The Raven's Tail Cheryl Samuel, 1987 To produce this book Cheryl Samuel travelled to Leningrad Copenhagen and London to examine the six robes in Europe She also studied the robes housed in museums in Canada and the United States In 1985 she reconstructed Chief

Kotlean's robe using information she had gathered from her study of the actual robes and Tikhonov's paintings. In the process she resurrected an old weaving style no longer used by the Native people on the northern coast. Through her extensive and careful research Cheryl Samuel makes an important contribution to the knowledge of early Indian weaving. **Franz Brentano and Austrian Philosophy** Denis Fisette, Guillaume Fréchette, Friedrich Stadler, 2020-12-05 The book discusses Franz Brentano's impact on Austrian philosophy. It contains both a critical reassessment of Brentano's place in the development of Austrian philosophy at the turn of the 20th century and a reevaluation of the impact and significance of his philosophy of mind or descriptive psychology which was Brentano's most important contribution to contemporary philosophy and to the philosophy in Vienna. In addition the relation between Brentano phenomenology and the Vienna Circle is investigated together with a related documentation of Brentano's disciple Alfred Kastil in German. The general part deals with the ongoing discussion of Carnap's Aufbau. Vienna Circle Lecture by Alan Chalmers and the philosophy of mind with a focus on physicalism as discussed by Carnap and Wittgenstein. Gergely Ambrus As usual two reviews of recent publications in the philosophy of mathematics Paolo Mancosu and research on Otto Neurath's lifework. Jordi Cat Adam Tuboly are included as related research contributions. This book is of interest to students, historians and philosophers dealing with the history of Austrian and German philosophy in the 19th and 20th century. *The Raven* Derek Ratcliffe, 2010-01-31 The Raven presents a summary of knowledge of its natural history describing its distribution, feeding habits, association with other animals and breeding. The Raven is one of the most spectacular and romantic of British birds but relatively neglected in the modern literature of ornithology. Derek Ratcliffe here presents a thorough summary of our knowledge of its natural history emphasizing the long association of the bird with humankind. The place of the Raven in myth, legend and history is long established and this book describes the bird's fall from grace as a valued scavenger in medieval cities to a persecuted outcast in the modern wilds. The previous wide occurrence of Ravens is reviewed against the relationships between their present distribution status and habitat requirements as both a nesting and a non-breeding resident. The dependence of Ravens on carrion, especially sheep, within an omnivorous diet is the key to the species ecology and its social behaviour has evolved in close relation to this lifestyle. The flocking and communal roosting of non-breeders are major features of Raven behaviour while their nesting habits emphasise the territorial nature of breeding birds and their adaptation to secure but harsh environments. Raven numbers vary in relation to their food supply, local populations adjusting accordingly although the precise mechanism involved is still obscure. Ravens have a considerable capacity for recolonising old haunts when suitable conditions are restored as well as exploiting new areas where the habitat becomes favourable and there are local success stories to tell. Nationwide however the species position is delicately balanced and depends on both sympathetic land management practices and improving attitudes to Ravens as friends not foe. Worldwide Ravens are one of the most successful of all bird groups occurring over a large part of the northern hemisphere and replaced in some southern and tropical regions

by other raven species which exploit the familiar raven niche in their own environments The discussion of the northern hemisphere species is enlivened by reference to other species where useful Finally the Raven's age old reputation for high intelligence is weighed critically against the available evidence Today Ravens carry a new omen in the modern world as a barometer of goodwill to wildlife Like those in the Tower of London the continued existence of Ravens in our wild countryside will reveal something about both our current situation and our prospects for the future The text is brought to life through wonderful illustrations by Chris Rose
