Humphrey has more than met that promise But his contributions go beyond methodology For decades his deeply personal writings on project management have been admired by software engineers worldwide *Reflections on Management* brings together Humphrey s best and most influential essays and articles sharing insights that will be indispensable for anyone who must achieve superior results in software or any other endeavor Collected here for the first time these works offer compelling insights into everything from planning day to day work to improving quality encouraging teamwork to becoming a truly great leader All of these writings share a powerful vision grounded by a life in software that has extended across nearly six decades The vision is this To succeed professionals must effectively manage far more than plans schedules and code they must manage teams bosses and above all themselves *Agile and Lean Concepts for Teaching and Learning* David

Parsons,Kathryn MacCallum,2018-10-24 This book explores the application of agile and lean techniques originally from the field of software development and manufacturing to various aspects of education It covers a broad range of topics including applying agile teaching and learning techniques in the classroom incorporating lean thinking in educational workflows and using team based approaches to student centred activities based on agile principles and processes Demonstrating how agile and lean ideas can concretely be applied to education the book offers practical guidance on how to apply these ideas in the classroom or lecture hall as well as new concepts that could spark further research and development **Reflections on the**

Teaching of Programming Jens Bennedsen,Michael E. Caspersen,Michael Kölling,2008-05-20 This state of the art survey reflecting on the teaching of programming has been written by a group of primarily Scandinavian researchers and educators with special interest and experience in the subject of programming The 14 chapters contributed by 24 authors present practical experience gathered in the process of teaching programming and associated with computing education research work Special emphasis is placed on practical advice and concrete suggestions The authors are all members of the Scandinavian Pedagogy of Programming Network SPoP and bring together a diverse body of experiences from the Nordic countries The 14 chapters of the book have been carefully written and edited to present 4 coherent units on issues in introductory programming courses object oriented programming teaching software engineering issues and assessment Each of these individual parts has its own detailed introduction The topics addressed span a wide range of problems and solutions associated with the teaching of programming such as introductory programming courses exposition of the programming process apprentice based learning functional programming first problem based learning the use of on line tutorials object oriented programming and Java the BlueJ environment to introduce programming model driven programming as opposed to the prevailing language driven approach teaching software engineering testing extreme programming frameworks feedback and assessment active learning technology based individual feedback and mini project programming exams *Philosophy and Engineering: Reflections on Practice, Principles and Process* Diane P Michelfelder,Natasha McCarthy,David E.

Goldberg,2014-01-13 Building on the breakthrough text *Philosophy and Engineering An Emerging Agenda* this book offers 30

chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines

Engineering Distributed Objects Wolfgang Emmerich, Stefan Tai, 2003-06-29 This book constitutes the thoroughly refereed post proceedings of the Second International Workshop on Engineering Distributed Objects EDO 2000 held in November 2000 in Davis California USA The 15 revised full papers presented together with session surveys were carefully reviewed and selected from 30 submissions The book presents topical sections on middleware selection resource management architectural reasoning distributed communication advanced transactions and service integration

Generative Programming and Component Engineering Frank Pfenning, Yannis Smaragdakis, 2003-11-19 This volume constitutes the proceedings of the second International Conference on Generative Programming and Component Engineering GPCE 2003 held September 22-25 2003 in Erfurt Germany sponsored by the NetObjectDays German industrial software development event in cooperation with the ACM SIGPLAN and SIGSOFT societies GPCE was created as an effort to bring together researchers working on both the programming languages and the software engineering side of program generation and component engineering The common theme of program generation and component engineering is the domain specific nature of both approaches Depending on the characteristics of a domain either a generative or a compositional technical solution may be appropriate In just its second year GPCE has shown a lot of promise for building a strong community The response to the call for papers was excellent with 62 submissions to the technical program 2 of which were later withdrawn Each paper received between three and five reviews many of them quite thorough and hopefully valuable to all authors The electronic meeting allowed for depth discussion of all submissions often to a much greater extent than possible in a physical PC meeting As a result 21 papers were selected for presentation at the

conference and are included in this volume together with abstracts for the invited talks by Olivier Danvy and Peri Tarr Of the accepted papers 3 are co authored by PC members from a total of 5 PC submissions We tried hard to ensure fairness and hold PC submissions to a high standard The EDAS conference submission system was used to manage the paper submissions Our EDAS installation was supported by Blair MacIntyre who was particularly helpful in resolving technical issues with the system

Meta-level Architectures and Reflection Akinori Yonezawa, Satoshi Matsuoka, 2001-09-12 This book constitutes the refereed proceedings of the Third International Conference on Metalevel Architectures and Separation of Crosscutting Concerns REFLECTION 2001 held in Kyoto Japan in September 2001 The revised eleven long papers seven short papers and eight posters presented were carefully reviewed and selected from 44 submissions The book offers topical sections on reflection and SOC in Java software adaptation using reflection and SOC techniques reflective middleware for distributed mobile applications testing and verification foundations of reflection and SOC and software methodologies for SOC

Object-Oriented Technology: ECOOP 2000 Workshop Reader Jacques Malenfant, Sabine Moisan, Ana Moreira, 2003-06-26 This book documents the satellite events run around the 14th European Conference on Object Oriented Programming ECOOP 2000 in Cannes and Sophia Antipolis in June 2000 The book presents 18 high quality value adding workshop reports one panel transcription and 15 posters All in all the book offers a comprehensive and thought provoking snapshot of the current research in object orientation The wealth of information provided spans the whole range of object technology ranging from theoretical and foundational issues to applications in various domains
