The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barragán Jos Villagrán Garcí a Juan O Gorman Pedro Ramírez Vázquez Agustín Hernández Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan José Díaz Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone

Andrea de Paiva, Architect, Urban Planner and Author, Director of NeuroAU at the University of Brasilia. Milton Shinberg is at the vanguard of architects convinced that the design of buildings for people to flourish should incorporate a deep understanding of human psychology and neuroscience. People-Centered Architecture will greatly enhance architectural thinking, education, and practice. Anjan Chatterjee, MD, FAAN, Professor of Neurology, Psychology, and Architecture, University of Pennsylvania. A veteran architect's pragmatic guide to re-energizing design thinking, architectural practice, and architectural education with pivotal insights from the human sciences and wisdom harvested from non-architects. In this one-of-a-kind book, architect and educator Milton Shinberg presents game-changing approaches to enhance, reorient, and re-energize design thinking. Shinberg draws from decades of dialogue with architects, designers, clients, artists, scientists, teachers, and his own students. His prompts and provocations, written in a clear and accessible narrative style, are organized to help architects who are humanists come to know much more about humans. Wise design becomes easier. In one concise volume, People-Centered Architecture: Design Practice Education delivers a vibrant framework for architectural practice for students and teachers of architecture and for clients and stakeholders. Through this book, each will see their project partners more clearly, more empathetically, and in ways that foster richer, better brainstorming and more productive collaboration. The coalition of the curious, people intrigued by architecture and architects, will get a peek behind the curtain.

Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement
