Lung In Health And Disease:

Lung Inflammation in Health and Disease, Volume I Yong-Xiao Wang, 2021-03-31 Respiratory diseases are leading causes of death and disability globally with about 65 million people suffering from COPD and 334 million from asthma the most common chronic disease Each year tens of millions of people develop and can die from from respiratory infections such as pneumonia and TB Systemic inflammation may induce and exacerbate local inflammatory diseases in the lungs and local inflammation can in turn cause systemic inflammation There is increasing evidence of the coexistence of systemic and local inflammation in patients suffering from asthma COPD and other lung diseases and the co morbidity of two or more local inflammatory diseases often occurs For example rheumatoid arthritis frequently occurs together with and promotes the development of pulmonary hypertension This co morbidity significantly impacts quality of life and can result in death for those affected Current treatment options for lung disease are neither effective nor condition specific there is a desperate need for novel therapeutics in the field Additionally the molecular and physiological significance of most major lung diseases is not well understood which further impedes development of new treatments especially in the case of coexistent lung diseases with other inflammatory diseases Great progress has been made in recent years in many areas of the field particularly in understanding the molecular geneses regulatory mechanisms signalling pathways and cellular processes within lung disease as well as basic and clinical technology drug discovery diagnoses treatment options and predictive prognoses This is the first text to aggregate these developments In two comprehensive volumes experts from all over the world present state of the art advances in the study of lung inflammation in health and disease Contributing authors cover well known as well as emerging topics in basic translational and clinical research with the aim of providing researchers clinicians professionals and students with new perspectives and concepts The editors hope these books will also help to direct future research in lung disease and other inflammatory diseases and result in the development of novel therapeutics

Sex-Based Differences in Lung Physiology Patricia Silveyra, Xenia T. Tigno, 2021-03-18 This book provides an overview of the latest experimental work on sex based differences in lung function and inflammation Readers will learn how these differences relate to individual predispositions for the development of lung disease in men and women and in different stages of their reproductive lives Further the book focuses on diseases that predominantly affect women or men with an emphasis on the physiological mechanisms underlying their pathobiology In turn these findings are complemented by chapters on recent studies which investigate how circulating sex hormone levels impact the lung s innate immune response to environmental agents and air pollution The pathogeneses of asthma and viral respiratory infection are also major focus areas As an outlook the book also discusses current and future research directions aimed at developing sex specific therapies for lung disease To examine these anatomical and physiological differences in the male and female respiratory systems the authors employ a broad range of methods from molecular and clinical biology Accordingly the book will be a fascinating read
