Refuting Peter Singers Ethical Theory The Importance Of Human Dignity:

Refuting Peter Singer's Ethical Theory Susan F. Krantz, 2002 **Refuting Peter Singer's Ethical Theory** Susan Krantz, 2002-01-30 Krantz provides a defense of traditional human centered ethics against Peter Singer's ethical theory. Singer favors a Copernican revolution in ethics because he thinks our traditional ethics has collapsed under pressure from medical technology and from advances in the biological understanding of our fellow animals. For nearly thirty years he has argued that the boundaries of the human lifespan and of the human species are so unclear that we must abandon our views that human beings have a special dignity and that the taking of innocent human life is always wrong. Against this, Krantz argues that in today's world human life has been cheapened and the values of the marketplace have begun to govern medical care and organ donation, birth and death. In fact, this is just a foretaste of the world to come if Singer's ethical theory succeeds in replacing traditional human centered ethics. What is required is not the abandonment of human dignity and of the sanctity of human life but rather a renewed understanding of how principles based on these ideas can be applied in the twenty-first century. Scholars, students, and general readers involved with ethical and contemporary philosophy issues will find this book interesting.

Humanity in God's Image Claudia Welz, 2016 A study which suggests human beings are created in the image of an invisible God, an idea that can only be conceptualized in the imagination.

The Philosophy and Practice of Medicine and Bioethics Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence-based medicine, which claim to be but often are not scientific. It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine. No specific or absolute recommendations are given regarding medical treatment, moral approaches, or legal advice. Given rather is discussion about each issue involved and the strongest arguments indicated. Each argument is subject to further critical analysis. This is the same position as with any philosophical, medical, or scientific view. The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher. On the contrary, it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine. These would be those philosophers who engage in practical philosophy such as the pragmatists, humanists, naturalists, and ordinary language philosophers. A new definition of our own philosophy of life emerges and it is necessary to have one. Good lifestyle no longer means just abstaining from cigarettes, alcohol, and getting exercise. It also means living a holistic life which includes all of one's thinking, personality, and actions. This book also includes new ways of thinking. In this regard, the Metaphorical Method is explained, used, and exemplified in depth, for example, in the chapters on care, egoism, and altruism, letting die, etc.

Critical Management Ethics T. Klikauer, 2010-07-01 Written in the European tradition of Kant's philosophical trilogy on critique and Hegel's concept of ethical life, it outlines the great traditions in ethical philosophy: Aristotelian virtue ethics, Kantian ethics, and utilitarianism. It presents modern ethics from

Nietzsche Adorno and Habermas to Kohlberg's stages of moral development

God of All Comfort Scott Harrower, 2019-04-24 How does God respond to trauma in a world full of horrors Beyond their physical and emotional toll the horrors of this world raise difficult theological and existential questions Where is God in the darkest moments of the human experience Is there any hope for recovery from the trauma generated by these horrors There are no easy answers to these questions In God of All Comfort Scott Harrower addresses these questions head on Using the Gospel of Matthew as a backdrop he argues for a Trinitarian approach to horrors showing how God in his triune nature reveals himself to those who have experienced trauma He explores the many ways God relates restoratively with humanity showing how God's light shines through the darkness of trauma

Debating Humanism Dolan Cummings, 2018-08-14 Features a cross disciplinary dialogue among writers who are sympathetic to the humanist tradition and interested in developing a new humanist project through debate

The Animal Experimentation Debate David E. Newton, 2013-05-09 Reviewing the topic from antiquity to the present day this book examines the debate over the use of animals in research in a fair and balanced way The debate over the use of nonhuman animals in experimental research has gone on for centuries and it continues as vigorously today as it ever has In fact in the last decade the controversy has intensified making animal testing a topic at the highest level of debate of any socioscientific issue in the United States This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation and provides biographies of individuals and descriptions of organizations that have

been involved in the debate over the centuries Additionally it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health *An Anthropology of Robots and AI* Kathleen Richardson, 2015-02-11 This book explores the making of robots in labs at the Massachusetts Institute of Technology MIT It examines the cultural ideas that go into the making of robots and the role of fiction in co constructing the technological practices of the robotic scientists The book engages with debates in anthropological theorizing regarding the way that robots are reimagined as intelligent autonomous and social and weaved into lived social realities Richardson charts the move away from the worker robot of the 1920s to the social one of the 2000s as robots are reimagined as companions friends and therapeutic agents
