Regenerated Cellulose Fibres

V Nierstrasz, A Cavaco-Paulo

Regenerated Cellulose Fibres:

Regenerated Cellulose Fibres C Woodings, 2001-04-30 This is a comprehensive work by industrial and academic specialists providing up to date information on the chemistry physics process technology applications and markets for man made cellulosic fibres It covers the properties and applications of viscose rayon cuprammonium rayon and the new solvent spun fibres as well as considering their relationships with the natural cellulose such as cotton and the synthetic polymer fibres such as polyester This overview of the only truly naturally recyclable fibres and the latest manufacturing techniques that are being developed to produce them will be of interest to professionals in textile production research and development manufacturing chemists and textile technologists The nonwovens and paper industries that use cellulose as a basic ingredient of their products will also find it valuable as will medical textiles producers and geotextiles engineers *The Structure of Regenerated Cellulose Fibres* S. Haig Zeronian, Textiles, 1955

Fundamentals of Natural Fibres and Textiles Md. Ibrahim H. Mondal, 2021-03-20 The textile industry is focused in its search for alternative green fibres with the aim of providing high quality products which are fully recyclable and biodegradable Natural textile materials from renewable sources play an increasingly important role in the industry due to their unique properties and functionality over synthetic fibres as well as their sustainability *Fundamentals of Natural Fibres and Textiles* covers all the fundamental and basic information about natural fibres and textiles Many different fibres are covered from their origin through processing properties and applications The latest methods for characterisation and testing of natural fibres are all addressed with reference to cutting edge industry trends This uniquely comprehensive approach to the topic provides the ideal entry point to natural fibres for textile and clothing scientists engineers designers researchers students and manufacturers of such products Explains the characteristics of natural fibres to show how they compare to synthetic fibres for a range of purposes Provides an overview of the environmental impact of the processing of fibres and how this creates industrial waste Covers a wide range of natural fibres in detail from traditional silk and wool to electrospun biopolymers Provides the latest updates on technologies for designing natural fibres and applying them to the development of new products

Advances in Textile Biotechnology V Nierstrasz, A Cavaco-Paulo, 2010-09-01 Biotechnology has impacted the textiles industry through the development of more efficient and environmentally friendly manufacturing processes as well as enabling the design of improved textile materials This book will provide a thorough overview of current and future focuses of biotechnology in the fibre and textile industry Part one of the book opens with a review of technologies involved in textile biotechnology Chapters explore the design and engineering of novel enzymes for textile applications and developments in processes and equipment for enzymatic textile treatments Part two investigates the modification of particular fibres through the use of biotechnology Key topics include the treatment of wool and silk fibres and the enzymatic treatment versus conventional processing of cotton With expert contributions from leaders in their fields *Advances in textile biotechnology* is a comprehensive guide for

those in the textile and fibre industry as well as experts in the biology chemical and environmental engineering industries Provides a thorough overview of current and future focuses of biotechnology in the fibre and textile industry Explores production of enzymes searching for efficient production systems and also documents the advantages and limitations associated with the process Reviews the debate surrounding enzymatic treatment versus conventional processing of cotton along with engineering of plants for improved fibre qualities

The European Polysaccharide Network of Excellence (EPNOE) Patrick Navard, 2012-12-13 This book provides an essential overview of the science of polysaccharides It both approaches polysaccharides as a polymer class and provides detailed descriptions of most major polysaccharides cellulose mannan xylan chitin chitosan cyclodextrines Owing to the multidisciplinary character of the European Polysaccharide Network of Excellence EPNOE the book describes all main aspects of polysaccharide science and technology biology enzymology physics chemistry materials science and processing Notations and concepts follow a uniform format throughout the whole work in order to create a valuable reference book on the field of polysaccharide science Owing to the major importance of industry in the EPNOE concrete applications are also described in detail

Handbook of Properties of Textile and Technical Fibres A. R. Bunsell, 2018-01-02 Handbook of Properties of Textile and Technical Fibres Second Edition introduces tensile properties and failure and testing of fibers also examining tensile properties and the failure of natural fibers such as cotton hemp flax agave wool and silk Next the book discusses the tensile properties and failure of synthetic fibers ranging from polyamide polyester polyethylene and carbon fibers Chapters provide a general background of the fiber including its manufacture microstructure factors that affect tensile properties and methods to improve tensile failure With its distinguished editor and international contributors this book is an important reference for fiber scientists textile technologists engineers and academics Offers up to date coverage of new and advanced materials for the fiber and textile industries Reviews structure property relationships of high performance natural synthetic polymer and inorganic fibers Offers a range of perspectives on the tensile properties of fibers from an international team of authors with diverse expertise in academic research and in textile development and manufacture

Natural Fibers, Plastics and Composites Frederick T. Wallenberger, Norman Weston, 2003-10-31 Natural Fibers Plastics and Composites deals with plant and animal derived natural fibers natural composite matrix materials and biocomposites which are beginning to find their way into commercial applications in today's market Some represent already commercial technologies or commercial developments and others represent significant recent research advances The book reviews the sources structures properties and applications of the new materials It serves as an introduction to a rapidly growing field of science and technology and it aims to support fundamental research to assist scientists and designers in industry and to facilitate materials science instruction in universities and colleges

Sustainable Fibres and Textiles Subramanian Senthilkannan Muthu, 2017-05-29 Sustainable Fibres and Textiles provides a whole lifecycle approach to the subject of sustainable textiles from fiber

production through manufacturing and low energy care and recycling The scientific industrial regulatory and social aspects of this lifecycle are explored by an expert author team who bring global perspectives to this important subject The first part of the book provides detailed coverage of the sustainable production of textiles with chapters devoted to each of the main fiber types including new biosynthetic fibers such as textiles produced from Polylactic Acid PLA The second part examines sustainable production methods focusing on low carbon production technologies and sustainable low pollution methods of processing and dyeing fabrics The final sections explore the benefits of textiles designed to enable low energy fabric care via both finishes used to treat the fabric and better care labelling Re use and recycling options are also covered as are ethical aspects such as fair trade fabrics Presents an integrated understanding of sustainability through the whole supply chain from agriculture through manufacturing and fabric care to recycling Teachers users how to make optimal choices of fiber and manufacturing technologies to achieve the sustainable production of high quality apparel and other textile products Provides a wider understanding of emerging regulatory frameworks that will shape the future of sustainable textiles

Handbook of Natural Fibres Ryszard M. Kozłowski, Maria Mackiewicz-Talarczyk, 2020-01-25 The Handbook of Natural Fibres Volume Two Processing and Applications Second Edition provides detailed coverage of the latest processing techniques and industrial applications of a wide range of natural fibers Natural fibrous resources both lignocellulosic and protein ones are renewable biodegradable and nontoxic making them an important source of sustainable textile solutions A broad range of sources of natural fibers are covered in the book including flax hemp bast jute coir linen cotton and silk This wealth of expert information provides a uniquely detailed reference for the processing characterization selection and application of natural fibers Connects natural fibers to a wide range of industries including construction automotive packaging and medical Helps readers appraise natural fibers on the basis of their mechanical electrokinetic antimicrobial or flame retardant qualities Provides a rare glimpse of emerging manufacturing methods for silk

Biocomposites for High-Performance Applications Dipa Ray, 2017-05-15 Biocomposites for High Performance Applications Current Barriers and Future Needs Towards Industrial Development focuses on future research directions that will make biocomposites a successful player in the field of high strength structural applications With contributions from eminent academic researchers and industrial experts who have first hand experience on the advantages disadvantages of biocomposites in their daily lives the book examines the industrial development of biocomposite products identifying the current barriers and their future industrial needs Topics covered include recent research activities from academia in the biocomposite research field valuable thoughts and insights from biocomposite manufacturing industries the strength and weaknesses of biocomposite products and the practical issues that need to be addressed to reach the next level Highlights the practical issues involved in biocomposites research Contains contributions from eminent academic researchers and industrial experts Discusses recent research activities from academia in the biocomposite research field along with valuable thoughts and insights from biocomposite manufacturing industries
