Systems Vahram Stepanyan,2003-09-01 Starting in the early 1990s the Baltics Russia and other BRO countries of the former Soviet Union initiated tax reforms that varied widely at the later stages Recently some of the BRO countries basing decisions on the proposition that lowering of the top marginal income tax rate would significantly benefit economic development and increase tax compliance have initiated a new stage of tax reforms This paper reviews country experiences and suggests that i overall there seems to be little evidence of a substantial improvement in income tax revenues resulting simply from a reduction in the top marginal tax rates and ii in the BRO countries the elasticity of the behavior of economic agents in terms of labor supply saving and investment with respect to income tax rates is not large and a reduction of the existing income tax rates is unlikely to lead to a notable expansion of economic activity **Tax Expenditures--shedding Light on**

State Tax Systems Yuhua Qiao, 2025-03-04 State governments are responsible for most of the direct domestic spending that affects the well being of their citizens Fiscal stability important for state governments to serve the public is influenced by both state tax systems and spending programs This important new book explores how states tax systems have changed particularly in the aftermath of the Great Recession why changes were made and how these policies contributed to state fiscal stability Author Yuhua Qiao examines tax systems including state personal income tax corporate income tax sales and use tax fuel tax healthcare provider tax and sin taxes As fiscal stability largely depends on a tax system with a broad base and diverse sources this book pays special attention to how changes affect the tax base as well as the challenges and opportunities states face in broadening it Case studies within the book provide a rich discussion about the context under which a tax reform is adopted as well as its repercussions The first book dedicated to a comprehensive examination of tax policy changes at the state level since the Great Recession State Tax Systems Policy Making for Fiscal Stability will help state government officials public finance scholars and students gain a better

understanding of a given tax policy's impact on state fiscal health over the long term The Corporate Income Tax System
Mark P. Keightley, Molly F. Sherlock, 2012-10-22 Many economists and policymakers believe that the U S corporate tax system is in need of reform There is however disagreement over why the corporate tax system needs to be reformed and what specific policy measures should be included in a reform To assist policymakers in designing and evaluating corporate tax proposals this report 1 briefly reviews the current U S corporate tax system 2 discusses economic factors that may be considered in the corporate tax reform debate and 3 presents corporate tax reform policy options including a brief discussion of current corporate tax reform proposals The current U S corporate income tax system generally taxes corporate income at a rate of 35% This tax is applied to income earned domestically and abroad although taxes on certain income earned abroad can be deferred indefinitely if that income remains overseas The U S corporate tax system also contains a number of deductions exemptions deferrals and tax credits often referred to as tax expenditures Collectively these provisions reduce the effective tax rate paid by many U S corporations below the 35% statutory rate In 2011 the sum of all corporate tax expenditures was 158.8 billion The significance of the corporate tax as a federal revenue source has declined over time At its post WWII peak in 1952 the corporate tax generated 32.1% of all federal tax revenue In 2010 the corporate tax accounted for 8.9% of federal tax revenue The decline in corporate revenues is a combination of decreasing effective tax rates an increasing fraction of business activity that is being carried out by pass through entities particularly partnerships and S corporations which are not subject to the corporate tax and a decline in corporate sector profitability A particular aspect of the corporate tax system that receives substantial attention is the 35% statutory corporate tax rate Although the U S has the world's highest statutory corporate tax rate the U S effective corporate tax rate is similar to the Organization for Economic Co operation and Development OECD average Further the U S collects less in corporate tax revenue relative to Gross Domestic Product 1.9% in 2009 than the average of other OECD countries 2.8% in 2009 This report discusses a number of economic considerations that may be made while evaluating various corporate tax reform proposals These might include analyses of the likely effect on households of certain reforms also known as incidence analysis Policymakers might also want to consider how certain corporate tax provisions contribute to the allocation of economic resources choosing policies that promote an efficient use of resources Other goals of corporate tax reform may include designing a system that is simple to comply with and administer while also promoting competitiveness of U S corporations Commonly discussed corporate tax reforms include policies that would broaden the tax base i.e. eliminate tax expenditures to finance reduced corporate tax rates Concerns that the U S corporate tax system inefficiently imposes a double tax on corporate income has led some to consider an integration of the corporate and individual tax systems The treatment of pass through income business income not earned by C corporations has also received considerable attention in tax reform debates How the U S taxes income earned abroad and the possibility of moving to a territorial tax system have emerged as important issues Both

the Obama Administration and the House Committee on Ways and Means Chairman David Camp have released tax reform proposals that would change the current tax treatment of U S multinationals
