Lost Bombs:

The Day We Lost the H-Bomb Barbara Moran, 2009-04-28 In *The Day We Lost the H Bomb* science writer Barbara Moran marshals a wealth of new information and recently declassified material to give the definitive account of the Cold War s biggest nuclear weapons disaster On January 17 1966 a U S Air Force B 52 bomber exploded over the sleepy Spanish farming village of Palomares during a routine airborne refueling The explosion killed seven airmen and scattered the bomber s payload four unarmed thermonuclear bombs across miles of coastline Three of the rogue H bombs were recovered quickly Tracking down the fourth required the largest search and salvage operation in U S military history Moran traces the roots of the Palomares incident giving a brief yet in depth history of the Strategic Air Command and its eccentric larger than life commander General Curtis LeMay whose massive deterrence strategy kept armed U S bombers aloft at all times Back on the ground Moran recounts the myriad social and environmental effects of an accident that spread radioactive debris over hundreds of acres of Spanish farmland alarmed America s strategic allies and damaged Spanish American diplomatic relations As the American military floundered in its attempt to keep the story secret the events in Spain sometimes took on farcical overtones Constant global media hype was fueled by the hit James Bond movie *Thunderball* with its plot about an atomic weapon lost at sea In addition there were the unwanted attentions of a rusty hulled Soviet surveillance ship and even awkward public relations stunts complete with American diplomats in swim trunks *The Day We Lost the H Bomb* is a singular work of military history that effortlessly and dramatically captures Cold War hysteria high stakes negotiations and the race to clean up a disaster of unprecedented scope At once epic and intimate this book recounts in stunning detail the fragile peace Americans had made with nuclear weapons and how the specter of imminent doom forced the United States to consider not only what had happened over Palomares but what could have happened This forgotten chapter of Cold War history will grip readers with the tension of that time and reawaken the fears and hopes of that dangerous era **Lost Nuke** Dirk

Septer, 2016 A story seemingly drawn out of a Hollywood action script Gripping stuff Canada s History Just before midnight on February 13 1950 three engines of a US Air Force B 36 intercontinental bomber caught fire over Canada s northwest coast The crew jumped and the plane ditched somewhere in the Pacific Ocean Almost four years later the wreck of the bomber was found accidentally in a remote location in the coastal mountains of British Columbia three hours flying time in the opposite direction of where it was supposed to have crashed After years of silence the United States finally admitted to losing its very first nuclear bomb the incident was its first Broken Arrow the code name for accidents involving nuclear weapons But was the bomb dropped and exploded over the Inside Passage or was it blown up at the aircraft s resting place in the mountains This Cold War era tale follows the last flight of bomber 075 and attempts to unravel the real story behind more than fifty years of secrecy misdirection and misinformation **The V1 Flying Bomb Campaign 1944-1945** Jan

Gore, 2024-11-30 Analyzes the V1 campaign s development and impact detailing its strategic bombing efforts terror tactics

and phases of escalation during World War II In this new study Jan Gore assesses the success of the V1 campaign The background to the development of the V1 will be examined from the initial references to a mystery weapon to the gradual realisation by the British that the Germans were planning both a flying bomb V1 and a long range rocket V2 Once the first V1 sites were identified the British began a strategic bombing campaign later joined by the Americans However as the Normandy landings became imminent in June 1944 Hitler realised he had nothing to lose by delaying his vengeance attacks A week after D Day the first V1s began to reach England The attacks swiftly intensified It was a very different campaign from those before The pilotless planes could be produced cheaply and there was no need to put expensively trained pilots at risk The planes could be launched by day or night whatever the weather They were true terror weapons as the first hand accounts of those who lived through the attacks make clear there was very little notice that a doodlebug explosion was imminent and so it was almost impossible to take cover The book describes the first weekend of the attacks with the bombing of the Guards Chapel the evacuation program which followed and the UK s defense strategies It goes on to discuss the second phase of the attacks including the planned bombing of Manchester and the third phase of the campaign where V1s were ground launched from the Netherlands

Writing History 7 11 supports students and primary teachers helping them to explore ways in which activities involving the talk that underpins historical enquiry can be developed into reading and exciting extended reflective writing The step that teachers and pupils take from talk for learning to talk for writing is a vital one In this book the authors argue that all aspects of historical enquiry leading to writing involve discussion and dialogue which permeate every aspect of doing history From this perspective they set out a theoretical framework for understanding the role of talk and reading in developing pupils critical thinking and confident reflective writing then demonstrate through a series of case studies in which teachers university lecturers and pupils work together how the theory is put into practice in the classroom Themes include How to support children in writing in a variety of interesting genres How to make links between the National Curriculum 2013 for History and for English How to plan for breadth and depth studies in the new National Curriculum How activities in History 5 11 can be developed into exciting extended writing The second half of the book draws upon case studies from a number of real primary classrooms with children of different ages Each case study shows how teaching was planned to develop children s confidence and enjoyment in discussion and to scaffold reasoned written explanation and argument Topics presented are all relevant to the new curriculum framework and include talking and reading about Time change and significance over 6000 years writing a television script Celtic Britain and the Roman Army writing a travel brochure about Celtic Britain The destruction of Roman
