how IOs see their member states shaping how international political and economic problems are understood. This book investigates why seeing like an IO matters through cases on leading organizations for global economic governance including the International Monetary Fund the World Bank the Bank for International Settlements the Organisation for Economic Co Operation and Development and the World Trade Organization. The contributors demonstrate the benefits of

studying IOs from the inside out to enrich our understanding of why issues in the international political economy are governed the way they are This book was published as a special issue of New Political Economy

Policy Reform for Sustainable Development in the Caribbean Michele Garrity, Louis A. Picard, 1996 The Caribbean countries and many other Third World countries in Latin America Asia and Africa have been under the yoke of structural adjustment measures for more than a decade Numerous studies have addressed the inequality of North South relations the lack of transparency in negotiations that have led to the signature of agreements the absence of a clear definition of responsibilities of the parties engaged the inadequacy and inadaptation of policies with regard to the socio cultural context and especially the refusal to take into account the social demands of the most deprived The criticisms formulated in this book can only find a beginning of solutions by the setting up of a solid administrative organization in which the public officials are made accountable and who once aware of the national and international stakes can confront the constraints involved in State international negotiation relations The book is a very rich presentation of the concept and the problems of structural adjustment and institutional development in the developing countries Beside the impressive introduction and the convincing conclusion the articles on these prerequisites for institutional sustainability present the most important empirical research results The contents is a clear description of problems failures and results in institutional reforms

transformation of Gulf societies in the last few decades Whilst the Gulf region has at times been seen as impervious to this natural phenomenon of transformation timeless never changing deeply rooted in its ancient tribal customs and traditions and able to blend past and present seamlessly without suffering the wrenching trauma of change this is clearly not the case and the region is not immune to the inevitable forces of social change There is no doubt today that the social change sweeping the Gulf has been profound affecting almost every aspect of life in the Gulf societies This volume has an encyclopedic value as the chapters collectively offer multifaceted and multidisciplinary perspectives to understand social change in the Gulf region Through these chapters the role of economic and educational transformation and the impact of social media migration and urbanization have in driving social change in the Gulf societies is examined in detail with a focus on their directions magnitudes and relevant policy options It also considers how COVID 19 is affecting the lives of the people in the Gulf This book bridges gaps in the understanding of the rapid pace of social change in the Gulf offering practical solutions for policy interventions It is of interest to scholars and students in Middle Eastern studies specifically as well as sociology media studies migration studies and educational policy

Institutional Analysis and Economic Policy Marc R. Tool, Paul Dale Bush, 2012-12-06 The purpose of this volume is to demonstrate how contemporary institutional economic analysis can be applied to the resolution of economic problems All of the essays in this book challenge the conventional wisdom in the problem areas addressed They advocate policy positions that often run contrary to views widely held by academic economists and policy makers alike The general literature of institutional economics is unorthodox beginning with its methodological foundations and continuing through the kind of policy analysis found in these pages The orthodox tradition in economics is commonly characterized as neoclassical economics Neoclassical economics fosters the myth that only the market can efficiently allocate a society's economic resources and equitably distribute its income It provides the intellectual defense for in which free markets are championed over democratic capitalist ideology policy formation which it contends is neither efficient nor equitable For both professional economists and policy makers of a conservative political persuasion neoclassical economics writes the script for a morality play in which the market is the good guy and the government is the bad guy As such it undermines the belief that free societies can enhance economic welfare through the use of democratic processes in the formulation of economic policies
