Reforming Education The Emerging Systemic Approach:

Reforming Education Stephen L. Jacobson, Robert Berne, 1993-11-08 In this volume leading educators and researchers examine current and future educational reforms and assess the restructuring that has occurred over the past decade in the US and other developed countries Beginning with American school reform initiatives in the 80 s and 90 s contributors go on to examine initiatives in Britain Canada and Germany The final section of the book considers the future of school reform in light of the changing realities of the 90 s concluding with a look at rapidly changing national economies the increasing politicization of education policy and the likely consequences of these changes on schools and educators **Resource**

Allocation and Productivity in Education William L. Boyd, William T. Hartman, 1998-05-26 Resource allocation decisions made by school boards principals and teachers are critical for they determine the adequacy and equity of resources actually made available for specific schools educational programs and individual students The most important resources are often concealed by aggregate state or district measures such as dollars per student For these decisions the most important resources are elements such as basic and supplemental staffing levels staff time funding amounts for textbooks and supplies selection of new equipment particularly technology and support for new or renovated facilities The authors review current practices at each important decision making level in school districts from the school board to the classroom At each juncture the findings are interpreted to reveal both the causes of the practices and their implications for improving school effectiveness This book provides new research in helping to inform and improve resource allocation practices in schools The general conclusion is that improvement in the resource allocation practices in education requires a shift in focus to results instead of inputs a strong emphasis on student learning as the primary focus of decisions and systematic evaluation of results

Cost-Effectiveness Analysis Henry M. Levin, Patrick J. McEwan, 2001 the presentation is lucid and the examples and math are not taxing Furthermore the pedagogical and other improvements in the text are more than marginal they are major and make the purchase of this second edition well worth it even if you have the first EVALUATION AND PROGRAM PLANNING Vol 26 1 Listing all of its virtues would be superfluous Levin and McEwan have produced an excellent resource for teaching a valuable handbook for practitioners and a solid guide to research David Plank COMPARATIVE EDUCATION REVIEW Feb 2002 Every student in evaluation studies and all who aspire to become professional evaluators must have some minimal knowledge of cost effectiveness The content of this book should admirably serve that purpose and should be required reading in all programs that prepare professional evaluators both inside and outside the field of education The purpose of the book is to familiarize the reader with the uses concepts and applications of cost analysis approaches to educational evaluations Careful attention is given to outlining the development and use of cost feasibility cost effectiveness cost benefit and cost utility as complimentary techniques for assisting educational decisions Darrell R Lewis Educational Policy University of Minnesota Those of you teaching cost analysis and management of human services systems should look carefully at this text

Human services professional managing systems are confronted with the problems of being increasingly more efficient This text will help you teach those students entering the field about how to conduct analytical studies of their management practices I award the authors many accolades for an excellent treatment of a very complex topic which is now translated into useable materials for management Jon S Ebeling Political Science California State University Chico Research shows that smaller class sizes generate benefits in the form of higher achievement But does that mean that reducing class size is a cost effective policy change This book by Levin and McEwan provides the analytical tools and concepts for educational policy makers to address that and many other policy questions It defines and distinguishes various concepts of cost analysis including cost effectiveness cost benefit and cost utility analysis and makes a compelling case for their usefulness to policy makers The book offers an essential analytical foundation for all policy makers in education interested in spending money wisely and productively Helen F Ladd Public Policy Studies the nature of costs including how to identify measure and distribute costs measuring effectiveness utility and benefits and lastly the challenges to incorporating cost evaluations in the decision making process In depth exercises are included at the end of each chapter to enable readers to sharpen their ability to evaluate policy options and program effectiveness The feedback to these exercises are provided in an Appendix at the end of the book The authors also provide readers with recommended readings at the end of chapters and a comprehensive bibliography of methodological sources on cost analysis and educational cost studies at the end of the book This book will enable readers to reduce the costs of reaching particular objectives and expand what can be accomplished for any particular budget or resource constraint

Improving America's Schools National Research Council, Board on Science, Technology, and Economic Policy, 1996-11-15 Reform of American education is largely motivated by concerns about our economic competitiveness and American's standard of living Yet few if any of the public school reform agendas incorporate economic principles or research findings *Improving America's Schools* explores how education and economic research can help produce in the words of Harvard's Dale W Jorgenson a unified framework for future education reform This book presents the perspectives of noted experts including Eric A Hanushek author of *Making Schools Work* on creating incentives for improved school and student performance Under Secretary of Education Marshall S Smith on the Clinton Administration's reform program and Rebecca Maynard University of Pennsylvania on the education of the disadvantaged This volume explores these areas The importance of schooling to labor market success The prospects for combining school based management with teacher incentives to gain the best of both approaches The potential of recent innovations in student achievement testing including new value added indicators The economic factors involved in maintaining an adequate stock of effective teachers The volume also explores why despite similar standards of living France the Netherlands England Scotland and the United States produce different levels of education achievement *Improving America's Schools* informs the current debate over school reform with a fresh perspective examples and data This readable volume will be of interest to policymakers

researchers educators and education administrators as well as economists and employers it is also readily accessible to concerned parents and the larger community
