# Refashioning Nature

**Richard Bohannon**

## **Refashioning Nature:**

**Refashioning Nature** David Goodman, Michael R. Redclift (Soziologe), 1991      **Sociology on the Menu** Alan Beardsworth, Teresa Keil, 2002-09-11 Sociology on the Menu is an accessible introduction to the sociology of food Highlighting the social and cultural dimensions of the human food system from production to consumption it encourages us to consider new ways of thinking about the apparently mundane everyday act of eating The main areas covered include The origins of human subsistence and the development of the modern food system Food the family and eating out Diet health and the body image The meanings of meat and vegetarianism Sociology on the Menu provides a comprehensive overview of the literature particularly helpful in this interdisciplinary field It focuses on key texts and studies to help students identify major concerns and themes for further study It urges us to re appraise the taken for granted and familiar experiences of selecting preparing and sharing food and to see our own habits and choices preferences and aversions in their broader cultural context

Nature's Perfect Food E. Melanie Dupuis, 2002-02 The story of how Americans came to drink milk For over a century America's nutrition authorities have heralded milk as nature's perfect food as indispensable and the most complete food These milk boosters have ranged from consumer activists to government nutritionists to the American Dairy Council and its ubiquitous milk moustache ads The image of milk as wholesome and body building has a long history but is it accurate Recently within the newest social movements around food milk has lost favor Vegan anti milk rhetoric portrays the dairy industry as cruel to animals and milk as bad for humans Recently books with titles like Milk The Deadly Poison and Don't Drink Your Milk have portrayed milk as toxic and unhealthy Controversies over genetically engineered cows and questions about antibiotic residue have also prompted consumers to question whether the milk they drink each day is truly good for them In Nature's Perfect Food Melanie Dupuis illuminates these questions by telling the story of how Americans came to drink milk We learn how cow's milk which was associated with bacteria and disease became a staple of the American diet Along the way we encounter 19th century evangelists who were convinced that cow's milk was the perfect food with divine properties brewers whose tainted cow feed poisoned the milk supply and informal wetnursing networks that were destroyed with the onset of urbanization and industrialization Informative and entertaining Nature's Perfect Food will be the standard work on the history of milk      **Towards the Conceptualisation of Maritime Delimitation** Nuno Marques

Antunes, 2022-05-16 This new monograph on maritime delimitation by Dr Nuno Antunes is based on a thesis submitted for the degree of Doctor of Philosophy at the University of Durham The work is one of legal political and technical analysis of an aspect of the law of the sea that is of current interest in all regions of the world      **Predictability and Flexibility in the Law of Maritime Delimitation** Yoshifumi Tanaka, 2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation incorporating all new cases and State practice in this field As with all types of law the law of maritime delimitation should possess a degree of predictability On the other hand as maritime delimitation cases differ

flexible considerations of geographical and non geographical factors are also required in order to achieve equitable results How then is it possible to ensure predictability while taking into account a number of diverse factors in order to achieve an equitable result This is the question at the heart of the law of maritime delimitation This book explores a well balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question first it reviews the evolution of the law of maritime delimitation second it undertakes a comparative study of the case law and State practice and third it critically assesses the law of maritime delimitation in its current form

International Law Donald Rothwell, Stuart Kaye, Afshin Akhtarkhavari, Ruth Davis, 2014-05-02 *International Law Cases and Materials with Australian Perspectives* is the authoritative textbook for Australian international law students Written by a team of experts it examines how international law is developed implemented and interpreted and features comprehensive commentary throughout All core areas of the law are covered with chapters on human rights law of the sea international environmental law and enforcement of international law Cases and treaties are dissected to highlight the key principles rules and distinctive learning points This new edition has been thoroughly updated in line with recent developments in the field and includes a new chapter on the use of force as well as expanded content on the enforcement of international law including sanctions law enforcement against pirates and the 2011 Libyan conflict *International Law* provides clear and rigorous analysis and is an indispensable resource for law students *Cases and Materials on the Law of the Sea* Louis B. Sohn, John Noyes, 2021-10-25 *Cases and Materials on the Law of the Sea* is a thoroughly up to date text that will be used both as a classroom course book and as a treatise and reference guide The text contains engaging teaching materials that systematically introduce law of the sea topics placing them in the context of important themes about the roles of international law and international legal process Historical materials of continuing importance appear alongside new materials that address such topics as maritime terrorism and port security the protection of underwater cultural heritage marine sanctuaries deep sea vent resources and the operation of the International Tribunal for the Law of the Sea and other new international organizations Published under the Transnational Publishers imprint **Cases and Materials on the Law of the Sea, Second Edition** Louis B. Sohn, John Noyes, Erik Franckx, Kristen Juras, 2014-05-08 A special course adoption price is available for an order of six or more copies from a university bookstore Contact sales us brill com or sales nl brill com to learn more This second edition of *Cases and Materials on the Law of the Sea* has been updated to address significant developments that have occurred in the law of the sea since the publication of the first edition in 2004 The text compiles cases treaties U N documents commentaries and other teaching materials that systematically present law of the sea topics while placing those issues in the broader context of international law and international legal process The book incorporates relevant historical materials alongside materials addressing more recent topics such as port security the depletion of fish stocks and the operation of new international institutions Extensive notes and discussion questions engage readers and

enhance their understanding of the materials      *Landmark Cases in International Law* Eric Heinze, Malgosia Fitzmaurice, 2023-07-03 This book contains excerpts in extenso from leading cases in general international law and seeks to provide a greater volume of case law than that currently available on the market It contains no editorial commentary and no secondary literature as these are widely available in other works It can serve either as a principal text or as a supplement to other standard books It is thoroughly up to date including recent ICJ judgments on the Bosnia case the Gabcikovo-Nagymaros Project the Advisory Opinion on Nuclear Weapons and the Lockerbie case It will be of inestimable value to all libraries of international law large and small institutional and private No student or practitioner in the field should be without it

**International Law Reports** E. Lauterpacht, 1970 International Law Reports is the only publication in the world wholly devoted to the regular and systematic reporting in English of courts and arbitrators as well as judgements of national courts

**The Case Law of the International Court / La Jurisprudence de la Cour Internationale** Arthur W. Rovine, E. Hambro, 2024-12-30      **Maritime Boundary** S.P. Jagota, 2021-09-27      **International Law** Donald R Rothwell, Stuart Kaye, Afshin Akhtar-Khavari, Ruth Davis, Imogen Saunders, 2018-06-19 The third edition of International Law Cases and Materials with Australian Perspectives examines how international law is developed implemented and interpreted

Common Science? Jean Barr, Lynda Birke, 1998-07-22 The roots of the exclusion and alienation of women and minorities from scientific knowledge may well lie in how science itself is taught While academic feminist critiques of science and science education are important the authors believe that more attention has to be paid to what non academics think and feel about science Here is a starting point for developing a feminist pedagogy around science in the larger community      Public Religion and the Urban Environment Richard Bohannon, 2012-04-26 Nature and the city have most often functioned as opposites within Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature      **Political Economy of Eco-sustainable Alternatives** Richard Westra, 2025-08-22 Westra recounts how the unceremonious collapse of Soviet style socialism coupled with mounting awareness of unfolding environmental destruction and irreversible climate change opened the door to a new wide ranging social change literature In this exciting book he begins by tracing out the case for the Anthropocene He then provides an unparalleled inclusive critical

exploration of the plurality of progressive designs on offer These include the Green New Deal nowtopias of cooperative solidarity and commoning economies ecofeminism Degrowth society as well as ecosocialism and democratic socialism Westra firstly explains why the Green New Deal program to sustainably develop capitalism is unworkable given the boundedness of resources necessary to generalize the advanced economy way of life it seeks to maintain Secondly while he concurs with much that the new social change literature offers his concern is with the way it abandons a major caution that had been leveled at so called utopian socialists in the past To be sure the problem does not reside with bursts of creative future directed thinking in themselves Rather where difficulties arise is over the paucity of attention devoted to questions of economic coordination and principles of economic viability Westra explains how only by combining several economic principles each operating at a determinate scale and devoted to specific elements of human social and material reproduction will the promise of an equitable eco sustainable human future be realized This unique volume will be of interest to academic specialists and students of political economy economics environmental sustainability sociology and political science Progressive policymakers and social activists will also find its arguments refreshing and compelling

**Engineering Trouble** Rachel A. Schurman, Dennis D. Kelso, 2003-10-06 Talk of genetically engineered organisms GEOs has moved from the hushed corridors of life science corporations to the front pages of major newspapers This book examines these issues from the diverse perspectives of sociology geography law environmental studies and political science

**Sustainability: Sustainability indicators** Michael Redclift, 2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies

**Trading the Genome** Bronwyn Parry, 2004-09-29 In a groundbreaking work that draws on anthropology history philosophy business and law Parry links firsthand knowledge of the operation of the bioprospecting industry to a sophisticated analysis of broader economic regulatory and technological transformations to reveal the complex economic and political dynamics that underpin the new global trade in bio information

**Modern Environmentalism** David Pepper, 1996 An introduction to the history of ideas about nature and environment and how these ideas relate to modern environmental ideologies

If you ally obsession such a referred **Refashioning Nature** book that will present you worth, acquire the agreed best seller from us currently from several preferred authors.
