Reenchanted Science Anne Harrington,1999 *The Incomplete Child* Scot Danforth,2009 With the passage of Public Law 94 142 in 1975 the learning disability construct gained national legitimacy Feeding that political achievement behind the very idea of a learning disability was the development of a science that blended neurology psychology and education This book tracks the historical creation of the science of learning disabilities beginning with the clinical research with brain injured World War I soldiers conducted by German physician Kurt Goldstein It traces the growth of the two primary research traditions the psycholinguistic theory of Samuel Kirk and the movement education of Newell Kephart exploring how specific scientific orientations theories and practices led to the birth of the learning disability in the United States The Scalpel and the Butterfly Deborah Rudacille,2015-12-15 An engrossing and eloquent study of the history and ethics of animal experimentation The heart of a pig may soon beat in a human chest Sheep cattle and mice have been cloned Slowly but inexorably scientists are learning how to transfer tissues organs and DNA between species Some think this research is moving too far too fast without adequate discussion of possible consequences Is it ethical to breed animals for spare parts When does the cost in animal life and suffering outweigh the potential benefit to humans In precise and elegant prose *The Scalpel and the Butterfly* explores the ongoing struggle between the promise offered by new research and the anxiety about safety and ethical implications in the context of the conflict between experimental medicine and animal protection that dates back to the mid nineteenth century Deborah Rudacille offers a compelling and cogent look at the history of this divisive topic from the days of Louis Pasteur and the founding of organized anti vivisection in England to the Nazi embrace of eugenics from animal rights to the continuing war between PETA and biomedical researchers and the latest developments in replacing reducing and refining animal use for research and testing *The Early Frankfurt School and Religion* M. Kohlenbach,R. Geuss,2004-12-14 Are religions tissues of superstition and repression or repositories of the highest hopes and aspirations of humanity or perhaps both at the same time For many of those thinkers who lived through the horrors and upheavals of the first half of the twentieth century this old question acquired a new urgency This volume examines the ways in which the authors of the early Frankfurt School criticized adopted and modified traditional forms of religious thought and practice Focusing on the works of Theodor W Adorno Walter Benjamin Erich Fromm Max Horkheimer Otto Kirchheimer and Franz Neumann it analyzes the relevance of religious traditions and of the Enlightenment critique of religion for modern conceptions of emancipatory thought art law and politics **Adorno's Gamble** Mikko Immanen,2025-02-15 Adorno's Gamble offers a startling reinterpretation of the evolution of Theodor W Adorno's thought usually seen as a mix of critical Marxism Freudian psychoanalysis aesthetic modernism and Jewish tradition Mikko Immanen argues for another previously unacknowledged source of Adorno's thinking on instrumental reason dialectic of enlightenment and frailty of democracy the intellectual underpinnings of Germany's conservative revolutionary movement of the 1920s In a dramatic reappraisal of the

leading light of the Frankfurt School Immanuel follows Adorno's path of philosophical development from the late Weimar era through years in exile to the postwar period establishing his debt to thinkers of radical conservative bent In particular he focuses on Adorno's enduring and daring effort to harness two of the most infamous works from this tradition Oswald Spengler's *Decline of the West* and Ludwig Klages's *The Spirit as Adversary of the Soul* and to repurpose their reactionary teachings for emancipatory ends

A New Field in Mind Frank W. Stahnisch, 2020-03-12 In recent decades developments in research technologies and therapeutic advances have generated immense public recognition for neuroscience However its origins as a field often linked to partnerships and projects at various brain focused research centres in the United States during the 1960s can be traced much further back in time In *A New Field in Mind* Frank Stahnisch documents and analyzes the antecedents of the modern neurosciences as an interdisciplinary field Although postwar American research centres such as Francis O Schmitt's Neuroscience Research Program at MIT brought the modern field to prominence Stahnisch reveals the pioneering collaborations in the early brain sciences at centres in Germany Austria and Switzerland in the first half of the twentieth century One of these Heinrich Obersteiner's institute in Vienna began its work in the 1880s Through case studies and collective biographies Stahnisch investigates the evolving relationships between disciplines anatomy neurology psychiatry physiology serology and neurosurgery which created new epistemological and social contexts for brain research He also shows how changing political conditions in Central Europe affected the development of the neurosciences ultimately leading to the expulsion of many physicians and researchers under the Nazi regime and their migration to North America An in depth and innovative study *A New Field in Mind* tracks the emergence and evolution of neuroscientific research from the late nineteenth century to the postwar period

Body Modern Michael Sappol, 2017-04-11 A poster first printed in Germany in 1926 depicts the human body as a factory populated by tiny workers doing industrial tasks Devised by Fritz Kahn 1888-1968 a German Jewish physician and popular science writer *Der Mensch als Industriepalast* or *Man as Industrial Palace* achieved international fame and was reprinted in various languages and versions all over the world It was a new kind of image an illustration that was conceptual and scientific a visual explanation of how things work and Kahn built a career of this new genre In collaboration with a stable of artists only some of whom were credited Kahn created thousands of images

that were metaphorical allusive and self consciously modern using an eclectic grab bag of schools and styles Dada Art Deco photomontage Art Nouveau Bauhaus functionalism and commercial illustration In *Body Modern* Michael Sappol offers the first in depth critical study of Fritz Kahn and his visual rhetoric Kahn was an impresario of the modern who catered to readers who were hungry for products and concepts that could help them acquire and perform an overdetermined modern identity He and his artists created playful new visual tropes and genres that used striking metaphors to scientifically explain the life of Man This rich and largely obscure corpus of images was a technology of the self that naturalized the modern and its technologies by situating them inside the human body The scope of Kahn s project was vast entirely new kinds of visual explanation and so was his influence Today his legacy can be seen in textbooks magazines posters public health pamphlets educational websites and Hollywood movies But Sappol concludes Kahn s illustrations also pose profound and unsettling epistemological questions about the construction and performance of the self Lavishly illustrated with more than 100 images *Body Modern* imaginatively explores the relationship between conceptual image image production and embodied experience

Revisiting the "Nazi Occult" Monica Black, Eric Kurlander, 2015 New collection of essays promising to re energize the debate on Nazism s occult roots and legacies and thus

our understanding of German cultural and intellectual history over the past century **Vitalism and the Scientific Image in Post-Enlightenment Life Science, 1800-2010** Sebastian Normandin, Charles T. Wolfe, 2013-06-15 Vitalism is understood as impacting the history of the life sciences medicine and philosophy representing an epistemological challenge to the dominance of mechanism over the last 200 years and partly revived with organicism in early theoretical biology The contributions in this volume portray the history of vitalism from the end of the Enlightenment to the modern day suggesting some reassessment of what it means both historically and conceptually As such it includes a wide range of material employing both historical and philosophical methodologies and it is divided fairly evenly between 19th and 20th century historical treatments and more contemporary analysis This volume presents a significant contribution to the current literature in the history and philosophy of science and the history of medicine **The Changing Image of the Sciences**

Ida H. Stamhuis, Teun Koetsier, Cornelis De Pater, Albert Van Helden, 2012-12-06 The title of our book would lead the reader to believe that in speaking of the changing image of the sciences we are taking for granted the multiplicity of sciences as these are practiced for instance in modern universities That was of course not always the case Although we can point to some subjects for instance mathematical astronomy as being demarcated to some extent from other subjects as far back as Antiquity the current division into individual sciences can hardly be traced back further than the nineteenth century Moreover the further we go back in history the more we must subsume science under general knowledge or scholarship scientia Some of the earliest images of episteme or scientia are those of forbidden knowledge often related to technology on the one hand and the absent minded scholar on the other These are powerful metaphors in word as well as image that have been appropriated in various ages for different purposes The Greeks gave Western society its first images of the power of knowledge and those who produced it Prometheus ridiculed the gods stole their fire and brought it down to Earth For this Zeus had him chained to a rock on Mount Caucasus where a vulture fed on his liver during the day while it grew back at night He was finally freed by Heracles **Weimar Thought** Peter E. Gordon, John P. McCormick, 2013-06-30 A

comprehensive look at the intellectual and cultural innovations of the Weimar period During its short lifespan the Weimar Republic 1918-33 witnessed an unprecedented flowering of achievements in many areas including psychology political theory physics philosophy literary and cultural criticism and the arts Leading intellectuals scholars and critics such as Hannah Arendt Walter Benjamin Ernst Bloch Bertolt Brecht and Martin Heidegger emerged during this time to become the foremost thinkers of the twentieth century Even today the Weimar era remains a vital resource for new intellectual movements In this incomparable collection Weimar Thought presents both the specialist and the general reader a comprehensive guide and unified portrait of the most important innovators themes and trends of this fascinating period The book is divided into four thematic sections law politics and society philosophy theology and science aesthetics literature and film and general cultural and social themes of the Weimar period The volume brings together established and emerging scholars from a remarkable

array of fields and each individual essay serves as an overview for a particular discipline while offering distinctive critical engagement with relevant problems and debates Whether used as an introductory companion or advanced scholarly resource Weimar Thought provides insight into the rich developments behind the intellectual foundations of modernity *Biological Individuality* Scott Lidgard, Lynn K Nyhart, 2017-05-24 Individuals are things that everybody knows or thinks they do Yet even scholars who practice or analyze the biological sciences often cannot agree on what an individual is and why One reason for this disagreement is that the many important biological individuality concepts serve very different purposes defining classifying or explaining living structure function interaction persistence or evolution Indeed as the contributors to *Biological Individuality* reveal nature is too messy for simple definitions of this concept organisms too quirky in the diverse ways they reproduce function and interact and human ideas about individuality too fraught with philosophical and historical meaning Bringing together biologists historians and philosophers this book provides a multifaceted exploration of biological individuality that identifies leading and less familiar perceptions of individuality both past and present what they are good for and in what contexts Biological practice and theory recognize individuals at myriad levels of organization from genes to organisms to symbiotic systems We depend on these notions of individuality to address theoretical questions about multilevel natural selection and Darwinian fitness to illuminate empirical questions about development function and ecology to ground philosophical questions about the nature of organisms and causation and to probe historical and cultural circumstances that resonate with parallel questions about the nature of society Charting an interdisciplinary research agenda that broadens the frameworks in which biological individuality is discussed this book makes clear that in the realm of the individual there is not and should not be a direct path from biological paradigms based on model organisms through to philosophical generalization and historical reification German Visions of India, 1871-1918 P. Myers, 2013-03-07 The wide ranging fascination with India in Wilhelmine Germany emerged during a time of extraordinary cultural and political tensions This study shows how religious denominational and spiritual dilemmas political agendas and shifting social consensus became inextricably entangled in the wider German encounter with India during the Kaiserreich The Cult of Health and Beauty in Germany Michael Hau, 2003-04-15 From the 1890s to the 1930s a growing number of Germans began to scrutinize and discipline their bodies in a utopian search for perfect health and beauty Some became vegetarians nudists or bodybuilders while others turned to alternative medicine or eugenics In *The Cult of Health and Beauty in Germany* Michael Hau demonstrates why so many men and women were drawn to these life reform movements and examines their tremendous impact on German society and medicine Hau argues that the obsession with personal health and fitness was often rooted in anxieties over professional and economic success as well as fears that modern industrialized civilization was causing Germany and its people to degenerate He also examines how different social groups gave different meanings to the same hygienic practices and aesthetic ideals What results is a penetrating look at class formation in pre Nazi Germany that will interest historians of

Europe and medicine and scholars of culture and gender *Willy Ley* Jared S. Buss, 2017-08-22 Already a highly respected rocket scientist and compatriot of Wernher von Braun Willy Ley was the author of bestselling books and at the forefront of popular science journalism But as von Braun came onto center stage with his Saturn rockets Ley was ostracized and excluded from the limelight by younger historians and scientists Buss gives us the first full length biography of Ley presenting his contribution to modern science and science journalism **Totality, Charisma, Authority** Mihai Murariu, 2016-10-24 This interdisciplinary endeavour portrays the central features of militant movements which hold totality as an important part of their doctrinal core Revisiting the importance of modernity utopianism eschatology charisma psychology and the history of ideas Mihai Murariu pursues a reconstruction of the historical requirements for the emergence of such movements Making a central use of the concept of totalism the work establishes a conceptual bridge from antiquity to the contemporary period whilst also arguing for the suitability of the term in comparison to totalitarianism or political religion The author also proposes a distinct taxonomy for structural elements variants and development phases which may be encountered in totalist movements **The Forces of Form in German Modernism** Malika Maskarinec, 2018-09-15 The Forces of Form in German Modernism charts a modern history of form as emergent from force Offering a provocative alternative to the imagery of crisis and estrangement that has preoccupied scholarship on modernism Malika Maskarinec shows that German modernism conceives of human bodies and aesthetic objects as shaped by a contest of conflicting and reciprocally intensifying forces the force of gravity and a self determining will to form Maskarinec thereby discloses for the first time German modernism's sustained preoccupation with classical mechanics and with how human bodies and artworks resist gravity Considering canonical artists such as Rodin and Klee seminal authors such as Kafka and Dblin and largely neglected thinkers in aesthetics and art history such as those associated with Empathy Aesthetics Maskarinec unpacks the manifold anthropological and aesthetic concerns and historical lineage embedded in the idea of form as the precarious achievement of uprightness The Forces of Form in German Modernism makes a decisive contribution to our understanding of modernism and to contemporary discussions about form empathy materiality and human embodiment
