Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-06-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of **Reforming Juvenile Justice A Developmental Approach** was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts

Reforming Juvenile Detention Ira M. Schwartz, William H. Barton, 1994 Juvenile detention facilities confine more youths than do any other type of institution in the United States Essentially jails for juveniles who have been arrested and are awaiting trial these centers tend to be overcrowded inadequately staffed and expensive to operate Juvenile justice officials and state and local policymakers throughout the country are desperately trying to determine the proper use of these facilities and more important how to bring detention systems under control The eleven essays in this collection assess today's juvenile detention system bringing to light problems and inefficiencies and suggesting strategies for improving conditions and eliminating these problems The

authors of these essays pull together data on national trends in detention policies and practices and examine specific cases to paint a grim picture of a system badly in need of reform They also provide practical summaries of reform targets and strategies and case studies of successful reform attempts thus offering clear and much needed guidance toward possible solutions to the nation's juvenile detention crisis

Reforming Juvenile Justice Dan Macallair, 1998 Reforming Juvenile Justice Josine Junger-Tas, Frieder Dünkel, 2009-05-29

Reforming Juvenile Justice deals with fundamental and at times controversial issues in juvenile justice that are universal and go beyond the individual juvenile justice systems of various countries For example What age groups can be transferred to the adult criminal justice system and for what crimes What can be said about the mental and moral development of juveniles in that age group Do we know anything about the effects in terms of recidivism and reconviction by juveniles who have been penalized in the adult system These are the kind of questions that this book written by a group of experts on specific sub topics in juvenile justice tries to answer The book concludes with a number of recommendations for improvements in juvenile justice

Reforming Juvenile Justice Christina L. Lyons, 2015 Youth advocates are seizing on bipartisan interest in criminal justice reform and historically low crime rates to lobby states to lighten sentencing standards for juveniles They also advocate more efforts to prepare troubled teenagers even those convicted of the most violent crimes to be productive members of society In 2012 the U S Supreme Court ruled that mandatory life terms without parole for juveniles were unconstitutional and this fall it will hear a case on whether to make that decision retroactive for adult prisoners who committed their crimes as juveniles But prosecutors and victims rights advocates say youths still must be held accountable for their crimes and judges should be able to refer repeat and violent offenders to adult court Forming a backdrop to the debate is neuroscientific research on adolescent brain development that indicates juveniles reasoning abilities and impulse control are limited well into their 20s The research also suggests that they can change their behavior raising questions about youths culpability and likelihood of rehabilitation

Implementing Juvenile Justice Reform National Research Council, Committee on Law and Justice, Division of Behavioral and Social Sciences and Education, 2014 The report identifies seven hallmarks of a developmental approach to juvenile justice to guide system reform accountability without criminalization alternatives to justice system involvement individualized response based on needs and risks confinement only when necessary for public safety genuine commitment to fairness sensitivity to disparate treatment and family engagement Implementing Juvenile Justice Reform outlines how these hallmarks should be incorporated into policies and practices within OJJDP as well as in actions extended to state local and tribal jurisdictions to achieve the goals of the juvenile justice system through a developmentally informed approach Publisher's description
