Confucianism and five books on Taiwan **Traces of Grand Peace** Jaeyoon Song, 2020-10-26 Since the second century BC the Confucian Classics endorsed by the successive ruling houses of imperial China had stood in tension with the statist ideals of big government In Northern Song China 960 1127 a group of reform minded statesmen and thinkers sought to remove the tension between the two by revisiting the highly controversial classic the Rituals of Zhou the administrative blueprint of an archaic bureaucratic state with the six ministries of some 370 offices staffed by close to 94 000 men With their revisionist approaches they reinvented it as the constitution of state activism Most importantly the reform councilor Wang Anshi's 1021 1086 new commentary on the Rituals of Zhou rose to preeminence during the New Policies period ca 1068 1125 only to be swept into the dustbin of history afterward By reconstructing his revisionist exegesis from its partial remains this book illuminates the interplay between classics thinkers and government in statist reform and explains why the uneasy marriage between classics and state activism had to fail in imperial China *Politics* Roberto Mangabeira Unger, 1987 Plasticity Into Power Roberto Mangabeira Unger, 2004-11-17 Volume 3 of *Politics* a work in constructive social theory **Traces of the Sage** James A. Flath, 2016-03-31 The Temple of Confucius Kong Temple in Qufu is the definitive monument to the world's greatest sage From its humble origins deep in China's past the home of Confucius grew in size and stature under the auspices of almost every major dynasty until it was the largest and most richly endowed temple in the Ming and Qing empires The decline of state sponsored ritualism in the twentieth century triggered a profound identity crisis for the temple and its worshipers yet the fragile relic survived decades of neglect war and revolution and is now recognized as a national treasure and a World Heritage Site *Traces of the Sage* is the first comprehensive account of the history and material culture of Kong Temple Following the temple's development through time and across space it relates architecture to the practice of Confucianism explains the temple's phenomenal perseverance and explores the culture of building in China Other chapters consider the problem of Confucian heritage conservation and development over the last hundred years a period when the validity of Confucianism has been called into question and the challenge of remaking Confucian heritage as a commercial enterprise By reconstructing its social life the study interprets Kong Temple as an active site of transaction and negotiation and argues that meaning does not hide behind architecture but emerges from the circulation and regeneration of its spaces and materials The most complete work on a seminal monument in Chinese history through millennia *Traces of the Sage* will find a ready audience among cultural and political historians of imperial and modern China as well as students and scholars of architectural history and theory and Chinese ritual **Divided by a Common Language** Ari Daniel Levine, 2008-09-30 Between 1044 and 1104 ideological disputes divided China's sociopolitical elite who organized into factions battling for control of the imperial government Advocates and adversaries of state reform forged bureaucratic coalitions to implement their policy agendas and to promote like minded colleagues During this period three emperors and two regents in turn patronized a new bureaucratic coalition that overturned the preceding ministerial regime and its policies This ideological and

political conflict escalated with every monarchical transition in a widening circle of retribution that began with limited purges and ended with extensive blacklists of the opposition

Divided by a Common Language is the first English language study to approach the political history of the late Northern Song in its entirety and the first to engage the issue of factionalism in Song political culture Ari Daniel Levine explores the complex intersection of Chinese political cultural and intellectual history by examining the language that ministers and monarchs used to articulate conceptions of political authority Despite their rancorous disputes over state policy factionalists shared a common repertoire of political discourses and practices which they used to promote their comrades and purge their adversaries Conceiving of factions in similar ways ministers sought monarchical approval of their schemes employing rhetoric that imagined the imperial court as the ultimate source of ethical and political authority Factionalists used the same polarizing rhetoric to vilify their opponents who rejected their exclusive claims to authority as well as their ideological program as treacherous and disloyal They pressured emperors and regents to identify the malign factions that were spreading at court and expel them from the metropolitan bureaucracy before they undermined the dynastic polity By analyzing theoretical essays court memorials and political debates from the period Levine interrogates the intellectual assumptions and linguistic limitations that prevented Northern Song politicians from defending or even acknowledging the existence of factions From the Northern Song to the Ming and Qing dynasties this dominant discourse of authority continued to restrain members of China's sociopolitical elite from articulating interests that acted independently from or in opposition to the dynastic polity Deeply grounded in both primary and secondary sources Levine's study is important for the clarity and fluidity with which it presents a critical period in the development of Chinese imperial history and government
