The Origins Of Neuro Linguistic Programming John

Grinder,2013-05-09 The Origins of NLP brings together the recollections and thoughts of some of the main protagonists from the very early days of NLP In 1971 Richard Bandler and Frank Pucelik were students at Kresge College at the University of California Santa Cruz They had a strong mutual interest in Gestalt Therapy Frank because of his traumatic time in Vietnam and because he had been working with some disaffected and drug addicted kids and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls seminal work The Gestalt Approach and Eyewitness to Therapy They started a local Gestalt group and ran 2 3 sessions a week collaborating and experimenting with the language of therapy They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors John Grinder to observe what they were doing in order that he would hopefully

be able to deconstruct what they were doing that was so effective John was a professor of Linguistics and was instantly impressed with the work that they were doing He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model NLP or Meta as it was known then was born Introducing NLP Joseph O'Connor, John Seymour, 2011-05-01 Some people appear more gifted than others NLP one of the fastest growing developments in applied psychology describes in simple terms what they do differently and enables you to learn these patterns of excellence Introducing NLP by Joseph O Connor a leading international NLP trainer and the author of NLP Workbook offers the practical skills used by outstanding communicators Excellent communication is the basis of creating excellent results NLP skills are proving invaluable for personal development and professional excellence in counseling education and business Introducing NLP includes How to create rapport with others Influencing skills Understanding and using body language How to think about and achieve the results you want The art of asking key questions Effective meetings negotiations and selling Accelerated learning strategies
