Securing The Future Investing In Children From Birth To College:

Securing the Future Sheldon Danziger, Jane Waldfogel, 2000-06-29 More than ever the economic health of a country depends upon the skills knowledge and capacities of its people How does a person acquire these human assets and how can we promote their development Securing the Future assembles an interdisciplinary team of scholars to investigate the full range of factors pediatric psychological social and economic that bear on a child's development into a well adjusted economically productive member of society A central purpose of the volume is to identify sound interventions that will boost human assets particularly among the disadvantaged The book provides a comprehensive evaluation of current initiatives and offers a wealth of new suggestions for effective public and private investments in child development While children from affluent highly educated families have good quality child care and an expensive education provided for them children from poor families make do with informal child care and a public school system that does not always meet their needs How might we best redress this growing imbalance The contributors to this volume recommend policies that treat academic attainment together with psychological development and social adjustment Mentoring programs for example promote better school performance by first fostering a young person's motivation to learn Investments made early in life such as preschool education are shown to have the greatest impact on later learning for the least cost In their focus upon children however the authors do not neglect the important links between generations Poverty and inequality harm the development of parents and children alike Interventions that empower parents to fight for better services and better schools are also of great benefit to their children Securing the Future shows how investments in child development are both a means to an end and an end in themselves They benefit the child directly and they also help that child contribute to the well being of society This book points us toward more effective strategies for promoting the economic success and the social cohesion of future generations A Volume in the Ford Foundation Series on Asset Building **Handbook of the Economics of Education** Eric A

wealth for low income individuals and communities economic human social and natural assets Economic assets include equity retirement savings and other financial holdings Human assets include education knowledge skills and talents Included among social assets are the networks of trust and reciprocity that bind communities together Natural assets include the land water air and other natural resources we depend on for survival Owing Up also examines five organizations at the forefront of building assets for the poor Their stories are told through the eyes of individuals whose lives they have helped transform These organizations have all developed effective strategies for building assets and Miller Adams identifies them as models to be emulated elsewhere The profiled organizations include Neighborhoods Incorporated of Battle Creek Michigan Its innovative strategies seek to increase home ownership and promote neighborhood revitalization in poor communities The Watershed Research and Training Center This local organization strengthens the natural resource based eco **Whither Opportunity?** Greg J. Duncan, Richard J. Murnane, 2011-09-01 As the incomes of affluent and poor families have diverged over the past three decades so too has the educational performance of their children But how exactly do the forces of rising inequality affect the educational attainment and life chances of low income children In Whither Opportunity a distinguished team of economists sociologists and experts in social and education policy examines the corrosive effects of unequal family resources disadvantaged neighborhoods insecure labor markets and worsening school conditions on K 12 education This groundbreaking book illuminates the ways rising inequality is undermining one of the most important goals of public education the ability of schools to provide children with an equal chance at academic and economic success The most ambitious study of educational inequality to date Whither Opportunity analyzes how social and economic conditions surrounding schools affect school performance and children's educational achievement The book shows that from earliest childhood parental investments in children's learning affect reading math and other attainments later in life Contributor Meredith Phillip finds that between birth and age six wealthier children will have spent as many as 1 300 more hours than poor children on child enrichment activities such as music lessons travel and summer camp Greg Duncan George Farkas and Katherine Magnuson demonstrate that a child from a poor family is two to four times as likely as a child from an affluent family to have classmates with low skills and behavior problems attributes which have a negative effect on the learning of their fellow students As a result of such disparities contributor Sean Reardon finds that the gap between rich and poor children's math and reading achievement scores is now much larger than it was fifty years ago And such income based gaps persist across the school years as Martha Bailey and Sue Dynarski document in their chapter on the growing income based gap in college completion Whither Opportunity also reveals the profound impact of environmental factors on children's educational progress and schools functioning Elizabeth Ananat Anna Gassman Pines and Christina Gibson Davis show that local job losses such as those caused by plant closings can lower the test scores of students with low socioeconomic status even students whose parents have not lost their jobs They find that community wide stress is most likely the culprit Analyzing

the math achievement of elementary school children Stephen Raudenbush Marshall Jean and Emily Art find that students learn less if they attend schools with high student turnover during the school year a common occurrence in poor schools And David Kirk and Robert Sampson show that teacher commitment parental involvement and student achievement in schools in high crime neighborhoods all tend to be low For generations of Americans public education provided the springboard to upward mobility This pioneering volume casts a stark light on the ways rising inequality may now be compromising schools functioning and with it the promise of equal opportunity in America *Soldiers to Citizens* Suzanne Mettler,2007-09-10 Drawing on extensive interviews and surveys with hundreds of members of the greatest generation Suzanne Mettler finds that by treating veterans as first class citizens and in granting advanced education the G I Bill inspired them to become the active participants thanks to whom memberships in civic organizations soared and levels of political activity peaked

Social Capital and Poor Communities Susan Saegert,J. Phillip Thompson,Mark R. Warren,2002-01-10 Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence Social Capital and Poor Communities shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods Trust and cooperation among residents and local organizations such as churches small businesses and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families Social Capital and Poor Communities examines civic initiatives that have built affordable housing fostered small businesses promoted neighborhood safety and increased political participation At the core of each initiative lie local institutions church congregations parent teacher groups tenant associations and community improvement alliances The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully transferred from smaller goals to broader political advocacy For example community based groups often become platforms for leaders hoping to run for local office Church based groups and interfaith organizations can lobby for affordable housing job training programs and school improvement Social Capital and Poor Communities convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services As the contributors make clear this task is neither automatic nor easy The book s frank discussions of both successes and failures illustrate the pitfalls conflicts of interest resistance from power elites and racial exclusion that can threaten even the most promising initiatives The impressive evidence in this volume offers valuable insights into how goal formation leadership and cooperation can be effectively cultivated resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty A Volume in the Ford Foundation Series on Asset Building Low-Income Students and the Perpetuation of Inequality Gary A. Berg,2016-05-13 Drawing upon quantitative data gathered from the U S Census and U S Department of Education as well as interviews with students from a variety of socio economic and ethnic

backgrounds Low Income Students and the Perpetuation of Inequality examines the question of who really benefits from public higher education It engages with questions of social capital opportunity funding and access to education presenting a rich discussion of social mobility the value of college education and the impact of education upon the redistribution of income A thorough exploration of the real impact of college on American society this volume will appeal to social scientists with interests in education social capital social stratification class and social mobility
