Geography of Loss Patti Digh, 2013-12-23 This extraordinary book is borne of loss the loss of love of certainty and assuredness of knowing where we are or who we are of beauty and youth of health of life itself of privacy and of roles and of knowing When someone or something we love leaves us we suddenly walk alone into new territory without them We become strangers in new lands places where the landscape is unalterably changed where the center of gravity has somehow faltered and become weak making us feel as if we might fall off the surface of the earth Sometimes that moment of loss defines the rest of our lives becoming a center to our compass forever This unique book is a guidebook an atlas of those experiences of loss and grief a map for living through and into change and impermanence to moving on anew You are the navigator through the three main sections Embrace what is walk into your new landscape Honor what was be grateful for your old landscape Love what will be live into your future landscape Illustrated throughout with art submitted from around the world this book is an atlas of experience utilizing map imagery and the richly metaphoric evocative and functional language of geography to help you place yourself on your own journey to find your way through helpful exercises and an empathetic expert guide

Talking Bodies Emma Rees, 2017-11-21 In this collection leading thinkers writers and activists offer their responses to the simple question do I have a body or am I my body The essays engage with the array of meanings that our bodies have today ranging from considerations of nineteenth century discourses of bodily shame and otherness through to arguing for a brand new corporeal vocabulary for the twenty first century Increasing numbers of people are choosing to modify their bodies but as the essays in this volume show this is far from being a new practice over hundreds of years it has evolved and accrued new meanings This richly interdisciplinary volume maps a range of cultural anxieties about the body resulting in a timely and compelling book that makes a vital contribution to today's key debates about embodiment **Gossamer** George A.

Non-axisymmetric Local Stability Loss of a Hollow Cylinder Surkay D. Akbarov, Zafer Kutug, Muhammad Yousaf Anwar, 2023-12-03 The book presents formulations and examples of three dimensional non axisymmetric stability in viscoelastic anisotropic cylindrical shells The most critical stability loss modes are determined by minimizing the critical loads and critical times with respect to the number of half waves in radial as well as transverse directions Currently there is no literature available on three dimensional local buckling analysis or localized warpage that considers non axisymmetric stability loss in viscoelastic cylindrical shells The contents of this book provide the formulation for such a stability loss analysis through the framework of the three dimensional linearized theory of stability Additionally as this book addresses the problem by modeling the material as a viscoelastic fibrous composite it can be applied to carry out buckling analysis in both elastic and viscoelastic cases Guide to modelling composite viscoelastic shell elements for buckling analysis Provides a framework for defining the failure criterion for viscoelastic materials Course material for teaching shell buckling and viscoelastic composites
