Lost Of Annabella:

Shocking Bodies Iwan Rhys Morus, 2011-04-11 For the Victorians electricity was the science of spectacle and of wonder. It provided them with new ways of probing the nature of reality and understanding themselves. Luigi Galvani's discovery of animal electricity at the end of the eighteenth century opened up a whole new world of possibilities in which electricity could cure sickness, restore sexual potency and even raise the dead. In *Shocking Bodies* Iwan Rhys Morus explores how the Victorians thought about electricity and how they tried to use its intimate and corporeal force to answer fundamental questions about life and death. Some even believed that electricity was life, which brought into question the existence of the soul and of God and provided arguments in favour of political radicalism. This is the story of how electricity emerged as a powerful new tool for making sense of our bodies and the world around us. Putnam's Magazine, 1869 *The Giza Enigma* Miles Augustus Navarr, 2022-10-17

There are many mysteries about ancient Egypt. But perhaps the most enigmatic puzzle is the Great Pyramid. Established Egyptologists insist with fervor and uncommon zeal that it was built as a tomb by Khufu or Cheops, the fourth dynasty pharaoh who reigned about forty-five hundred years ago. No mummy has ever been found in any of the one hundred or so Egyptian pyramids so far discovered, particularly the Great Pyramid. There are no funerary hieroglyphics or paintings in the Great Pyramid. In fact, there is not a single hieroglyph or painting within or without the whole structure. The mathematical and geometrical skills, as well as advanced precision engineering, attest to an erudite company with capabilities far beyond what was available to ancient Egyptians. *Giza Enigma* is an attempt to highlight the discrepancies and inconsistencies inherent in the assertion by the mainline Egyptologists who have for the past century vehemently maintained the Tomb Theory. Despite being a fictional tale, our protagonist Dr Sebastian Crane, an independent Egyptologist, dares to challenge a team of conformist Egyptologists in a public debate. Furnishing well-documented facts and detail evidence, he manages to deliver a credible and convincing argument against the Tomb Theory. But this is just the beginning. Dr Crane is enticed to investigate a recently discovered clay disc that may give him the physical proof he needs to validate his unconventional hypothesis. Eventually, his quest leads him to Egypt and the underground halls of Giza, where he encounters codes and cyphers steering him to a discovery more sensational than he ever envisaged. A discovery with potential to change the course of human civilization for better or worse. **Listening for Theatrical Form in Early**
