of Humanity Ian W. Payne,2025-02-20 Who do humans think they are A cacophony of answers in the face of global challenges like climate change artificial intelligence racism nationalism terrorism feminism abortion gene therapy gender constructivism shows we do not agree To a deeply divided despondent world the Bible speaks today about the human condition and destiny by pointing us to Jesus Christ the true human the image of God Ian Payne s conviction is that the most important answer to the question of humanity is God He expounds a comprehensive selection of Old and New Testament passages and examines a range of issues in being human today The book is structured in three parts following the biblical narrative Part 1 Created in the image of God Part 2 Image of God renewed in Christ Part 3 Issues in being human This biblical theology shows that hope and meaning for humans are found in remembering and trusting God s gift of life and goal of redemption and restoration With an integrated study guide this book is perfect for personal and group study and preachers application of the passages covered **John Chrysostom on Divine Pedagogy** David Rylaarsdam,2014-10-30

Contrary to the portrayals of Chrysostom as a theologically impaired moralizing sophist this book argues that his thinking is remarkably coherent when it is understood on his own terms and within his culture Chrysostom depicts God as a teacher of philosophy who adaptably guides people toward salvation Since the theme of divine adaptability influences every major area of Chrysostom s thought tracing this concept provides a thorough introduction to his theology It also explains at least in part several striking features of his homilies including his supposed inconsistencies his harsh rhetoric and apparent political na vet his intentionally abridged and exoteric theological discussions and his lack of allegiance to an Antiochene school In addition to illuminating such topics the concept of adaptability stands at one of the busiest intersections of Late Antique

culture for it is an important idea found in rhetoric and discussions about the best methods of teaching philosophy. Consequently, adaptability is an ingredient in the classical project of paideia, and Chrysostom is a Christian philosopher who seeks to transform this powerful tradition of formation. He gives his Christianized paideia a theological foundation by adapting and seamlessly integrating traditional pedagogical methods into his reading and communication of Scripture. David Rylaarsdam provides an in-depth case study of one prominent leader's attempt to transform culture by forming a coherent theological discourse that was adapted to the level of the masses.

Human Universe Professor Brian Cox, Andrew Cohen, 2015-05-07 Top ten Sunday Times Bestseller Engaging, ambitious, and creative Guardian Where are we? Are we alone? Who are we? Why are we here? What is our future? Humanizing Education in the 3rd Millennium R. Scott Webster, Timo Airaksinen, Poonam Batra, Margarita Kozhevnikova, 2022-06-20 This book proposes some insights and ideas into how education might be humanized. The chapters inform, provoke, and guide further inquiries into imagining and actualizing human education. It presents the view that education should be primarily understood as human education, which offers universal good for the entire planet. It centres around the significant values that make life in a holistic sense meaningful, worthwhile, and socially just. It discusses the fundamental idea that human education is the key to peace, individual and social freedoms, social justice, and harmony, fraternity, and happiness all over the world, and how educational ideals and methods must be reconsidered to achieve this end. This book originates from an international conference and round table, Human Education in the 3rd Millennium, in July 2019 in Dharamsala, India.

New Directions in Theology and Science Peter Harrison, Paul Tyson, 2022-01-31 This book sets out a new agenda for science-theology interactions and offers examples of what that agenda might look like when implemented. It explores in innovative ways what follows for science-theology discussions from recent developments in the history of science. The contributors take seriously the historically conditioned nature of the categories science and religion and consider the ways in which these categories are reinforced in the public sphere. Reflecting on the balance of power between theology and the sciences, the authors demonstrate a commitment to moving beyond traditional models of one-sided dialogue and seek to give theology a more active role in determining the interdisciplinary agenda.
