Love Bite:

Love Bites Elena Kaufman, 2017-01-31 *Love Bites* is a collection of thirteen stories set in Europe and North America. They trace foreigners, drifters, and eccentrics linked by their need for acknowledgment and belonging. How do these characters survive physically and psychologically on unfamiliar ground, whether as tourists or strangers in new cities or in new situations which jolt them out of the security of the familiar? Recurring themes are of isolation, loss, and a desire for connection when strangers reach out to other strangers for stability. A mysterious older woman and an alienated foreigner lost on a crowded London street bond in their search for home. A single woman consults a soothsayer in London about family problems before he lures her into his own conflict. An acting student steps into a dusty music hall past when she auditions for the star maker. A former life model and her overgrown son prey on a Canadian tourist in a Parisian garden. Interconnected scenes in Montreal, Paris, and Toronto are linked by bizarre accidents and those who witness them. An elementary school boy fascinated by his elderly neighbor adopts the Candyman as an absent father. A woman left by her partner in Paris wakes up with a phantom appendage and wanders Paris as a hermaphrodite. A honeymooning couple marooned on a remote Hawaiian island is forced to strip for their survival. An expat escapes into a new life in Paris until her ex-boyfriend reappears, reminding her of the impact of loss. An elderly woman suffering from dementia is nearly eaten to death by her beloved pets running rampant in her home. *Love Bites* reveals a kaleidoscope of human experience wherein the reader is enticed into tales of everyday exiles, witnesses, and saviors. Despite emotional or geographical displacement, the characters in this collection all have one thing in common: their need to find home.

Shifter's Love Bites Kayla Gabriel, *Love Bites* Rose and Mason Shy repressed Dr. Rose will have to fight to save her Shifter patient known to her only as Mason. With his execution looming, will she have the courage to leave everything behind in order to save him? *Love Bites* Ian and Jeanne: Jeanne needs sexy neighbor Ian to stay alive; she just doesn't know it yet. *Love Bites* Maddie and Jasper: Maddie and Jasper return appearing in Edinburgh to track down an elusive Alpha. As they explore ancient Scottish ruins, they'll also get to explore one another. *Love Bites* Emma and Connall: Emma might have visions of the future, but nothing could prepare her for smoking hot Shifter Connall and the mission they'll need to complete.

Love and Hate IrenÄus Eibl-Eibesfeldt, The author argues that there are specific turning points in evolution. Structures and behavioral patterns that evolved in the service of discrete

functions sometimes allow for unforeseen new developments as a side effect In retrospect they have proven to be pre adaptations and serve as raw material for natural selection to work upon Love and Hate was intended to complement Konrad Lorenz s book On Aggression by pointing out our motivations to provide nurturing and thus to counteract and correct the widespread but one sided opinion that biologists always present nature as bloody in tooth and claw and intra specific aggression as the prime mover of evolution This simplistic image is nonetheless still with us all the more regrettably because it hampers discussion across scholarly disciplines Eibl Eibesfeldt argues that leaders in individualized groups are chosen for their pro social abilities Those who comfort group members in distress who are able to intervene in quarrels and to protect group members who are attacked those who share those who in brief show abilities to nurture are chosen by the others as leaders rather than those who use their abilities in competitive ways Of course group leaders may need beyond their pro social competence to be gifted as orators war leaders or healers Issues of love and hate are social in origin and hence social in consequence Life has emerged on this planet in a succession of new forms from the simplest algae to man man the one being who reflects upon this creation who seeks to fashion it himself and who in the process may end by destroying it It would indeed be grotesque if the question of the meaning of life were to be solved in this way As the author notes in the preface of this new edition I discuss the phylogenetic origin of our behavior and motivations which provide the basis for our cultural evolution and thus for our humanitarian hopes In language that is clear and accessible throughout arguing forcefully for the innate and preprogrammed dispositions of behavior in higher vertebrates including humans Eibl Eibesfeldt steers a middle course in discussing the development of cultural and ethical norms while insisting on their matrix of biological origins
