communication and rhetoric and well as the broader meta discipline of environmental humanities *Rachel Carson* Scott Gillam,2010-08 Presents the life and accomplishments of the biologist whose work and advocacy including her book *Silent Spring* pioneered the environmental movement **Debussy, Bergson and the Music of 'la duree'** Charles

Frantz,2024-10-21 Charles Frederick Frantz provides a quantitative and qualitative analysis of Debussy s music through the lens of Bergson s philosophical perspective of *dur e* revealing his revolution in musical time In *fin de si cle* Paris Debussy was revolutionizing musical time while Bergson was establishing a metaphysics that challenged the notion of measured or spatialized time Bergson argued that real time or *dur e* could be grasped only through intuition as opposed to analysis Debussy eschewed analysis of music declaring that separating it into parts was better left to engineers Debussy s music and Bergson s *dur e* were conceived and imagined in the environs of nature The cycle of seasons the gracefulness of a blooming flower or a gentle breeze all suggest continuity flow and uninterrupted rhythm The time of nature is the time of Debussy s music and Bergson s *dur e* Debussy s use of open forms and Golden Sections create a time world of an expanded present never ceasing Bergson s perception of real time is ever changing bringing the past into the present and open to unforeseen novelty This book is intended primarily for scholars in the disciplines of musicology music theory and philosophy and can be used as a text for upper level undergraduate or graduate courses in musicology or music theory **Silent Spring at 50**

Roger Meiners,Pierre Desrochers,Andrew Morriss,2012-09-18 Widely credited with launching the modern environmental movement when published 50 years ago Rachel Carson s *Silent Spring* had a profound impact on our society As an iconic work the book has often been shielded from critical inquiry but this landmark anniversary provides an excellent opportunity to reassess its legacy and influence In *Silent Spring at 50 The False Crises of Rachel Carson* a team of national experts explores the book s historical context the science it was built on and the policy consequences of its core ideas Their findings much of what Carson presented as fact was slanted and today we know much of it is simply wrong Rachel Carson's

Wonder-Filled World Kate Hannigan,2025-03-11 This STEAM picture book biography highlights how scientist and writer Rachel Carson became the author of the groundbreaking book *Silent Spring* and the mother of the modern environmental movement Rachel Carson wasn t always the Rachel Carson renowned environmental activist From her earliest years Rachel had a passion for nature to her it was a fairyland and she loved to write about her adventures and the creatures she saw Encouraged by teachers Rachel wanted nothing more than to study the ocean and its inhabitants Though unable to finish her PhD due to financial constraints Rachel found work in science and success as a nature writer In the course of her work Rachel learned about the harm caused by recently developed pesticides and chemicals that made their way into the

environment Desperate to protect nature for future generations even as her health declined she penned the famous book *Silent Spring* a call to action against the threat of the deadly chemicals The book is anything but quiet selling more than 2 million copies and leading directly to changes like the Clean Air Act of 1963 and the Clean Water Act of 1972 Kate Hannigan the author of several award winning children s books joins her talents with Katie Hickey a longtime illustrator of popular picture book biographies to bring the mother of the environmental movement to life for a new generation of readers

Women Who Invented the Sixties Steve Golin,2022-09-20 While there were many protests in the 1950s against racial segregation economic inequality urban renewal McCarthyism and the nuclear buildup the movements that took off in the early 1960s were qualitatively different They were sustained not momentary they were national not just local they changed public opinion rather than being ignored *Women Who Invented the Sixties* tells the story of how four women helped define the 1960s and made a lasting impression for decades to follow In 1960 Ella Baker played the key role in the founding of the Student Nonviolent Coordinating Committee which became an essential organization for students during the civil rights movement and the model for the antiwar and women s movements In 1961 Jane Jacobs published *The Death and Life of Great American Cities* changing the shape of urban planning irrevocably In 1962 Rachel Carson published *Silent Spring* creating the modern environmental movement And in 1963 Betty Friedan wrote *The Feminine Mystique* which sparked second wave feminism and created lasting changes for women Their four separate interventions helped together to end the 1950s and invent the 1960s *Women Who Invented the Sixties* situates each of these four women in the 1950s Baker s early activism with the NAACP and the Southern Christian Leadership Conference Jacobs s work with Architectural Forum and her growing involvement in neighborhood protest Carson s conservation efforts and publications and Friedan s work as a labor journalist and the discrimination she faced before exploring their contributions to the 1960s and the movements they each helped shape

The Faith of Scientists Nancy K. Frankenberry,2008-08-11 *The Faith of Scientists* is an anthology of writings by twenty one legendary scientists from the dawn of the Scientific Revolution to the frontiers of science today about their faith their views about God and the place religion holds or doesn t in their lives in light of their commitment to science This is the first book to bring together so many world renowned figures of Western science and present them in their own words offering an intimate window into their private and public reflections on science and faith Leading religion scholar Nancy Frankenberry draws from diaries personal letters speeches essays and interviews and reveals that the faith of scientists can take many different forms whether religious or secular supernatural or naturalistic conventional or unorthodox These eloquent writings reflect a spectrum of views from diverse areas of scientific inquiry Represented here are some of the most influential and colossal personalities in the history of science from the founders of science such as Galileo Johannes Kepler Francis Bacon Isaac Newton Charles Darwin and Albert Einstein to modern day scientists like Carl Sagan Stephen Jay Gould Jane Goodall Freeman Dyson Stephen Hawking Edward O Wilson and Ursula Goodenough Frankenberry provides a general

20th century providing a rich historical context for understanding their achievements and the way they changed the practice of science Much more than a Who's Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole

Figuring Maria Popova, 2019-02-05 Figuring explores the complexities of love and the human search for truth and meaning through the interconnected lives of several historical figures across four centuries beginning with the astronomer Johannes Kepler who discovered the laws of planetary motion and ending with the marine biologist and author Rachel Carson who catalyzed the environmental movement Stretching between these figures is a cast of artists writers and scientists mostly women mostly queer whose public contribution have risen out of their unclassifiable and often heartbreaking private relationships to change the way we understand experience and appreciate the universe Among them are the astronomer Maria Mitchell who paved the way for women in science the sculptor Harriet Hosmer who did the same in art the journalist and literary critic Margaret Fuller who sparked the feminist movement and the poet Emily Dickinson Emanating from these lives are larger questions about the measure of a good life and what it means to leave a lasting mark of betterment on an imperfect world Are achievement and acclaim enough for happiness Is genius Is love Weaving through the narrative is a set of peripheral figures Ralph Waldo Emerson Charles Darwin Elizabeth Barrett Browning Herman Melville Frederick Douglass Nathaniel Hawthorne and Walt Whitman and a tapestry of themes spanning music feminism the history of science the rise and decline of religion and how the intersection of astronomy poetry and Transcendentalist philosophy fomented the environmental movement

Spirituality in the Flesh Robert C. Fuller, 2008-09-08 It is now generally accepted that the structure and function of the human body deeply influence the nature of human thought As a consequence our religious experiences are at least partially determined by our sensory organs emotional programs sexual sensibilities and the neural framework of our brains In Spirituality in the Flesh Robert C Fuller investigates how studying the body can help us to answer the profoundest spiritual questions Why is it that some religious traditions assign spiritual currency to pain How do neurochemically driven emotions such as fear shape our religious actions What is the relationship between chemically altered states of consciousness and religious innovation Using recent biological research to illuminate religious beliefs and

practices Fuller delves into topics as diverse as apocalypticism nature religion Native American peyotism and the sexual experimentalism of nineteenth century communal societies in every case seeking middle ground between the arguments currently emanating from scientists and humanists He takes most scientific interpreters to task for failing to understand the inherently cultural aspects of embodied experience even as he chides most religion scholars for ignoring new knowledge about the biological substrates of human thought and behavior Comfortable with the language of scientific analysis and sympathetic to the inherently subjective aspects of religious events Fuller introduces the biological study of religion by joining together this era's unprecedented understanding of bodily states with an expert's knowledge of religious phenomena Culling together insights from scientific observations historical allusions and literary references *Spirituality in the Flesh* offers a bold look at the biological underpinnings of religion and opens up new and exciting agendas for understanding the nature and value of human religiosity

Sustaining Lake Superior Nancy Langston, 2017-10-24 A compelling exploration of Lake Superior's conservation recovery and what it can teach us in the face of climate change Lake Superior the largest lake in the world has had a remarkable history including resource extraction and industrial exploitation that caused nearly irreversible degradation But in the past fifty years it has experienced a remarkable recovery and rebirth In this important book leading environmental historian Nancy Langston offers a rich portrait of the lake's environmental and social history asking what lessons we should take from the conservation recovery as this extraordinary lake faces new environmental threats In her insightful exploration Langston reveals hope in ecosystem resilience and the power of community advocacy noting ways Lake Superior has rebounded from the effects of deforestation and toxic waste wrought by mining and paper manufacturing Yet despite the lake's resilience threats persist Langston cautions readers regarding new mining interests and persistent toxic pollutants that are mobilizing with climate change
