Lories and lorikeets Arthur Alfred Prestwich, 1950

Encyclopedia of the Lories Rosemary Low, 1998 This title covers the biology distribution and aviculture of every species of Lory Parrot Lories are a group of colorful parrots from Australia Indonesia and the Pacific region Mainly nectar and pollen feeders some species are nomadic moving around in search of blossoms Their bright colors and active and often amusing behavior make them fascinating subjects for study by bird watchers and bird keepers Rosemary Low brings together for the first time detailed and absorbing information on their natural habits and aviculture Rosemary has arranged this most comprehensive book to give immediate access to specific subjects and species The first part is an encyclopedia covering nearly 100 different subjects from aviaries to conservation and from folklore to nest sites In the second part the biology of every species is described under standard headings which provide detailed descriptions of plumage chicks eggs habitat conservation and more A special gazetteer section includes distribution maps and information on localities where lories occur The encyclopedia s large reference section is a valuable source of further reading in the unlikely event there is anything else the reader needs to know The book is a riot of color with 140 color photographs of these stunningly beautiful birds It will leave the reader wanting to know them in life

Invasion Biology and Ecological Theory Herbert H. T. Prins, Iain J. Gordon, 2014-01-23 Many conservationists argue that invasive species form one of the most important threats to ecosystems the world over often spreading quickly through their new environments and jeopardising the conservation of native species As such it is important that reliable predictions can be made regarding the effects of new species on particular habitats This book provides a critical appraisal of ecosystem theory using case studies of biological invasions in Australasia Each chapter is built around a set of eleven central hypotheses from community ecology which were mainly developed in North American or European contexts The authors examine the hypotheses in the light of evidence from their particular species testing their power in explaining the success or failure of invasion and accepting or rejecting each hypothesis as appropriate The conclusions have far reaching consequences for the utility of community ecology suggesting a rejection of its predictive

powers and a positive reappraisal of natural history
