*The Sectarian Spirit* Paul T. Phillips, 1982      *Religion and Society in a Cotswold Vale* Albion M. Urdank, 2024-03-29

During the English Industrial Revolution the Vale of Nailsworth was a rural industrial settlement and a center of evangelical Nonconformity Why did the transition to the factory system bring deindustrialization and social decline rather than long term advancement Albion Urdank investigates the modernization of Nailsworth from many perspectives revealing the experience and the mentalit of ordinary people in their ecological economic and social environments His innovative approach in the tradition of the Leicester and Annales schools contributes to the historical literature on popular religion secularization local history and European industrialization and will appeal to a wide spectrum of interdisciplinary interests This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990      *Religion and the Working Class in Nineteenth-Century Britain* Hugh Mcleod, 1984-11-11 It might have been little more than an annotated bibliography It is in fact an important independent study in its own right The Expository Times

**The Victorian Music Hall** Dagmar Kift, 1996-10-24 With the exception of the occasional local case study music hall history has until now been presented as the history of the London halls This book attempts to redress the balance by setting music hall history within a national perspective Kift also sheds a new light on the roles of managements performers and audiences For example the author confutes the commonly held assumption that most women in the halls were prostitutes and shows them to have been working women accompanied by workmates of both sexes or by their families She argues that before the 1890s the halls catered predominantly to working class and lower middle class audiences of men and women of all ages and were instrumental in giving them a strong and self confident identity The hall s ability to sustain a distinct class awareness was one of their greatest strengths but this factor was also at the root of many of the controversies which surrounded them These controversies are at the centre of the book and Kift treats them as test cases for social relations which provide fresh insights into nineteenth century British society and politics      **The Mid-Victorian Generation** K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone s first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen s study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national

traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation

**The Dynamics of Working-class Politics** Michael Savage, 1987 In an important contribution to a perennial debate Dr Savage argues that over concentration on national labour movements has ignored the variety of local political strategies developed by working class movements these variations show that working class politics develops on the basis of different types of solidarity rooted in various forms of local social structure Such mutations are not a recent development testifying to the decline of class politics but have been an enduring feature of capitalist societies In a detailed case study of Preston Lancashire Dr Savage shows how the strategies and strengths of the various political parties changed between 1880 and 1940 as workplace solidarities gave way to neighbourhood based ones and as changing gender relations in the textile industry facilitated the organisation of women Its sophisticated use of sociological theory and detailed empirical analysis distinguish *The Dynamics of Working Class Politics* as one of the more important essays in historical sociology published in past years

The North East of England was regarded as a major Catholic stronghold in the nineteenth century This was in no small part due to the large numbers of Irish Catholic immigrants who contributed greatly towards the region's unprecedented expansion with the Catholic population in Newcastle and County Durham increasing from 23 250 in 1847 to 86 397 in 1874 How far were the Catholic Church and its incoming Irish adherents accepted by the Protestant population of North East England This book will provide a timely reassessment of the hitherto accepted view that local cultural factors reduced the anti Catholic and anti Irish feeling in the North East that seemed deep seated in other areas This book demonstrates the way in which north eastern anti Catholicism was far from homogenous and monolithic cutting across the political and religious divide It highlights the proactive role of the Catholic communities in sectarian controversy whose assertiveness contributed ironically towards the development of local anti Catholic feeling Finally it will show how large scale Irish immigration ensured that the North East experienced regular outbreaks of sectarian violence whether English Irish or intra Irish which were influenced by local conditions and circumstances This book is the first comprehensive regional study of Victorian anti Catholicism By examining areas of enquiry not previously considered in broader studies its findings have wider implications for understanding the prevalent and all encompassing nature of anti Catholicism generally It also contributes towards the wider debate on North East regional identity by questioning the continued credibility of a paradigm which views the region as exceptionally tolerant      **A Mad, Bad, and Dangerous People?** Boyd Hilton, 2008-06-19 In a period scarred by apprehensions of revolution war invasion poverty and disease elite members of society lived in fear of revolt Boyd Hilton examines the changes in society between 1783 1846 and the transformations from raffish and rakish behaviour to the new norms of Victorian respectability
