Refiguring History New Thoughts On An Old Discipline:

Refiguring History Keith Jenkins, 2005-07-08 In this engaging sequel to *Rethinking History* Keith Jenkins argues for a refiguration of historical study At the core of his survey lies the realization that objective and disinterested histories as well as historical truth are unachievable The past and questions about the nature of history remain interminably open to new and disobedient approaches Jenkins reassesses conventional history in a bold fashion His committed and radical study presents new ways of thinking history a new methodology and philosophy and their impact on historical practice This volume is written for students and teachers of history illuminating and changing the core of their discipline Manifestos for History Sue Morgan, Keith Jenkins, Alun Munslow, 2007-09-12 Written by some of the world's leading historians and theorists of history *Manifestos for History* draws together a series of manifestos that address the question of what kinds of histories we ought to be considering and making in and for the twenty first century With a foreword by Joanna Bourke and an afterword by Hayden White these manifestos critical innovative reflexive inspirational are absolutely essential reading not just for those embarking on the study of history but for all those who would think seriously about the nature of history in its present and possible future forms This collection establishes a benchmark for all future considerations upon the discourse of history

History as a Kind of Writing Philippe Carrard, 2017-03-07 In academia the traditional role of the humanities is being questioned by the posts postmodernism poststructuralism and postfeminism which means that the project of writing history only grows more complex In *History as a Kind of Writing* scholar of French literature and culture Philippe Carrard speaks to this complexity by focusing the lens on the current state of French historiography Carrard's work here is expansive examining the conventions historians draw on to produce their texts and casting light on views put forward by literary theorists theorists of history and historians themselves Ranging from discussions of lengthy dissertations on 1960s social and economic history to a more contemporary focus on events actors memory and culture the book digs deep into the how of history How do historians arrange their data into narratives What strategies do they employ to justify the validity of their descriptions Are actors given their own voice Along the way Carrard also readdresses questions fundamental to the field including its necessary membership in the narrative genre the presumed objectivity of historiographic writing and the place of history as a science distinct from the natural and theoretical sciences The Routledge Companion to Accounting History John Richard Edwards, Stephen P. Walker, 2009-05-07 *The Routledge Companion to Accounting History* shows how the seemingly innocuous practice of accounting has pervaded human existence in fascinating ways at numerous times and places from ancient civilisations to the modern day and from the personal to the political Placing the history of accounting in context with other fields of study the collection gives invaluable insights to subjects such as the rise of capitalism the control of labour gender and family relationships racial exploitation the functioning of the state and the pursuit of military conflict An engaging and comprehensive overview also examining geographical differences this Companion is split into key sections

which explore changing technologies used to represent financial and other data historical development of accounting theory and practice accounting institutions and those who perform accounting accountancy and the economy accounting society and culture the role of accounting in the government protection and financing of states including chapters on the important role played by accountancy in religious organizations a review of how the discipline is portrayed in fine art and popular culture and analysis of sharp practice and corporate scandals The Routledge Companion to Accounting History has a breadth of coverage that is unmatched in this growing area of study Bringing together leading writers in the field this is an essential reference work for any student of accounting business and management and history **History and Film** Eleftheria

Thanouli,2018-10-18 History and Film A Tale of Two Disciplines addresses the representation of history in cinema a much argued debate on the need to understand cinematic history in its own terms and develop a certain vocabulary for discussing historical films their relation to public history and their impact on public historical consciousness Eleftheria Thanouli does this by changing the agenda altogether combining a macro level perspective with a micro level one in order to argue that cinematic history is the dominant form of historiography in the 20th century as it succeeded in remediating and repurposing the key formal rhetorical and ideological practices of 19th century professional historiography With case studies ranging from The Thin Red Line and Life is Beautiful to The Fog of War and The Last Bolshevik Thanouli bridges the gap between history and film studies and lays the foundations for a new visual historiography *Sceptical History* Hélène Bowen

Raddeker,2007-04-30 A highly original work in history and theory this survey considers major themes including identity class and sexual difference and weaves them into debates on the nature and point of history Sceptical History arrives at new ways of doing history that consider non Western history and feminist approaches Using a wide range of historical and cultural contexts the study draws extensively on feminist scholarship both feminist history and postcolonial feminism Materialist

Philosophy of History Branko Mitrovic,2020-07-08 What does it mean for our understanding of history if we assume that everything is physical and that no immaterial entities forces or phenomena exist A Materialist Philosophy of History A Realist Antidote to Postmodernism examines the implications of a materialist worldview in contemporary philosophy of history Materialism has wide ranging consequences for historical research as well as for the credibility of various conceptions of the historical past Branko Mitrovic shows how these implications pertain both to the nature of social institutions and the capacities of historical figures to decide act acquire beliefs and communicate and to the methodology of historical research and problems such as the interpretation and the translation of historical documents A materialist view also entails rejecting the view that forces such as culture language or society can construct physical reality or that the historical past is constructed through the work of the historian This book examines these consequences and presents a comprehensive materialist perspective on historical research and the understanding of the historical past *Frank Ankersmit's Lost*

Historical Cause Peter Icke,2012-11-12 The contemporary Dutch historical theorist philosopher Frank Ankersmit an erstwhile

advocate and promulgator of what has become known as the linguistic turn in historical theory is very well known within the discipline His early position with regard to the historical text is frequently discussed and evaluated today and his writings on the subject are often cited However this former narrativist position so robustly and effectively defended by Ankersmit in the past has been progressively marginalized by Ankersmit himself as his current and radically different theoretical position most fully expressed in his recent publication *Sublime Historical Experience* now for him takes precedence Yet despite this radical shift in Ankersmit's position this conspicuous conversion of an eminent prime mover in the field of mainstream language centred historical theory there has been no comprehensive and sustained investigative critique of his various works taken in the whole Consequently there has until now been no close reading and analytical dissection of that whole such that Ankersmit's overall trajectory of philosophical thought might be adequately discerned and perhaps even explained In short there is a vacant space here and the function of this book is precisely to fill that space

The Bloomsbury Handbook of Experimental Approaches to Roman Archaeology Lee Graña Nicolaou, Tatiana Ivleva, Bill Griffiths, 2024-12-12 This volume is the first comprehensive overview of Roman experimental archaeology exploring its key themes methodologies and applications through a diverse array of international case studies Experiments simulations and reconstructions are important methods for understanding the past from uncovering how ancient objects and structures were made used destroyed deposited and affected underground to illuminating the experiences of tasting ancient foods fighting alongside comrades or living in replicated structures Although the incorporation of experimentation has had great success in prehistoric studies greater reliance on the wealth of literary and material sources remaining from the classical period has meant that its potential for Roman studies has yet to be fully realised The 26 chapters in this book are divided into 5 thematic parts each of which opens with a contextualizing introduction that frames the detailed case studies found in individual chapters and showcases the actual and potential diversity of experimentation as applied to the Roman past by scholars re enactors and practitioners in the heritage sector In laying out a detailed guide to Roman experimental archaeology the volume as a whole maps its past present and future and provides a firm foundation for further practical research and collaboration In doing so it reasserts that experiments and reconstructions are a significant resource for testing or developing theories rather than merely artistic replicas and that the vast amount of quantifiable data they yield can be invaluable in support of interpretations of relevant archaeological or historical evidence regardless of the period in question and beyond the confines of academia
