Changing Work and Community Identities in European Regions John Kirk, Sylvie Contrepois, Steve Jefferys, 2016-03-09 This book juxtaposes the experiences of regions that have lived or are living through industrial transition in coal mining and manufacturing centres throughout Europe opening the way to a deeper understanding of the intensity of change and of how work helps shape new identities

The Global Economy, National States and the Regulation of Labour Paul Edwards,Tony Elger,2014-06-03 The implications of globalization for labour are more often asserted than analyzed This collection and its companion volume Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards

Welfare Research Fiona William,Jennie Popay,Ann Oakley,2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications
