**Coach-makers' International Journal**, 1914 [Impact Evaluation in Practice; La Evaluación de Impacto en la Práctica](#) Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2011-06-13 This book offers an accessible introduction to the topic of impact evaluation and its practice in development While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations we trust that it will be a valuable resource for students and others interested in using impact evaluation Prospective impact evaluations should be used selectively to assess whether or not a program has achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on reducing poverty and improving people's lives The three chapters in this handbook provide a non-technical introduction to impact evaluations including Why Evaluate in Chapter 1 How to Evaluate in Chapter 2 and How to Implement Impact Evaluations in Chapter 3 These elements are the basic tools needed in order to successfully carry out an impact evaluation From a methodological standpoint our approach to

impact evaluation is largely pragmatic we think that the most appropriate methods should be identified to fit the operational context and not the other way around This is best achieved at the outset of the program through the design of prospective impact evaluation that can be built into the project s implementation We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself We also believe strongly that impact evaluations should be upfront about their limitations and caveats Finally we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank
