## **Lost In Cyberspace Canada And The Information Revolution:**

**Lost in Cyberspace?** Robert Chodos, Rae Murphy, Eric Hamovitch, 1997-01-01 The arrival of the information highway has been hyped as the greatest change in how humans live and work since we captured fire What are its implications for Canadian society The authors present a thought provoking examination of the new digital technologies considering particularly the effects they might be expected to have on employment sovereignty community and culture in Canada They trace the information highway back to its military origin guide readers through the maze of corporate players promoting its development and stop to explore the wide open culture of the internet Lost in Cyberspace is a pioneering look at the influence of new digital technologies on Canadian society **Canadian Communication Thought** Robert E.

Babe, 2000-01-01 Babe examines the writings of ten major thinkers in the context of their physical and cultural environments and finds that there is indeed a mode of theorizing that is quintessentially Canadian Tug of War Jocelyn Wills, 2017-09-04 Selling Earth observation satellites on their abilities to predict and limit adverse environmental change politicians business leaders the media and technology enthusiasts have spent sixty years arguing that space exploration can create a more peaceful prosperous world Capitalist states have also socialized the risk and privatized the profits of the commercial space industry by convincing taxpayers to fund surveillance technologies as necessary components of sovereignty freedom and democracy Jocelyn Wills's Tug of War reminds us that colonizing the cosmos has not only accelerated the arms race but also encouraged government contractors to compete for the military and commercial spoils of surveillance Although Canadians prefer to celebrate their role as purveyors of peaceful space applications Canada has played a pivotal part in the expansion of neoliberal policies and surveillance networks that now encircle the globe primarily as a political ally of the United States and component supplier for its military industrial complex Tracing the forty five year history of Canada's largest space company MacDonald Dettwiler and Associates MDA through the lens of surveillance studies and a trove of oral history transcripts government documents trade journals and other sources Wills places capitalism's imperial ambitions squarely at the centre of Canada US relations and the privatization of the Canadian political economy Tug of War confronts the mythic lure of technological progress and the ways in which those who profess little interest in war rationalize their leap into military contracting by avoiding the moral and political implications of their work **Cracking the Gender Code** Melanie Stewart Millar, 1998 The digital world its advertising machinery and the popular media are pushing women back into traditional roles and once again creating a superior hypermacho expert male Women must look critically at who is in charge of the new technology and challenge the gender codes that can work against them In this path breaking book Melanie Stewart Millar explores power relations in the digital world and asks us to question what is really going on How is technology shaping our future What is the role of women within digital culture What is the corporate agenda How is it influencing women's work Provocative and incisive Cracking the Gender Code questions how the gains women have made through feminism over the

last decades are being eroded It looks specifically at how the articles and images of Wired the magazine of the digital generation are detrimental to women a discourse that may be establishing the underlying ideology of a far reaching communications industry Stewart Millar argues that simply being computer literate or knowing how to use the Net is not good enough Women need to demystify the technology and crack the gender code to participate equally in the cyber world of the future **The Canadian Forum** ,1997 Includes critical reviews LLT ,1997 Canadian Periodical Index ,2000

consequence of them this book argues contributed to many of current issues with internet media including of toxic communication disinformation and over commercialisation
