Seed Policy, Legislation and Law Neils P Louwaars, 2002-08-12 Learn what it takes to create and implement a truly successful seed policy This unique book brings together international experts on seed policy and law While other books approach the subject from the perspective of seed industry development and privatization Seed Policy Legislation and Law makes clear that a successful national seed policy must be based on a thorough analysis of connected issues such as biodiversity and rural development In addition to giving you an essential overview of seed regulatory reform this book will also bring you up to date on recent developments in the field such as intellectual property and the biosafety of GMOs Seed Policy Legislation and Law examines quality control issues in developing countries case studies from Turkey Uganda and Bangladesh property rights for plant varieties the regulation of genetically modified seeds in emerging economies agro biodiversity as it relates to seed policy why a farmer seed system is essential in a national seed sector the impact of the transition from central seed sector planning to a free market how international seed associations can impact policy development new technological developments like GURTs and appropriate policy responses

Sustainable Agriculture Reviews Eric Lichtfouse, 2014-10-01 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children It is a discipline that addresses current issues climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion This series gathers review articles that analyze current agricultural issues and knowledge then proposes alternative solutions

Agrobiodiversity and the Law Juliana Santilli, 2012-03-15 A wide range of crop genetic resources is vital for future food security Loss of agricultural biodiversity increases the risk of relying on a limited number of staple food crops However many laws such as seed laws plant varieties protection and access and benefit sharing laws have direct impacts on agrobiodiversity and their effects have been severely underestimated by policy makers This is of concern not only to lawyers but also to agronomists biologists and social scientists all of whom need clear guidance as to the relevance of the law to their work This book analyzes the impact of the legal system on agrobiodiversity or agricultural biodiversity the diversity of agricultural species varieties and ecosystems Using an interdisciplinary approach it takes up the emerging concept of agrobiodiversity and its relationship with food security nutrition health environmental sustainability and climate change It assesses the impacts on agrobiodiversity of key legal instruments including seeds laws the International Convention for the Protection of New Varieties of Plants plant breeders rights the Convention on Biological Diversity regarding specifically its impact on agrobiodiversity and the International Treaty on Plant Genetic Resources for Food and

Agriculture It also reviews the options for the implementation of these instruments at the national level in several countries It discusses the interfaces between the free software movement the commons movement and seeds as well as the legal instruments to protect cultural heritage and their application to safeguard agrobiodiversity rich systems Finally it analyzes the role of protected areas and the possibility of using geographical indications to enhance the value of agrobiodiversity products and processes

thuringiensis A Cornerstone of Modern Agriculture is an essential resource for advanced students and technical specialists working in agriculture biotechnology entomology pest management and crop sciences Stakeholders will also find it invaluable in regulatory decision making about genetically engineered crops pesticide use and crop protection **Towards an Ecological Intellectual Property** David J Jefferson, 2020-06-08 This book focuses on analysing how legal systems set the terms for interactions between human beings and plants The story that the book recounts is one of experimental lawmaking in Ecuador a country where over the past decade governmental officials and civil society advocates have attempted to reconfigure how human individuals and institutions relate to nature by following an eco centric approach to lawmaking In doing so Ecuadorian legislators administrators and judges have taken seriously the ontologies of non human entities including plants through a process that has required the continuous navigation of tensions with certain logics that pervade conventional legal regimes The book endeavours to disrupt these conventional assumptions and approaches to lawmaking by taking seriously alternative strategies to reconstitute interactions between people and plants In doing so the book argues in favour of an ecological turn in laws that govern vegetal life The analysis is based on a close examination of the experiences that lawmakers in Ecuador have had when experimenting with innovative approaches to re form relationships between human and non human beings Concretely these experiments have yielded constitutional legislative and regulatory changes that inform the inquiry of how intellectual property and plant genetic resources laws both in Ecuador and worldwide could become more ecological in nature The argument that the book develops is based on extensive ethnographic fieldwork and empirical research in Ecuador complemented by archival and doctrinal legal analysis The contents of the book will be of interest to an academic audience of legal scholars and postgraduate students in law in addition to scholars and students in the fields of anthropology sociology socio legal studies and science and technology studies **Participatory Plant Breeding: Concept and Applications** Atul Bhargava, Shilpi Srivastava, 2019-04-13 Plant breeding has played a significant role in the development of human civilizations Conventional plant breeding has significantly improved crop yield by genetically manipulating agronomically important traits However it has often been criticized for ignoring indigenous germplasm failing to address the needs of the marginal and the poor farmers and emphasizing selection for broad instead of local adaptation Participatory plant breeding PPB is the process by which the producers and other stakeholders are actively involved in a plant breeding programme with opportunities to make decisions throughout The Working Group on Participatory Plant Breeding PPBwg was established in 1996 under the framework of the Consultative Group on International Agricultural Research CGIAR Research in PPB can promote informed participation and trust in research among consumers and producers and in recent years PPB has had a significant impact on food production by quickly and cost effectively producing improved crop varieties At the same time there has been significant research in the area PPB offers significant advantages that are particularly relevant to developing countries where large investments in plant breeding have not led to

increased production especially in the marginal environments In addition to the economic benefits participatory research has a number of psychological moral and ethical benefits which are the consequence of a progressive empowerment of the farming communities PPB can empower groups such as women or less well off farmers that are traditionally left out of the development process This book explores the potential of PPB in the coming decades The topic is more relevant since international breeding efforts for major crops are aimed at decentralizing local breeding methods to better incorporate the perspective of end users into the varietal development process The first book incorporating the upcoming research on this novel breeding approach it reviews the important tools and applications of PPB in an easy to read succinct format with illustrations to clarify these complex topics It provides readers with a basic idea of participatory plant breeding as well as advances in the field and insights into the future to facilitate the successful integration of farmers into breeding programmes This book is a valuable reference resource for agriculturists agricultural advisers policy makers NGOs post doctoral students and scientists in agriculture horticulture forestry and botany

Agro-industries for Development Carlos A. Da Silva,2009 The development of competitive agro industries is crucial for creating employment and income opportunities as well as enhancing the quality of and demand for farm products Agro industries can have a real effect on international development by increasing economic growth and reducing poverty in both rural and urban areas of developing countries However in order to avoid adverse effects to vulnerable countries and people sound policies and strategies for fostering agro industries are needed *Agro Industries for Development* highlights the current status and future course for agro industries and brings attention to the contributions this sector can make to international development The book includes contributions from agro industry specialists academic experts and UN technical agencies chapters address the strategies and actions required for improving agro industrial competitiveness in ways that can create income generate employment and fight poverty in the developing world This book is a co publication with FAO and UNIDO

Food Sovereignty in International Context Amy Trauger,2015-02-11 Food sovereignty is an emerging discourse of empowerment and autonomy in the food system with the development of associated practices in rural and some urban spaces While literature on food sovereignty has proliferated since the first usage of the term in 1996 at the Rome Food Summit most has been descriptive rather than explanatory in nature and often confuses food sovereignty with other movements and objectives such as alternative food networks food justice or food self sufficiency This book is a collection of empirically rich and theoretically engaged papers across a broad geographical spectrum reflecting on what constitutes the politics and practices of food sovereignty They contribute to a theoretical gap in the food sovereignty literature as well as a relative shortage of empirical work on food sovereignty in the global North much previous work having focussed on Latin America Specific case studies are included from Canada Norway Switzerland southern Europe UK and USA as well as Africa India and Ecuador The book presents new research on the emergence of food sovereignties It offers a wide variety of empirical examples and a theoretically engaged framework for explaining the aims of actors and organizations working toward autonomy and democracy in the food system Intellectual Property Rights ,2006 *Agrobiodiversity Conservation* Nigel

Maxted,2012 Based on the 2010 conference Towards the establishment of genetic reserves for crop wild relatives and landraces in Europe this book is the cutting edge discussion of agrobiodiversity conservation By considering the benefits of understanding and preserving crop wild relatives and landraces it encompasses issues as wide ranging and topical as habitat protection ecosystem health and food security Focusing on Europe but globally relevant *Agrobiodiversity Conservation* is ideal for postgraduate students of conservation and environmental studies conservation professionals policy makers and researchers American Book Publishing Record ,2002 **Los derechos de propiedad intelectual y la libre**
