By the Sweat and Toil of Children, 1994 THE LOST CHILDHOOD (HUMAN RIGHTS OF SOCIALLY DEPRIVED) Vijay Prakash Sharma, This book is an experiment in understanding ground realities and descriptions of contemporary social problems Current debates about social and economic human rights emphasize vital economically driven needs for food shelter health care and basic education while ignoring equally fundamental needs for socialization interpersonal caring and meaningful associations This gives a distorted picture of social and economic human rights and allows the provision of economic needs to be promoted without due attention to the social needs that accompany them Similarly debates about civil and political human rights have focused on the rights against torture and cruel inhumane or degrading treatment while giving little or no attention to the intersection between these exclusions Social exclusion is a socially constructed concept and can depend on an idea of what is considered normal The concept of social exclusion is contested in that it is often difficult to objectively identify who is socially excluded as it is a matter of the criteria adopted and the judgments used The state of Jharkhand is one of the migrating states especially for child laborers Their labor is unaccountable They usually suffer from anemia and reproductive infections One of the main obstacles to tribal development is superstitious beliefs and practices They think that the diseases famines water scarcities weak crops the spread of epidemics and premature death etc befall on them only when the evil spirits are angry Thus the socio economic condition of the tribal is very poor caused of many factors i e undulating topography less cultivable land with no irrigation facilities lack of Govt infrastructure facilities and superstitious beliefs etc Migration and child trafficking must be prevented through the collaborative action of influential members of society and community leaders police personnel media people NGOs working in the field and individuals who are in a professional capacity can influence state legislation to successfully combat trafficking Education with professional technical skills education for income generation activities is needed Migration and child trafficking must be prevented through the collaborative action of influential members of society and community leaders police personnel media people NGOs working in the field and individuals who are in a professional capacity can influence state legislation to successfully combat trafficking Education with professional technical skills education for income generation activities is needed It is occasioned by of complete lack of sources of livelihood It doesn t lead to a better fortune for most of the girls going out of their homes but dark lanes where they are forever lost where their lives end as victims of sexual exploitation in various ways and they fall prey to sexual exploitation in the brothels or outside the brothels This book will be helpful to Administrators Social Scientists journalists and social activists

Challenges for Inclusion ,2008-01-01 This book reviews current controversies and dilemmas in the educational and

social development of children and adolescents in Britain India Bangladesh and Nepal Britain is contrasted with the Indian Sub Continent because in theory at least Britain has policies which should enable young people to be fully integrated within the educational system whatever the degree of their original disability while in the Indian Sub Continent such educational opportunities are denied to many children because of problems of social structure values and poverty The rights of the disabled to full inclusion are emphasized in two chapters by Sharon Rustemier But a chapter by Dame Mary Warnock whose report to government designed the system for educational inclusion shows that British policies for inclusion of the disabled are not working The chapter by Bagley outlines the poverty of education in Britain which means that in a highly stratified society many children both poor and disabled are excluded from mainstream education by decisions based on school policies and neighbourhood disadvantage India in contrast is a culture in which inclusion of the disabled within educational systems is marred by economic poverty as well as deliberate policies which deny Dalits formerly known as Untouchables access to many kinds of educational opportunity Nevertheless there are pockets of good practice in India including the legal framework for action which chapters by Jha and Jaya identify The history of educational initiatives for social and educational of the very poor of Bangladesh are reviewed in detail since these initiatives illustrate the work of a unique NGO BRAC the Bangladesh Rural Advancement Committee which offers advancement for the poorest of the poor in a nation that is significantly poorer than India Nepal too is also one of the poorest nations on earth and we offer a detailed account of the trafficking of women and girls from Nepal into Indian brothels These girls are permanently excluded from all social and educational networks and their plight poses a major challenge for the movement for the social and educational inclusion of all children

The Government of Chronic Poverty Sam Hickey, 2013-10-31 What are the underlying causes of chronic poverty Can development beyond neoliberalism offer the strategies required to challenge such persistent forms of poverty particularly through efforts to promote citizenship amongst poor people Drawing on case study evidence from Africa Latin America and South Asia the contributions critically examine different attempts to govern chronic poverty via the promotion of particular forms and notions of citizenship with a specific focus on the role of community based approaches social policy and social movements Poverty is seen here as deriving from underlying patterns of uneven development involving processes of capitalism and state formation that foster inequality generating mechanisms and particularly disadvantaged social categories Sceptics tend to deride the emphasis under current inclusive forms of Liberalism on tackling poverty through the promotion of citizenship as inevitably depoliticising and disempowering for poor people and our cases do suggest that citizenship based strategies rarely alter the underlying basis of poverty However our evidence also offers some support to those optimists who suggest that progressive moves towards poverty reduction and citizenship formation have become more rather than less likely at the current juncture The promotion of citizenship emerges here as a significant but incomplete effort to challenge poverty that persists over time This book was published as a special issue of the Journal of Development Studies
