Integrated Rural Development John M. Cohen,1987 International Agricultural Law and Policy Hope

Johnson,2018-10-26 From soil degradation and biodiversity loss to the coexistence of malnutrition and obesity many of the largest challenges facing humanity today are underpinned by food and agriculture systems In order to alleviate and resolve them global governance of food and agriculture needs to be reformed Unravelling the array of international regulatory instruments this timely book provides the first systematic analysis of the international law surrounding food systems International Agricultural Law and Policyprovides a systems based analysis of the rules that intersect with the physical elements of agriculture against a framework of commonly held norms The author conducts a comprehensive examination not only of the rules but also the implementation and broader socioeconomic scientific and political context By exploring and clarifying the relationship between food security and the right to food and sustainability Johnson closes the gap between the disparate international rules that govern food and agriculture while exploring the practical implications of these overlapping regimes This unique book is an invaluable resource for lawyers and social scientists working within food and agriculture systems and their governance and lays the much needed groundwork for future research For policy makers in the food and agricultural space this book provides a wide ranging and innovative analysis of the global regulatory landscape that influences law and policy processes
