The Political Warfare Executive Syllabus Volume I

Erwin J. Warkentin, 2019-05-08 Time bombs Trojan Horses and Dithering Hamlets were all part of the everyday jargon of the World War II s ultra Secretive Political Warfare Executive PWE The PWE s instructors used these terms in the training of the next generation of propagandists and political warriors The Political Warfare Executive Syllabus reveals for the first time what it took to become a propagandist in what was then the most elite psychological warfare unit in the world Under the maxim that a good propagandist is trained not born the lecturers of the PWE Training School at Woburn Abbey and then Brondesbury systematically explored every aspect of how to deliver a lethal dose of propaganda to the enemy and then a purgative and curative dose in the peace that followed The views of the PWE s instructors were controversial This is significant because they would play an important if hidden role in how Europe is developing even today For example they held a low opinion of the French in general and considered that they had been reduced to the level of dithering Hamlets by the German Trojan Horses even before the first German tank had crossed the Belgian frontier On the dark side of PWE operations they were not above killing the prostitutes whose brothels served the German U Boot fleet in order to amplify their propaganda message Perhaps most significant is that they saw Great Britain as European and espoused a Europe that looks very much like the European Union of the early 21st Century However there is one important difference They saw this Greater Europe as accepting the British way of life and being led by Great Britain and not embracing American culture under German leadership This first volume introduces the reader to the history and theory of political warfare as seen through the eyes of the inheritors of Lord Northcliffe s Crewe House Drawing on J F C Fuller and his concept of a war fought in the mind without armies it establishes the theoretical parameters of political warfare

French Musical Life Katharine Ellis, 2021-10-05 Explicitly or not the historical musicology of post Revolutionary France has focused on Paris as a proxy for the rest of the country This distorting lens is the legacy of political and cultural struggle during the long nineteenth century indicating a French Revolution unresolved both then and now In light of the capital's power as the seat of a centralizing French state which provincials found colonizing and as a cosmopolitan musical crossroads of nineteenth century Europe the struggles inherent in creating sustainable musical cultures outside Paris and in composing local and regionalist music are ripe for analysis Replacement of France with Paris has encouraged normative history writing articulated by the capital's opera and concert life Regional practices have been ignored disparaged or treated piecemeal This book is a study of French musical centralization and its discontents during the period leading up to and beyond the provincial awakening of the Belle époque The book explains how different kinds of artistic decentralization and regionalism were hard won or not across a politically turbulent century from the 1830s to World War II In doing so it redraws the historical map of musical power relations in mainland France Based on work in over 70 archives chapters on conservatoires concert life stage music folk music and composition reveal how tensions of State and locality played out differently depending on the structures and funding mechanisms in place the musical priorities of different communities and the presence or absence of galvanizing musicians Progressively the book shifts from musical contexts to musical content exploring the pressure point of folk music and its translation into local color for officials who perpetually feared national division Control over composition on the one hand and the emotional intensity of folk based musical experience on the other emerges as a matter of consistent official praxis In terms of French music and its compositional styles what results is a surprising new historiography of French neoclassicism bound into and growing out of a study of diversity and its limits in daily musical life
