Seeing Shapes:

Seeing Things Kartik Nair, 2024-02-13 In 1980s India the Ramsay Brothers and other filmmakers produced a wave of horror movies about soul sucking witches knife wielding psychopaths and dark caped vampires *Seeing Things* is about the sudden cuts botched prosthetic effects continuity errors and celluloid damage in these movies Such moments may very well be failures of various kinds but in this book Kartik Nair reads them as clues to the conditions in which the films were once made censored and seen offering a view from below of the world's largest film culture Combining extensive archival research and original interviews with close readings of landmark films including *Purana Mandir* *Veerana* and *Jaani Dushman* this book tracks the material coordinates of horror cinema's spectral images In the process *Seeing Things* discovers a spectral materiality one that informs Bombay horror's haunted houses grotesque bodies and graphic violence and gives visceral force to our experience of the genre's globally familiar conventions

Shapes of Imagination George Stiny, 2022-11-15 Visual calculating in shape grammars aligns with art and design bridging the gap between seeing Coleridge's imagination and combinatoric play Coleridge's fancy In *Shapes of Imagination* George Stiny runs visual calculating in shape grammars through art and design incorporating Samuel Taylor Coleridge's poetic imagination and Oscar Wilde's corollary to see things as they aren't Many assume that calculating limits art and design to suit computers but shape grammars rely on seeing to prove otherwise Rules that change what they see extend calculating to overtake what computers can do in logic and with data and learning Shape grammars bridge the divide between seeing Coleridge's imagination or esemplastic power and combinatoric play Coleridge's fancy Stiny shows that calculating without seeing excludes art and design Seeing is key for calculating to augment creative activity with aesthetic insight and value Shape grammars go by appearances in a full fledged aesthetic enterprise for the inconstant eye they answer the question of what calculating would be like if Turing and von Neumann were artists instead of logicians Art and design are calculating in all their splendid detail
